Article I—Prohibitions and Scope of Regulation

SECTION 1. *Prohibition against dealing in certain commodities at prices above the maximum.* (a) Maximum prices are established as follows:

(1) On and after April 20, 1943, regardless of any contract, agreement, lease or other obligation, or of any price regulation or order heretofore issued by the Office of Price Administration, no person shall sell or deliver, and no person shall buy or receive, in the Territory of Hawaii the following commodities at prices higher than the maximum prices set forth in sections 14 to 39, Tables I to XXVI, inclusive; and no person shall agree, offer, solicit, or attempt to do any of the foregoing.

SEC. 2. *Less than maximum prices.* Lower prices than those set forth in this Maximum Price Regulation No. 373 may be charged, demanded, paid, or offered.

SEC. 3. *To what transactions, commodities and persons these ceilings apply*—(a) *What transactions are covered.* This regulation covers sales within the Territory of Hawaii, unless otherwise provided herein, of the commodities enumerated in the tables set forth below. The type of transaction covered, whether wholesale, retail, or both, is specified in each table.

(b) *What products are covered.* This regulation covers the commodities enumerated in the tables set forth below.

(c) *What persons are covered.* Any person who sells or, in the usual course of business buys, any commodity enumerated in the tables set forth below is subject to this regulation. The term "person" includes an individual, corporation, partnership, association, or any other organized group; their legal successors or representatives; the United States, or any government or any of its political subdivisions; or any agency of any of the foregoing.

SEC. 4. *Relation to other regulations.* (a) The sale of commodities not otherwise governed by this Maximum Price Regulation No. 373 shall be covered by the General Maximum Price Regulation for Hawaii and other price regulations applicable to sales within the Territory of Hawaii.

(b) This Maximum Price Regulation No. 373 supersedes the applicable provisions of General Order No. 49.[1]

SEC. 5. *Geographical applicability.* (a) The provisions of this Maximum Price Regulation No. 373 shall be applicable in the territory of Hawaii unless otherwise provided herein.

Article II—Terms of Sale

SEC. 6. *Prohibited practices*—(a) *General.* Any device to obtain a higher-than-ceiling price without actually raising the dollar-and-cents price is as much a violation of this Maximum Price Regulation No. 373 as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying agreements, combination sales, trade understandings and the like.

(b) *Adjustable pricing.* A price may not be made adjustable to a maximum price which will be in effect at some time after delivery of any commodity covered by this regulation has been completed, but the price may be adjustable to the maximum price in effect at the time of delivery.

SEC. 7. *Fractional prices for commodities sold at retail.* (a) Whenever provision is made in this regulation for the calculation of a maximum price not otherwise specified in dollars and cents, for the sale of a commodity at retail, and such calculation results in a fraction of a cent, then the amount so calculated shall be reduced to the nearest lower cent if the fraction is less than one-half cent, and shall be increased to the nearest higher cent, if the fraction is one-half cent or more.

Article III—Miscellaneous

SEC. 8. *Petitions for amendment.* (a) Any person seeking an amendment of any provision of this Maximum Price Regulation No. 373 may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1;[2] *Provided, however,* That any such petition shall be filed with the Director of the Office of Price Administration for the Territory of Hawaii, Honolulu, T. H.

SEC. 9. *Applications for adjustment.* (a) Adjustment of a maximum price, for any commodity subject to this regulation, heretofore granted by the Office of the Military Governor for Hawaii, shall continue in full force and effect until revoked or modified by the Office of Price Administration.

(b) Any seller or group of sellers may apply for adjustment of a maximum price of a commodity established for him or them by this Maximum Price Regulation No. 373, or any order issued thereunder, when it appears:

(1) That there exists or threatens to exist in a particular locality a shortage in the supply of such commodity which aids directly in the war program or is essential to a standard of living consistent with the prosecution of the war; and

(2) That such local shortage will be substantially reduced or eliminated by adjusting the maximum prices of such seller and of like sellers for such commodity; and

(3) That such adjustment will not create or tend to create a shortage, or a need for increase in prices, in another locality, and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended.

(c) Except as otherwise provided in this section 9, all applications for adjustment shall be filed in accordance with Procedural Regulation No. 7;[3] *Provided, however,* That the action to be taken thereunder by the Regional Administrator may be taken in like manner by the Director of the Office of Price Administration for the Territory of Hawaii.

SEC. 10. *Records and reports*—(a) *Records to be kept.* (1) Every person making sales at other than retail of the Commodities subject to this Maximum Price Regulation No. 373 shall, on and after the date any such commodity becomes subject to this regulation, keep for inspection by the Office of Price Administration, for a period of not less than one year, complete and accurate records of each purchase and each sale made by such person, showing the date thereof, the name and address of the buyer and seller, the direct cost thereof, the price paid or received, the markup charged and the quantity purchased or sold.

(b) *Prices to be marked and posted.* (1) On and after the date any commodity becomes subject to this Maximum Price Regulation No. 373, every person offering to sell at retail any such commodity, shall mark the maximum price of such commodity in a manner plainly visible to and understandable by, the purchasing public. The maximum prices may be marked on the commodities themselves or may be posted at the place in the establishment where the commodities are offered for sale, and may be posted by price lines if the selling price of each commodity is marked thereon. The maximum prices shall be indicated in the form "Ceiling Price $_____," or "Our Ceiling $_____."

(c) *Sales slips and receipts.* (1) Every seller at retail of the commodities subject to this Maximum Price Regulation No. 373, who has customarily given purchasers sales slips or receipts, shall continue to do so. (b) Persons who have evidence of any violation of this regulation or of any other regulation or order issued by the Office of Price Administration are urged to communicate with the nearest office of the Office of Price Administration.

(c) The registration and licensing provisions of sections 15 and 16 of the General Maximum Price Regulation for Hawaii are herein made applicable to every person selling, at wholesale or retail, any commodity for which a maximum price is now, or may hereafter, be established by this Maximum Price Regulation No. 373, or by any amendment thereto. The General Maximum Price Regulation for Hawaii in effect, therefore, provides that a license is necessary for persons to make wholesale or retail sales of commodities as defined and covered by this Maximum Price Regulation No. 373. A license is automatically granted to all such sellers making these sales. It is not necessary to apply specially for the license, but a registration may later be required. The Emergency Price Control Act of 1942, as amended, sets forth the circumstances under which licenses may be suspended. The license cannot, of course, be transferred.

SEC. 21. *Table VIII: Maximum prices for fresh fruits and fresh vegetables—*(a) *Definitions.* For the purposes of this Table VIII, the term:

(1) "Sale at retail" means a sale to an ultimate consumer other than an industrial or commercial user, except that a sale at retail shall not include any sale to the United States or public institution, or an agency of either.

(2) "Sale at wholesale" means a sale to any person other than the ultimate consumer and shall include sales to licensed retail stores, peddlers, hotels, restaurants, licensed boarding houses, the United States, public institutions, and all commercial and industrial users.

(3) "Special institutional sales" means sales to hotels, restaurants, licensed boarding houses, the United States and public institutions where, in connection with such sale, the seller opens the container, reconditions the commodity and absorbs shrinkage and spoilage.

(b) *Special provisions.* (1) Wholesale sales may be made by broken lots, that is a part of a bag, box or crate, but the aggregate price received from the sale of such parts may not exceed the wholesale ceiling for the entire bag, box or crate. For example, for sales made by the half box, quarter box, etc., the maximum price shall be computed by dividing the wholesale ceiling by two, four, etc. In the case of a sale to any buyer who does not have a gross income tax license, the seller may add one and one-quarter per cent to the wholesale ceiling.

(2) Special institutional sales, where the seller opens the container, reconditions the commodity and absorbs shrinkage and spoilage, may not be made at prices higher than those appearing herein under the caption "Special Institutional Maximum Prices." Whether sales shall be by the unopened crate or otherwise shall be at the option of the buyer.

(3) *Extra charges.* No charges may be made for cartage or any other service rendered, or cost incurred, in connection with the sale of the commodities covered by this Table VIII if such charges result in prices higher than the maximum prices established herein.

(c) *Maximum prices for sales in the Island of Oahu only of fresh vegetables imported from the mainland.* (1) Where the total price for the aggregate quantity of any commodity sold results in a fraction of a cent, such total price shall be reduced to the nearest lower cent if the fraction is less than one-half cent, and shall be increased to the nearest higher cent if the fraction is one-half cent or more.

(c) *Maximum prices for sales outside the Island of Oahu of compounded liquor manufactured in the Territory of Hawaii.* (1) There may be added to the prices to be charged to consumers as determined under paragraph (b) of this table, an amount equal to $.03 per bottle on quarts and ⅘ quarts, or $.01 per bottle on pints and ½ pints, for sales in the Territory of Hawaii outside the Island of Oahu. No transportation tax or other tax (except the 6% Territorial Tax) may be added.

(d) *Miscellaneous*—(1) *Taxes.* The prices contained in paragraphs (b) and (c) of this Table do not include the 6% Territorial Tax, which may be added, but they include all other taxes.

(2) Less than case prices to be charged retailers and dispensers should be proportional to the prices contained in paragraph (b) and (c) of this table for full cases. For this purpose, where fractions occur the next highest whole cent may be used. For example, the maximum price to be charged dispensers for a case of four one-gallon bottles of 90 proof gin is $31.37. Since this would produce a price of $7.84¼, the fraction may be raised to the next highest cent, and $7.85 charged. The price for two bottles, however, would be $15.69, and for three bottles, $23.53.

Note that the rule for handling fractions for purposes of determining less than case prices is not the same as the rule for handling fractions when using the conversion tables under paragraph (b).

(3) Selling prices to retailers and dispensers are f. o. b. consignor's warehouse, but the consignor may not add to such price an amount greater than the actual transportation charges actually paid by him. He may not add a charge for delivering in his own conveyances.

(2) Any additional equipment or accessories placed on the war bicycle prior to sale and not ordinarily a part of the equipment of such bicycle shall be added only at the option of the purchaser. The maximum prices for such additional items, which must be sold separately, are governed by the General Maximum Price Regulation for Hawaii.

(d) For the purposes of this table, the term "soft drinks" means flavored or unflavored non-alcholic beverages and waters in bottles or other closed containers, whether carbonated or not, but excluding milk drinks, fruit juices, vegetable juices, and combinations thereof where at least 85% by weight is pure fruit juice, vegetable juice, or a mixture thereof.

SEC. 38. *Table XXV: Maximum prices for honey.* (a) The maximum prices for sales of honey produced in the Territory of Hawaii shall be:

(1) *Packaged honey of U. S. #1 grade:*

	Wholesale (each)	Retail (each)
¾ pint size, glass jar (6 oz. net wt. or 4 fluid oz.)	$0.08	$0.10
½ pint size, glass jar (12 oz. net wt. or 8 fluid oz.)	.16	.20
⅔ pint size, glass jar (16 oz. net wt. or 12 fluid oz.)	.21	.26
1 pint size, glass jar (24 oz. net wt. or 16 fluid oz.)	.30	.38
1 quart size, glass jar (48 oz. net wt. or 32 fluid oz.)	.50	.65
1 gallon size, glass jar (192 oz. net wt. or 12 lbs. or 128 fluid oz.)	1.80	2.30
No. 10 tins (6 pounds net wt.)	1.35	1.73
60 lb. tins "individuals" (5 gals. fluid content)	8.70	11.14

(i) The maximum prices for honey sold in containers of a size not listed above shall be determined as follows: The price per fluid ounce or other applicable unit of honey in the nearest larger size listed above shall be computed, and that price multiplied by the number of fluid ounces or other appropriate units of content or weight in the container to be priced, and the result will be the maximum price. Prices at retail thus computed shall be adjusted to the nearest cent. For example: the maximum price for a glass jar containing 6 fluid ounces of honey would be determined as follows: the nearest larger size listed is the ½ pint size containing 8 fluid ounces. In such case, the price per fluid ounce at wholesale is $.02 and at retail $.025. These figures multiplied by 6 result in a maximum price of $.12 at wholesale and $.15 at retail.

(4) The maximum price for table mats of sizes other than those listed above shall be determined by multiplying the price per square inch of the appropriate weave listed above by the number of square inches in the mat to be priced. This will give the producer's maximum price. To determine the maximum wholesale price, multiply the producer's maximum by 1.2. To determine the maximum retail price, multiply the maximum wholesale price by 1.5. The maximum price will in each case be the result of such multiplication.

(5) Maximum prices for double mats shall be 20% more than the applicable price for a single mat of the same size and weave.

11. Section 1429.19 (h) (1) (ii) is amended to read as follows:

(ii) *Grade "B" poultry items.* All Grade "B" poultry items, except Grade "B" dressed duck items, shall be 1½ cents per pound less in price than the corresponding Grade "A" poultry items listed above. All Grade "B" dressed duck items shall be the same price as Grade "A" duck items.

12. Section 1429.19 (i) (3) is amended to read as follows:

(3) "Drawn poultry" means dressed poultry from which the head, shank, crop, entrails, and gall bladder have been wholly removed without contamination of the body cavity, the gizzard has been cleaned by removing the contents and lining, the cleaned gizzard and heart and liver then being included with the carcass. Dressed poultry not drawn as herein described shall be sold at the prices established for dressed poultry.

13. Section 1429.19 (i) (4) is amended to read as follows:

(4) "Quick-frozen eviscerated poultry" means dressed poultry the exterior of which has been singed, from which the head, shank, crop, windpipe, esophagus, entrails, gall bladder, lungs, kidneys and oil sac have been wholly removed under the supervision of a federal inspector present at all stages of evisceration, the giblets of which have been cleaned and replaced, and the carcass and giblets of which have been subjected to a cleansing process which makes them ready to cook, the whole then being individually wrapped or packaged in carcass, split, or dismembered forms, packed in cartons or boxes, and frozen at quick-freezing temperatures. Dressed poultry not eviscerated as herein described shall be sold at not more than the maximum prices established for drawn poultry.

14. Section 1429.20 is amended to read as follows:

§ 1429.20 *Application of maximum base prices.* The maximum base prices for poultry items established in § 1429.19 of this regulation apply to all persons purchasing or selling or delivering such poultry items as follows:

(a) The maximum base price for live poultry items shall be the maximum base price at the place where the seller parts with physical possession of such live poultry items. The weight of such live poultry items shall be determined at the time when the seller parts with physical possession.

EXAMPLE. A trucker purchases 100 live broilers from a producer; the trucker takes physical possession of the broilers at the producer's place of business which is in an unincorporated area, and loads the live broilers onto his truck. The maximum base price which the producer may charge and which the trucker may pay is the maximum base price established for the producer's place of business which is the same as that established for the city, town, village, or hamlet nearest such unincorporated area.

The same trucker hauls the live broilers to the county seat for sale at the local market. Here he has his broilers auctioned off to buyers from Pittsburgh, Cleveland, and Detroit. These buyers load the broilers onto their trucks immediately after the auction. The trucker's maximum base price is the maximum base price established for the local market.

A trucker, or farmer, or shipper receives a telephone call from a New York wholesaler ordering 10,000 pounds of fryers. The live fryers are loaded onto the seller's trucks and hauled to the nearest railroad station, where the birds are then loaded onto a fright car. The maximum base price for such a sale is the maximum base price established for the city, town, village, or hamlet in which the railroad freight station is located.

(b) The maximum base price for dressed poultry items shall be the maximum base price at the seller's shipping point in the following instances:

(1) All sales by "wholesalers" as hereinafter defined in § 1429.21, in quantities of less than 10,000 pounds to any type of buyer.

(2) All sales to the United States Government or any agency thereof by any type of seller.

(3) All sales by a producer or processing plant at retail to an ultimate consumer other than a commercial, institutional, industrial, or governmental user.

(c) In all other cases, the maximum base price for dressed poultry items shall be the maximum base price at the buyer's customary receiving point. All sales of dressed poultry, other than those specified in paragraph (b) immediately above, shall be made on the basis of delivery to the buyer's customary receiving point, and the maximum base prices established for those places where the seller's shipping points are located shall not be applicable in such sales.

(1) Where any person purchases any dressed poultry item at one place for shipment or reshipment to another place, his customary receiving point shall be the place where shipment ends and not the place where shipment begins.

(2) All f. o. b. prices for dressed poultry sales, other than those specified in paragraph (b) immediately above, shall be calculated in relationship to the maximum base prices at the buyer's customary receiving point. Where any person purchases or sells any dressed poultry item at one place for shipment to another place at a price f. o. b. the seller's shipping point, he shall calculate his maximum f. o. b. price as follows:

(i) He shall first determine the maximum base price for such poultry item at the place to which it will be shipped; and

(ii) He shall then subtract from such base price his "freight rate" from the place where shipment begins to the place where shipment ends, and the difference so obtained shall be his maximum selling f. o. b. price for such poultry item.

(3) Except as provided for in paragraph (b) of this section, where any person purchases any dressed poultry item at one place for shipment or reshipment to another place, and at the time of purchase does not know the exact location of the place to which shipment shall be made, he shall purchase on an open price basis until such time as he ascertains the location of the place to which shipment shall be made, and thereafter shall calculate his maximum purchase price as follows:

(i) He shall first determine the maximum base price for such poultry item at the place to which it will be shipped; and

(ii) He shall then subtract from such base price his "freight rate" from the place where shipment begins to the place where shipment ends, and the difference so obtained shall be his maximum purchase price for such poultry item.

Provided, That nothing in this subparagraph (3) shall prevent any purchaser from making part payment for such poultry item in an amount not to exceed 85 percent of the maximum base price for such poultry item at the seller's shipping point at any time before such purchaser ascertains the location of the place to which shipment shall be made.

(d) The following exceptions are provided to paragraph (c) of this section:

(1) When any person sells any turkey item to a purchaser who cans boned turkey meat for sale to the United States Government or any agency thereof, he may sell at his maximum base price f. o. b. his shipping point without subtracting his "freight rate" from the place where shipment begins to the place where shipment ends:

Provided, That:

(i) The turkey items sold must be destined exclusively for processing into canned boned turkey meat, all of which must be sold and delivered to the United States Government, or any agency thereof, and

(ii) At the time of purchase, the purchaser of such turkey items must file with the seller and with the seller's Regional or State OPA Office an affidavit certifying that such purchaser has completely exhausted his own stocks of roaster, fowl, and turkey items suitable for processing into canned boned turkey meat.

(2) For a period of 69 days, to and including the 30th day of June, 1943, any person in the State of Utah may sell and deliver any poultry item produced in the State of Utah to any "wholesaler", individual retail store, or ultimate consumer including commercial, industrial, institutional, or governmental users, located at any place in the States of Idaho, Montana, and Wyoming, at the seller's maximum base price f. o. b. his shipping point without subtracting his "freight rate" from the place where shipment begins to the place where shipment ends:

Provided, That:

(i) The poultry items sold must be destined exclusively for ultimate consumption at any place in the States of Idaho, Montana, and Wyoming.

(e) The maximum base prices for poultry items established in § 1429.19 of this regulation are the maximum base prices to which the specified permitted increases listed in § 1429.21 below may be added.

15. The text of § 1429.21 (a) is amended and item (1a) is added to Table B of § 1429.21 (a) to read as follows:

(a) *Permitted increases which may be added to maximum base prices.*—(1) *Permitted increase for transporting live poultry.* (i) Any person who transports live poultry items for a distance of more than 30 miles to any city, town, or village where such poultry items are destined for ultimate consumption, may sell or deliver such live poultry items to any "wholesaler", individual retail store, or any ultimate consumer, including commercial, industrial, institutional, or governmental users, located in such city, town, or village, at the maximum base price established for such city, town, or village in § 1429.19 (h) (1) Table A, of this Regulation, plus the following permitted increases in cents per pound:

Shortest distance in road miles or railroad miles from the place where transport of live poultry begins to place where such transport ends:	*Maximum permitted increase in cents per pound.*
Less than 30 miles	No increase.
30 to 50 miles	¾ cent.
50 to 100 miles	1 cent.
100 to 150 miles	1¼ cents.
150 to 200 miles	1½ cents.
200 to 250 miles	1¾ cents.
250 to 300 miles	2 cents.
300 miles and over	2 cents.

(ii) Only one permitted increase for transporting live poultry items may be added to the maximum base price for such live poultry items at any city, town, or village where such live poultry items are destined for ultimate consumption. Permitted increases for transporting live poultry items may not be added cumulatively.

(iii) *Examples.* (a) A Delaware producer hauls a truckload of live broilers 35 miles to Wilmington, where he sells the entire load to a trucker who will haul them alive to New York. Question: May the producer add the permitted increase of ¾ cent per pound to the maximum base price for live broilers in Wilmington?

Answer: No, because Wilmington is not the city where the broilers are destined for ultimate consumption. Furthermore, the trucker does not fall within the class of buyers who may be charged with the permitted increase.

(b) A trucker hauls a truckload of live poultry 60 miles to a country dressing plant. He offers this truckload of live poultry for sale at the maximum base price at the country dressing plant plus 1 cent per pound for hauling. Question: May the trucker charge the 1 cent permitted increase?

Answer: No, because the country dressing plant is not the place where the poultry is destined for ultimate consumption. Furthermore, the country dressing plant does not fall within the class of buyers who may be charged with the permitted increase.

(c) A trucker hauls a truckload of live poultry 500 miles to New York City. He sells this truckload to a New York City "wholesaler" who resells such live poultry to New York City retailers.

Question: May the trucker add the 2 cent permitted increase to his maximum base price for the live poultry in New York City?

Answer: Yes, because he is selling the live poultry in the city where the poultry is destined for ultimate consumption, and because he is selling to a "wholesaler".

(d) A trucker hauls a truckload of live poultry 500 miles to Chicago, Illinois. He sells this truckload to a Chicago processing plant which does not qualify as a "wholesaler" under the definition of § 1429.21 (b) (5) of this regulation. This processing plant will convert the live poultry into dressed birds, some of which it will sell for ultimate consumption in Chicago, and most of which it will export out of the city. Question: May the trucker add the 2 cent permitted increase to his maximum base price for the live poultry in Chicago?

Answer: No, because he is selling to a processing plant which does not fall within the class of buyers who may be charged with the permitted increase, and because Chicago is not the city where most of the live poultry will be ultimately consumed.

(e) A trucker hauls a truckload of live poultry 500 miles to Chicago, Illinois. He sells this truckload to a Chicago "wholesaler" who will convert the live poultry into dressed birds, most of which he will sell for ultimate consumption in Chicago, and some of which he will export out of the city. Question: May the trucker add the 2 cent permitted increase to his maximum base price for the live poultry in Chicago?

Answer: Yes, because he is selling to a "wholesaler" who is processing most of the live poultry for ultimate consumption in Chicago. When any live poultry items are purchased by a processing plant which also qualifies as a "wholesaler" it will be assumed that such live poultry items are being purchased for ultimate consumption in the city where the "wholesaler" is located.

(f) A trucker hauls a truckload of live poultry 500 miles to Chicago, Illinois. He sells this truckload to a Chicago "wholesaler" who will convert all the live poultry into dressed birds to be sold for ultimate consumption in Chicago. The Chicago "wholesaler" pays the trucker the maximum base price for the live poultry in Chicago plus the 2 cent permitted increase for hauling. Question: May the Chicago "wholesaler" add the 2 cent permitted increase paid out by him to the trucker, to the maximum base price for dressed poultry items in Chicago, when he sells such dressed poultry items?

Answer: No. The permitted increase for transporting live poultry items may never be added to the maximum base price for dressed poultry items, notwithstanding the fact that the person selling such dressed poultry items may have originally paid such permitted increase to a transporter of live poultry.

(2) *Other permitted increases to maximum base prices.* (i) Any person who makes any one of the following described sales of poultry items may add the increase indicated below for such sale to the maximum base price indicated below for such sale in order to determine his maximum selling price. No person may add more than one permitted increase to any maximum base price.

TABLE B—MAXIMUM PERMITTED INCREASES FOR SALES OF POULTRY ITEMS

Seller and type of sale made	Buyer	Quantity and form of sale	Item sold	Base price to which increase is added	Maximum increase in cents per pound for "wholesaler" and "hotel supply house" only

					Cts.	*Cts.*	*Cts.*
(1a) All "wholesalers" who buy live poultry items, and sell such live poultry items, and who have paid out a permitted increase for transporting such live poultry items to any live poultry transporter.	All "wholesalers" individual retail stores, or commercial, industrial, or governmental users located in the city, town, or village, where the seller maintains his place of business.	Less than 10,000 lbs.	Any live poultry item. 16. Section 1429.21 (b) (5) (iv) is amended to read as follows:

(iv) He must customarily sell or distribute at least 75 percent of his dollar volume of poultry items, exclusive of sales to the United States Government or agency thereof, for ultimate consumption within a radius of 100 miles from his place of business: *Provided*, That: If he maintains his business establishment at any place in the States of Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Idaho, Nevada, California, Oregon, and Washington, he must customarily sell or distribute at least 75 percent of his dollar volume of poultry items, exclusive of sales to the United States Government or agency thereof, for ultimate consumption within a radius of 200 miles from his place of business.

17. Section 1429.23 is added to read as follows:

§ 1429.23 *Relief from extreme hardship in certain cases.* (a) Any person who purchased for resale any dressed or quick-frozen eviscerated turkey item during the period, November 9, 1942 to

PART 206—FISHING AND HUNTING REGULATIONS

FISHING IN CHESAPEAKE BAY, MD. AND VA.

Pursuant to the provisions of section 10 of the River and Harbor Act approved March 3, 1899 (30 Stat. 1151; 33 U.S.C. 403), the regulations governing the placing and maintenance of fishing structures in Chesapeake Bay and its tributary waters are amended to read as follows:

§ 206.50 *Chesapeake Bay, Md. and Va., and its tributary waters; fishing.* Until further notice all fishermen, oystermen and crabbers who desire to operate in Chesapeake Bay, Maryland and Virginia, and navigable tributaries thereto,[1] are hereby authorized by the Secretary of War to construct and maintain fishing structures, to mark oyster bottoms and to locate and mark crab pots subject to the following regulations.

(a) *Supervision.* General supervision of the location, construction and manner of maintenance of all fishing structures shall be exercised by the United States District Engineer in charge of the locality in which the structure is placed. The term "fishing structure" shall include lines of fish net, settings, stakes, leads, traps, pounds, gill or fyke nets, heads, hedging, oyster bottom, crab pot markers, and similar appurtenances. The types of structures permitted shall conform to the laws of the respective States of Maryland and Virginia.

(b) *Limits.* The approved limits of the areas within which fishing structures may be placed are shown on maps entitled, "Limits for Placing Fishing Structures" which form a part of these regulations. These maps may be examined or purchased in the offices of the respective United States District Engineers. Regular aids to navigation are used where possible to mark the limits of the areas, and special fishing structure buoys have been established where additional markers are necessary. These buoys are marked as follows:

For the Baltimore District, B_1, B_2, B_3, B_4, etc.

For the Washington District, W_1, W_2, W_3, W_4, etc.

For the Norfolk District, N_1, N_2, N_3, N_4, etc.

(c) *Restrictions.* (1) The approach to the mouth of any tributary or to the mouth of any navigable branch of any tributary shall be left free and unobstructed by fishing structures. Where limiting lines are not shown on the respective maps, the free and unobstructed approach shall lie along the channel usually followed by boats and shall have a width of not less than one-third of the width of the mouth of the tributary or branch.

(2) Within the tributaries where limiting lines are not shown on maps a channel in deep water, of at least one-third of the total width of the waterway at the locality, shall be left free and unobstructed for the use of boats.

(3) No fishing structures shall be placed within 500 feet of any buoy or other aid to navigation (fishing structure buoys excepted) placed or maintained by the United States Coast Guard, or within 200 feet of the edges of channels in Northeast River and Elk River, Maryland, which are marked by established aids to navigation.

(4) Nothing in these regulations shall supersede any danger zone regulations prescribed by the Secretary of War for these waters. (See Part 204, Chapter II of this Title—Rules and Regulations Relating to the Navigable Waters of the United States.) Copies of these regulations can be secured from the United States District Engineer in charge of the locality in question or from the Commanding Officer of the establishment concerned.

(d) *Requirements.* (1) No single fishing structure shall have a length greater than that prescribed by the laws of the respective States of Maryland and Virginia. Fishing structures shall be construed as being in the same line only when the distance between adjacent structures, measured along a line generally parallel to the structures, is at least 200 feet; and the distance between the same structures, measured along a line generally perpendicular to the structures, is not more than 200 feet. The required openings between adjacent structures shall be maintained clear and unobstructed. The distance between adjacent lines of fishing structures shall be that prescribed by the laws of the respective States of Maryland and Virginia. In localities not covered by the laws of these States, the distance between lines of fishing structures shall be at least 400 yards. A clear fairway at least 200 feet wide shall be maintained between navigable channels and established boat landings. All stakes shall project at least 3 feet above the surface of the water at all ordinary high stages of the tide. Fyke and other submerged fishing structures shall be marked by stakes set at intervals not greater than 50 feet. Marker stakes left in place between fishing seasons for subsequent reestablishment of the fishing structure shall project at least 8 feet above the surface of the water at all ordinary high stages of tide and be marked as indicated in subparagraphs (2) and (3) of this paragraph. Stakes not in compliance with the above conditions shall be spliced or withdrawn.

(2) Both ends of each fishing structure shall be marked plainly by a bush or other suitable and readily discernible day mark.

(2) The name and address of the owner of each fishing structure shall be displayed in black letter not less than 2 inches in height, upon a white background, from a stake at the outer end of the structure, at such height and in such position that it may be easily read. The identification mark must be displayed from the setting of the first stake until removal of the last one.

(4) Fishing structures, with the exception of oyster bottom leaseholds and crab pot markers, shall be lighted between sunset and sunrise, by and at the expense of the owner, for the safety of navigation. A white light shall be displayed at the outer end of the structure. The light shall have a capacity to burn for at least eight days unattended and be visible in clear night weather at least one mile. The light shall be securely placed on piles or stakes at an elevation of at least 8 feet above mean low water and be visible from all points of the compass and from the air. It shall be subject to inspection and approval of the said District Engineer before use, and at any time during use, and the owner shall make provision, by watchman or otherwise, for its proper attendance, so that it shall be in effective condition and properly lighted at all times between sunset and sunrise. In case of removal of the fishing structure, the light prescribed above shall be maintained until the removal of the last pile or stake.

There shall be installed and maintained on the structure by and at the expense of the owner, such additional lights and signals, if any, as may be prescribed by the United States Coast Guard.

Fishing structures from which the nets have been temporarily removed will not be considered as abandoned if the structures are otherwise in a state of good repair and are provided with the necessary lights, name and address plate, and day markers.

(5) Crab pot stake markers shall be located shoreward of approved fish stake limiting lines and where no limit lines are prescribed shall conform to the requirements of paragraph (c) of this section. The diameter of the stake shall not exceed 2 inches at the water surface, shall project at least 6 feet above the surface of the water at all ordinary high stages of the tide and be marked with the name and adress of the owner and a day marker consisting of a bush or other suitable and readily discernible object.

(6) Oyster ground or bottom leaseholds stakes shall be painted with alternate horizontal stripes red and white bands each 10 inches wide. At least two

[1] Map filed as part of the original document.

each of the red and white bands shall project above the surface of the water at all ordinary high stages of the tide. No stakes shall be placed channelward of approved fish stake limiting lines or in a fairway.

(7) The owner of a fishing structure shall be responsible for properly locating, constructing, and repairing such structure and for maintaining such lights and markers as required in these regulations. Structures shall be considered as abandoned at such time as any or all of these requirements are not fully complied with and the owner or owners shall promptly remove all stakes from an improperly located and/or abandoned structure, or be subject to prosecution. Improperly located and/or abandoned fishing structures may be summarily removed, sold, or otherwise disposed of by the United States District Engineer charged with the general supervision of the locality.

(e) *General restrictions.* (1) Nothing herein provided shall be interpreted as setting aside exclusively for fisheries any area of navigable water.

(2) It is to be understood that these regulations do not give any property rights either in real estate or material, or any exclusive privileges and do not authorize any injury to private property or invasion of private rights, or any infringement of Federal, State, or local law or regulations, nor do they obviate the necessity of obtaining State assent to the work authorized.

(3) If at any time in the future it shall be made apparent to the Secretary of War that any fishing structure herein authorized causes unreasonable obstruction to the free navigation of said waters, the owner will be required, upon due notice from the Secretary of War, to remove or alter the same so as to render navigation through said waters reasonably free, easy, and unobstructed.

(f) *Damage or injury.* That the United States shall in no case be liable for any damage or injury to the structure or work herein authorized which may be caused by or result from future operations undertaken by the Government for the conservation or improvement of navigation, or for other purposes, and no claim or right to compensation shall accrue from any such damage. R. 133), approved March 24, 1943, officers and members of crews (hereinafter referred to as "seamen") employed on United States or foreign flag vessels owned by or under bareboat charter to the War Shipping Administration and operated by an Agent under a General Agency form of Service Agreement, with respect to the claims hereinafter specifically enumerated, are given all of the rights, benefits, exemptions, privileges, and liabilities, under law applicable to citizens of the United States employed as seamen on American flag vessels privately owned and operated. Under such Act, court action (1) may not be instituted to enforce such a claim until it shall have been administratively disallowed, in whole or in part, and (2) must be brought pursuant to the Suits in Admiralty Act.

§ 304.21 *Claims which must be submitted for allowance prior to suit.* Claims, unless covered by the Social Security Act or laws administered by the Public Health Service, must be submitted for allowance prior to instituting court action thereon in cases of death, injury, illness, maintenance and cure, loss of effects, detention, repatriation, or claims arising therefrom; in cases relating to the collection of wages and bonuses and the making of allotments, when made against the United States of America, the War Shipping Administration, the Administrator thereof, or any other person for whom the United States of America or War Shipping Administration is responsible; in cases arising under the War Shipping Administration Crew Life and Injury Policy, the Second Seamen's War Risk Policy, and those arising under other Decisions of the Maritime War Emergency Board, in so far as such claims are made against the War Shipping Administration, provided they are made by or on behalf of seamen who, at the time such claims arose, were employees of the United States through the War Shipping Administration, or by or on behalf of their surviving dependents or beneficiaries or legal representatives.

(a) Arose on or after March 24, 1943; or

(b) Accrued on or after October 1, 1941, and prior to March 24, 1943, if the seaman or his surviving dependent or beneficiary or legal representative elects, as provided by §§ 304.28 and 304.29, to enforce such claim in the same manner as it would be enforced if it arose after the date of the enactment of Public Law 17—78th Congress.

§ 304.23 *Court action, condition precedent.* No seaman or his surviving dependent or beneficiary or legal representative, having a claim under the provisions of §§ 304.21 and 304.22, shall commence a court action for the enforcement of such claim, unless such claim has been filed by him or on his behalf or by or on behalf of his surviving dependent or beneficiary or legal representative as provided in §§ 304.24 and 304.25 and has been administratively disallowed by the person or agency with whom it was so filed.

§ 304.24 *Claim, contents.* The claim need not follow any particular form, but it shall be in writing. It shall contain such particulars as are reasonably necessary as a basis for the allowance or administrative disallowance of such claim and should include, with respect to the seaman in question, his home address, date of birth, place of birth, certificate of identification number, as well as all the facts and circumstances leading up to and surrounding the happening of the event out of which it is alleged the claim arose.

§ 304.26 *Claim, when presumed administratively disallowed.* If the person or agency with whom the claim is filed, in accordance with the directions contained herein, fails to notify the claimant in writing of a determination upon such claim, within sixty days following the date of filing thereof, the claim shall be presumed to have been administratively disallowed, and the claimant shall be entitled to enforce his claim by court action.

§ 304.27 *Administrative disallowance, notice of.* In those cases in which the person or agency to whom the claim has been referred, determines that it shall be administratively disallowed, in whole or in part, such person or agency shall mail to the last known address of the claimant, or deliver or cause to be delivered personally to the latter or his agent, a letter in substantially the following form:

that such claim has been administratively disallowed, in accordance with the rules and regulations prescribed by the Administrator under the provisions of section 1 (a) of Public Law 17—78th Congress (H. R. 133).

---

§ 304.28 *Election of remedies.* A seaman or his surviving dependent or beneficiary or legal representative, having a claim specified in §§ 304.21 and 304.22 (b) may enforce such claim in the same manner as if Public Law 17—78th Congress (H. R. 133) had been in effect at the time the same arose, upon his election so to do as provided in § 304.29.

§ 304.29 *Election, what constitutes.* A seaman, or his surviving dependent or beneficiary or legal representative shall be deemed to have made an election as provided in § 304.28 if:

[Administrative Exception Order 4 Under RO 17]

DALE SYSTEM, INCORPORATED

AUTHORIZATION TO RECEIVE RATION CREDIT

Administrative Exception Order No. 4 under Ration Order 17—Shoes.

Dale System, Incorporated is a business enterprise engaged in rendering services to clients, consisting principally of owners of retail stores, to test the efficiency and honesty of the clients' sales clerks. The method used involves the making of a complete purchase of an article and observing the actions of the sales clerk in the course of the transaction. The article purchased is later returned to the owner of the store for refund, at the same or another establishment of the client, in a way to prevent revealing to the client's employees the identity of the individual making the test. The Dale System, Incorporated requests authority to secure ration currency to enable it to continue to make test purchases of shoes in the course of its business.

The granting of the request in this and all similar cases would not defeat or impair the effectiveness of the policy of the Ration Order because it would not increase the quantity of shoes used.

It is hereby ordered, That Dale System, Incorporated, 1776 Broadway, New York, New York, is authorized to receive a ration credit or a supply of ration currency from the Office of Price Administration, Washington, D. C., which it may use as a revolving fund to enable its employees to make purchases of shoes from its clients in the manner otherwise permitted by Ration Order 17. As soon as practicable after making a purchase of shoes, it shall return them unused to the client from whom they were acquired and receive special shoe stamps or a ration check for the number of pairs returned. To facilitate its handling of ration checks received from its clients, Dale System, Incorporated is authorized to open a shoe ration bank account or accounts in the manner otherwise permitted by General Ration Order 3A, and to obtain further supplies of special shoe stamps from its board in exchange for a certified ration check drawn on its account to the account of the Office of Price Administration. The Dale System, Incorporated shall keep records of the shoes acquired hereunder and the return of the shoes and shall make such reports as the Office of Price Administration may require. The amount of the ration credit or ration currency and the number and location of the shoe ration bank accounts shall be determined by the Director of the Miscellaneous Products Rationing Division, Office of Price Administration, Washington, D. C.

It is hereby further ordered, That any other persons similarly situated may be authorized on similar conditions, to receive a ration credit or ration currency to be used to make test purchases of shoes. Such authority may be granted in writing by the Director of the Miscellaneous Products Rationing Division, Office of Price Administration, Washington, D. C.

This order shall become effective April 24, 1943.

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 19—CLASSIFICATION OF POSITIONS

CLASSIFICATION OF FIELD POSITIONS

Pursuant to the authority contained in War Manpower Commission Directive No. XII (7 F.R. 7650), the Commission is empowered to make fact-finding surveys of the classification in the field service of executive departments and agencies of civilian positions which are subject to the schedules of grades and salaries prescribed by the Classification Act of 1923 (42 Stat. 1488), as amended. If, upon completion of such a survey, the Commission finds that the classifications are such as to result in (a) material interference with the effective administration of Executive Order No. 9243 (7 F.R. 7213) and War Manpower Commission Directive No. X (7 F.R. 7298), (b) undesirable competitior for employees among such departments or agencies, or (c) an impediment to the effective utilization of the Nation's manpower in the war effort, the Commission is required by the Directive to prepare standards for the classification of such positions and to promulgate such standards to the heads of the executive departments and agencies. Pursuant to this authority, the following regulations are prescribed as Part 19 of Title 5, Chapter I, Code of Federal Regulations:

DEFINITIONS OF TERMS

§ 19.1 *Definitions.* As used in these regulations, the following terms, words, and phrases shall be construed as follows:

(a) "Commission" means the U. S. Civil Service Commission.

(b) A "position" is a specific civilian office or employment, whether occupied or vacant, consisting of a group of all the current duties and responsibilities, assigned or delegated by competent authority and requiring the full-time or part-time employment of one person.

(c) A "class of positions" is a group of all individual positions that are sufficiently alike in duties, responsibilities, and qualification requirements of the work to warrant like treatment in carrying out the usual personnel processes, such as fixing pay, testing, selections, transfer, and promotion.

(d) A "series" or "series of classes" consists of one or more classes of posi-

tions similar as to specialized line of work but differing in difficulty or responsibility of work, and therefore in grade and salary range.

(e) "Grade" means a zone of difficulty and responsibility of work under the Classification Act of 1923, as amended, including one or more positions for which approximately the same basic qualifications and compensation are prescribed, the distinction between grades being based upon differences in the importance, difficulty, responsibility and value of the work.

(f) "Allocation" means the classification of a position in terms of its appropriate service, grade, and class, under the provisions of the Classification Act of 1923, as amended, and in accordance with standards promulgated under the provisions of said Directive No. XII.

(g) A "class specification" is a form of written allocation standard consisting of a formal statement of the duties and responsibilities of the positions in one class as distinguished from other classes, illustrated by examples of work performed (typical tasks or typical positions in the class).

ALLOCATION OF POSITIONS AND REPORTS TO COMMISSION

§ 19.2 *Date of allocation and principles to be followed.* Allocation standards for classes of positions surveyed under the provisions of War Manpower Commission Directive No. XII will be promulgated through Commission departmental circulars. As soon as possible after such promulgation, the heads of the departments and agencies affected shall classify, in accordance with the following basic principles, all positions of the classes covered by said standards:

(a) The allocation of a given position to a class shall be based upon the duties actually performed in the position, and the responsibilities, supervisory or otherwise, actually discharged therein.

(b) A position belonging in any series covered by specifications, but not specifically described by such specifications, shall be allocated to that class in the series to which it is most nearly comparable in duties and responsibilities.

(c) Allocations shall not be based on any extraneous factor not covered in the specification, such as geographic location, isolation, or hazard beyond that normally encountered in the occupation. The fact that equipment is paid for by the employee or is furnished to the employee by the Government shall have no bearing on the allocation of the position.

(d) The qualifications—as to education, experience, knowledge, or ability—which the person now holding the position may happen to possess or lack shall not be taken as criteria for allocation purposes.

(e) Under no circumstances shall the allocation of a given position be made to depend upon the civil service status or the classification grade of the present incumbent.

(f) Neither the existing salary of the position nor the amount to which it is desired to adjust the existing salary shall be considered in determining the class to which a given position belongs.

§ 19.3 *Reports.* After the allocations have been effected, each department and agency concerned shall report to the Commission (Attention, Personnel Classification Division), for each field station or establishment having positions covered by the allocation standards:

(a) Summary showing the number of employees allocated, as a result of the application of the standards, to each class described in the standards.

(b) A summary showing the number of such employees in each of the grades to which allocated prior to the making of the adjustments required by the application of the standards.

(c) The names, the present grades and salaries, and the proposed grades, classes, and salaries of any employees facing reductions in compensation to be made, at the termination of the appeal period hereinafter described, as a result of the application of the standards. If there are no such cases, that fact is to be reported.

§ 19.4 *Information regarding duties of individual positions.* At all times when the Commission is carrying out its responsibilities under said Directive No. XII, the departments and agencies affected shall make available to the Commission's representatives information regarding the duties, responsibilities, and allocations of individual positions covered by any fact-finding survey so made or by any standards so promulgated.

CASES INVOLVING REDUCTIONS IN PAY

§ 19.5 *Action suspended when reductions in pay involved; length of appeal period.* An allocation of a field position made in accordance with standards promulgated under War Manpower Commission Directive No. XII which would result in a pay reduction, if put into effect in accordance with existing laws and regulations, shall be suspended until the expiration of the time limit for an appeal or until a decision has been rendered upon the filing of objections as hereinafter provided. The time limit for the filing of such an appeal shall be 30 days from the date of notification to the employee, as hereinafter provided.

§ 19.6 *Notice to employees of pending reductions.* When, as a result of grade and salary adjustments required by the application of such standards, the existing salary of the incumbent of any position must be reduced, the department or agency involved shall notify the employee (a) of the prospective reduction in pay and the reason therefor; (b) that action is being suspended for 30 days to give him a fair opportunity to present his objections to the proposed reduction; (c) that during this 30-day period he has the right to present his written objections to the Commission, through the department or agency, if he so desires; (d) of the name and address of the official in the department or agency to whom such appeal should be directed; and (e) where he may have access to copies of the allocation standards.

§ 19.7 *Filing of objections.* A statement of objections to an allocation which if effected would result in a pay decrease, shall be made in writing and directed to the official of the department or agency indicated in the notice of proposed reduction. Such a statement shall contain the name, mailing address, and present classification grade and salary of the employee filing objections, the grade to which his position has been allocated under the standards and the salary to which reduction is proposed, an accurate and complete description of the duties performed and responsibilities exercised, the name, title, and grade of his immediate supervisor, and such collateral information and objections as he may care to present.

§ 19.8 *Effect on reductions where no objections filed.* If at the expiration of 30 days no appeal has been filed, the allocation and salary reduction proposed by the department or agency shall be put into effect.

§ 19.9 *Consideration of objections by department.* A responsible officer in the department or agency involved, and preferably in the field establishment where the employee is located, shall, within a period of 20 days after receipt of the appeal, consider the written objections of the employee, particularly with a view to re-examining the application of the standards to the duties and responsibilities currently performed by the employee. If in his judgment the facts so warrant, he shall readjust the allocation of the position involved in accordance with the standards. If in his judgment the facts do not warrant a readjustment in allocation, he shall prepare appropriate comments and recommendations as to action to be taken upon the case, and shall submit it promptly to the Commission (Attention, Personnel Classification Division), in Washington, D. C.

§ 19.10 *Consideration and decision by the Commission.* The Commission will review all cases where adverse action has been taken by the department or agency on the appeals of field employees from pay reductions resulting from application of allocation standards promulgated under Directive No. XII. The Commission will consider each case, will obtain any additional information it deems necessary, will make a decision thereon, and will notify the department or agency and the appellant of the action taken.

§ 19.11 *Effect of decisions.* The department or agency shall make such changes in the allocation of the employee's position as are necessitated by the Commission's decision on the appeal.

By the United States Civil Service Commission.

[SEAL] H. B. MITCHELL,
President.

TITLE 7—AGRICULTURE

Chapter X—Food Production Administration

[FPO 10]

PART 1206—FERTILIZER

CHEMICAL FERTILIZER IN PUERTO RICO

Pursuant to Executive Order No. 9280 (7 F.R. 10179), dated December 5, 1942, and Executive Order No. 9322 (8 F.R. 3807) dated March 26, 1943, and in order to assure an adequate production of food crops and sugarcane in Puerto Rico to meet war and civilian needs, *It is hereby ordered*, That:

§ 1206.501 *Chemical Fertilizer in Puerto Rico*—(a) *Definitions.* For the purposes of this order:

(1) "Chemical fertilizer" means any material used as a plant food containing one or more of the following: nitrogen, phosphorous, or potassium, excluding, however, animal manures and animal, fish, and plant residues, unless mixed with a chemical fertilizer.

(2) "Food crop" means any crop, other than sugarcane, grown for human or animal consumption or use.

(3) "Fertilizer manufacturer" means any person who manufactures or mixes chemical fertilizer.

(4) "Dealer" means any person, other than a fertilizer manufacturer, who purchases or has purchased chemical fertilizer for resale.

(5) "Agent" means any person, other than a fertilizer manufacturer, who receives or has received chemical fertilizer on a consignment basis for resale.

(6) "Person" means any individual, partnership, corporation, association, or any other organized group of "persons", and shall include any agent, agency, or any "person" acting for or on behalf of any of the foregoing. The term "person" shall also include the United States or any agency thereof, and the Government of Puerto Rico or any agency thereof.

(7) "War Board" or "Board" means the United States Department of Agriculture War Board for Puerto Rico.

(8) "Director" means the Director of Food Production, or, in his absence, the Acting Director of Food Production.

(b) *Effective period of order.* Unless sooner revoked or superseded, or unless extended by appropriate order, this order shall be in force and effect from its issuance through January 31, 1944, but amendments may be made from time to time: *Provided*, That nothing in this paragraph (b) shall be deemed to limit the record keeping requirement of paragraph (c) hereof.

(c) *General administration.* (1) This order shall be administered by the War Board, which shall be responsible to and subject to the general supervision of the Director. In administering this order, the War Board may utilize the facilities and personnel of any agency of the United States Department of Agriculture represented on the War Board to the extent necessary to carry out the purposes of this order, but consistent with the needs and requirements of such agencies in discharging their regular functions. The War Board may delegate any of the

(2) No member of the War Board and no officer or employee of the United States Department of Agriculture to whom the War Board may delegate any duty or function under this order shall take part in any action which involves or affects himself, any member of his immediate family or other close relatives, or his landlord, tenant, or associate.

(d) *Allocation of chemical fertilizer materials.* It shall be the duty of the War Board to encourage the use of available chemical fertilizer on food crops so as to obtain the greatest practicable amount of food production in Puerto Rico. To this end the Board shall require fertilizer manufacturers to set apart, from existing stocks, such quantities of fertilizer materials as the Board determines should be made available for use on food crops, but not less than enough of such fertilizer materials to mix 10,000 tons of chemical fertilizer shall be so required to be set apart. This requirement shall be made before the Board may authorize delivery of any chemical fertilizer for use on sugarcane. From time to time, as additional supplies of fertilizer materials become available in Puerto Rico, the Board shall require fertilizer manufacturers to set apart such quantities of fertilizer materials as the Board determines should be made available for use on food crops in order to maintain, as nearly as possible, an adequate supply of such materials for such purpose. Fertilizer materials not required to be set apart for use on food crops may be made available for use on sugarcane. The War Board shall also endeavor to see that shipments to Puerto Rico of sufficient quantities of fertilizer materials for use on both food crops and sugarcane are arranged through the proper authorities, taking into account the shipping space allocated monthly for such purpose.

(e) *Manufacture of chemical fertilizer.* From time to time, the War Board shall prescribe a formula or formulae for the mixing of chemical fertilizer suitable for use on food crops and sugarcane, taking into account the supply of fertilizer materials available or expected to be available in Puerto Rico; and no manufacturer shall mix chemical fertilizer except in conformity with a formula prescribed by the Board. (Unless otherwise specified by the Board, nitrogen prescribed in any formula will mean nitrogen (N) expressed in terms of ammonia (NH_3).)

(f) *Restrictions on delivery and use of chemical fertilizer.* (1) No fertilizer manufacturer, dealer, agent or other person shall deliver to any person, and no person shall accept for use any chemical fertilizer of a formula not prescribed by the War Board pursuant to paragraph (e) hereof. This restriction shall not apply, however, to the delivery of any mixed chemical fertilizer on hand on the effective date of this order, but the delivery of such mixed chemical fertilizer shall be only for such purpose and for use on such crops as may be approved by the Board.

(2) No fertilizer manufacturer, dealer, agent or other person shall deliver to any person, and no person shall accept, for use any chemical fertilizer except as authorized by the War Board by means of a purchase permit or a ration card issued pursuant to this order.

(g) *Directions.* (1) Each fertilizer manufacturer shall comply with such directions as may be issued from time to time by the War Board with respect to the quantities, grades, and kinds of mixed fertilizer to be manufactured and with respect to the use or delivery of any fertilizer materials including nitrogen-bearing materials.

(2) Each fertilizer manufacturer, dealer, agent or other person to whom this order applies shall comply with such directions as may be issued from time to time by the War Board with respect to the delivery and use of chemical fertilizers.

(h) *Requirements of fertilizer users.* (1) The War Board shall establish the basis or method for determining the requirements of fertilizer users. This shall be established by taking into account the supply of fertilizer materials available or expected to be available in Puerto Rico and the need to obtain the greatest practicable amount of food production in Puerto Rico. Such basis or method shall be uniformly applicable in determining the requirements of all persons growing the same crops or crops, and, so far as practicable, shall apply throughout the growing seasons during which this order is effective: *Provided, however,* That with respect to sugarcane, no person's requirements for chemical fertilizer shall exceed, in a basic formula of 10–6–9 or its nitrogen equivalent in any other formula prescribed by the Board, 50 percent by weight of the average amount per acre of chemical fertilizer used by such person during the period January 1, 1940, to April 1, 1941, irrespective of the formula of the chemical fertilizer used during such period, multiplied by his acreage to be cultivated for the 1943–1944 harvest. The average amount per acre of chemical fertilizer used by any person for sugarcane during the period January 1, 1940, to April 1, 1941, shall be ascertained from the Agricultural Adjustment Agency records: *Provided, further,* That with respect to sugarcane, in the case of (1) persons who planted or cultivated no sugarcane during the period January 1, 1940, to April 1, 1941, (2) persons who planted or cultivated sugarcane during such period but used no chemical fertilizer, and (3) other persons for whom the Agricultural Adjustment Agency has no record of use of chemical fertilizer during such period, the requirements of such persons shall not exceed 125 pounds of chemical fertilizer per acre cultivated for the 1943–1944 harvest in a basic formula of 10–6–9 or its nitrogen equivalent in any other formula prescribed by the Board. As used in this paragraph (h) (1), "nitrogen" means nitrogen (N) expressed in terms of ammonia (NH_3).

(2) No person shall be authorized to obtain chemical fertilizer by a purchase permit or a ration card in excess of his requirement as determined under paragraph (h) (1) hereof.

(3) The War Board will require applicants for ration cards for chemical fertilizer for use on sugarcane to take an additional amount of fertilizer for use on food crops, in accordance with the existing procedure of the War Board. No ration card for chemical fertilizer for use on sugarcane shall be issued to any person, unless such person agrees to take and use such additional amount of fertilizer for use on food crops.

(i) *Application for purchase permits and ration cards.* (1) Before obtaining any chemical fertilizer from any fertilizer manufacturer, dealer, or agent, or any other person, any farmer who operates a farm as owner or tenant shall first apply to the War Board in writing for a purchase permit or ration card entitling him to obtain such fertilizer. If the fertilizer applied for is for food crops only, the application shall be for a purchase permit; if it is for sugarcane and food crops, the application shall be for a ration card. No more than one person may apply for a ration card or a purchase permit for use with respect to the same land. Such applications shall be on forms to be prescribed by the War Board, and such forms shall be made available at places convenient to farmers.

(2) In making an application for a ration card, a sugarcane grower shall agree to use the fertilizer obtained by such card only for the purposes indicated thereon by the War Board, and shall also agree to carry out the requirements of the farming practice determination applicable to the 1943–1944 crop of sugarcane issued pursuant to the Sugar Act of 1937. Each sugarcane grower shall state in his application, in addition to such other matters as the War Board may deem appropriate for the purposes of this order, the following:

(i) The number of acres of sugarcane growing on his farm as of January 31, 1943, showing the acreage of such sugarcane planted in 1941 for harvest in 1943, planted in 1942 for harvest in 1944, planted in 1942 for harvest in 1943, and cultivated in 1942 for harvest in 1943.

(ii) The acreage of sugarcane which he expects to cultivate for the grinding season 1943–1944.

(iii) The number of tons of chemical fertilizer (showing its formula), which the applicant has on hand, or has applied since July 1, 1942, to his acreage in sugarcane for harvest in 1944, but not including fertilizer previously allocated by the War Board for use on food crops.

(3) In making an application for a purchase permit, a farmer shall agree to use the fertilizer obtained by such permit only for the purposes indicated thereon by the War Board. Each farmer applying for a purchase permit for chemical fertilizer for use on food crops only shall state in his application, in addition to such other matters as the War Board may deem appropriate for the purposes of this order, the following:

(i) The acreage which he expects to plant to each food crop.

(ii) The number of tons of chemical fertilizer (showing its formula), which the applicant has on hand for use on the crops with respect to which the application is made.

(j) *Issuance of ration cards and purchase permits.* (1) Ration cards and purchase permits shall be issued on forms to be prescribed by the War Board. They shall show the quantities and the formulae of the chemical fertilizers authorized to be obtained and the purposes for which such fertilizers may be used. They shall contain expiration dates after which they shall become void, unless an extension of time is granted by the War Board upon good cause shown by the holder thereof. Purchase permits shall be issued in triplicate and one copy may be retained by the applicant.

(2) Upon receiving an application for a ration card or purchase permit, the War Board shall determine whether such application has been properly made and shall either approve or deny the application, in whole or in part, as the facts may warrant. In determining the quantity of chemical fertilizer which any person may be authorized to obtain on a purchase permit or ration card, the Board shall take into account the amount of chemical fertilizer which the applicant has on hand and, in the case of a sugarcane grower, the amount which he has applied since July 1, 1942, to his acreage in sugarcane for harvest in 1944. If any application is wholly denied, the applicant shall be so notified by a letter setting forth the reasons therefor. If any application is approved, in whole or in part, a ration card or purchase permit, as the case may be, shall be issued. In the case of an application partly denied, the applicant shall be notified by letter of the reasons for such partial denial.

(3) Any applicant whose application for a ration card or purchase permit has been denied, in whole or in part, may, within fifteen calendar days after notification of such denial, request the War Board, in writing, to reconsider its action. Within fifteen calendar days after the receipt of such request, the War Board shall notify the applicant by letter of its action on the reconsideration.

(4) If, after the reconsideration provided for in paragraph (j) (3) hereof, any applicant has good reason to believe that the final ruling of the War Board on his application is not in accordance with the provisions of this order, such applicant may, within 15 calendar days after receiving notification of such ruling, file with the War Board a written appeal to the Director from such ruling, setting forth specifically the reasons for his appeal, and stating in full the facts upon which his appeal is based. Such written appeal shall be dated and made by the applicant under oath. The War Board shall promptly transmit such appeal to the Director. The Director may require the furnishing of additional information by the applicant or the War Board. The Director may affirm, reverse, or modify the decision of the War Board or he may remand the matter to the War Board. The decision of the Director shall be in writing, shall be communicated to the applicant and to the War Board and shall be final and conclusive.

(k) *Authorization to deliver fertilizer for sugarcane.* A ration card will show either the total quantity of chemical fertilizer which a sugarcane grower may obtain for use on sugarcane during the effective period of this order, or the total quantity of such fertilizer which a sugarcane grower may obtain for use on any specified sugarcane crop planted or to be planted during the effective period of this order. The quantity of chemical fertilizer which may be delivered to a sugarcane grower for use on sugarcane at any specified time, however, shall be a percentage of the total quantity shown on his ration card. Such percentage shall be determined by the War Board for all sugarcane growers, from time to time, taking into account the available supply of chemical fertilizer for use on sugarcane and the needs of sugarcane growers. The War Board shall notify fertilizer manufacturers, dealers and agents of such determination.

(l) *Obtaining fertilizer on a ration card.* A sugarcane grower may obtain chemical fertilizer only upon presenting his ration card to a fertilizer manufacturer, dealer, agent or other person from whom such fertilizer is to be obtained. No fertilizer shall be delivered to such grower for use on sugarcane until delivery has been made of the fertilizer for use on food crops, which, as shown on his ration card, such grower is required to take. The quantity of fertilizer delivered to any grower for use on sugarcane shall not exceed the quantity authorized by the War Board, pursuant to paragraph (k) hereof, to be delivered at that time. Upon making delivery of fertilizer for use on sugarcane or food crops authorized by a ration card, the fertilizer manufacturer, dealer, agent, or other person making such delivery shall sign and date the ration card as of the date of delivery and indicate thereon the kinds and quantities delivered.

(m) *Obtaining fertilizer on a purchase permit.* A farmer may obtain chemical fertilizer for use on food crops only by surrendering to a fertilizer manufacturer, dealer, agent or other person from whom such fertilizer is to be obtained, the original and one copy of his purchase permit. Upon making delivery of such fertilizer, the fertilizer manufacturer, dealer, agent, or other person making such delivery shall sign and date the original and the copy, shall mail the original to the War Board as the Board may direct, and shall retain the copy on file for at least 60 days.

(n) *Records of War Board.* The War Board shall keep an accurate record of all applications received for ration cards and purchase permits, all ration cards and purchase permits issued, and all other pertinent data which it deems appropriate to carry out the purposes of this order or which may be required by the Director.

(o) *Records and reports of manufacturers, dealers and agents.* Fertilizer manufacturers, dealers, agents and other persons to whom this order applies shall keep records for not less than two years of all deliveries of chemical fertilizer, including the quantities and kinds delivered and the names of persons to whom delivered, in such detail and for such periods of time as the War Board may prescribe, and shall make reports to the War Board of all such deliveries in such form and detail as the Board may require. (This record keeping and reporting requirements has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.)

(p) *Audits and inspections.* Each fertilizer manufacturer, dealer, agent or other person to whom this order applies shall, upon request, submit his books, records, and accounts for audit and inspection by duly authorized representatives of the War Board.

(q) *Notification of customers.* Manufacturers, dealers, and agents shall, as soon as practicable, notify each of their regular customers of the requirements of this order, but failure to give such notice shall not excuse any person from complying with the terms hereof.

(r) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, or who conspires with another to perform any of such acts, is guilty of a crime and upon conviction may be punished by fine and imprisonment. In addition, any such person may by administrative suspension order be prohibited from receiving any deliveries of or selling or otherwise disposing of or using any chemical fertilizer or any other material now or hereafter authorized to be rationed or allocated by, or subject to the priority control of, the Secretary of Agriculture, and may be deprived of any priority assistance. Further, the Director of Food Production may recommend to the Office of Price Administration or to the War Production Board that any person who violates any provision of this order or any amendment or supplement thereto be denied the right to receive, use, sell or otherwise dispose of any other materials which now are or in the future may be under allocation.

(s) *Petition for relief from hardship.* Except as provided in paragraphs (j) (3) and (j) (4) hereof, any person affected by this order who considers that compliance herewith would work an exceptional and unreasonable hardship on him may apply in writing for relief to the Director, setting forth in such petition all pertinent facts and information. The Director may, upon the basis of such application and other information, take such action as he deems appropriate. The decision of the Director shall be in writing and shall be final and conclusive.

(t) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall

but also to deliveries from one branch

unless instructions to the contrary are issued, be addressed to the United States Department of Agriculture War Board for Puerto Rico, P. O. Box 4349, San Juan, Puerto Rico, Ref. FPA 10.

(u) *Territorial application of order.* This order shall have application only in Puerto Rico.

The sale of articles of the uniform, except those specified above, similar to or as substitute for those issued by the supply service of the Army is forbidden.

(6) The operation of any gambling device, such as punch boards, slot machines, etc., by or in any exchange or exchange activity is prohibited.

(7) The sale of or dealing in beer, wine, or any other intoxicating liquors by any person in any exchange or upon any premises used for military purposes by the United States is prohibited. Beer with an alcoholic content of not more than 3.2 percent by weight is considered nonintoxicating. See § 54.12 (g).

(8) A periodical published by an exchange will not carry paid advertising.

(9) An exchange will not accept any gift or subsidy which might, directly or indirectly, be calculated to cause a preference in the purchase or sale of merchandise.

(c) *Concessions.* (1) So far as is practicable all of the authorized activities of the exchange will be conducted by the exchange.

(2) Subject to the provisions of (3) and (4) below, and when unusual conditions warrant, concessions may be granted by the exchange officer with the consent of the commanding officer, only for the conduct of activities indicated in paragraph (a) (6) to (18), inclusive, of this section.

(3) Concessions will not be granted private individuals, firms, or corporations to operate any of the activities of the type listed in (2) above without the approval of the commanding general of the service command, and if the furniture, fixtures, and equipment necessary to operate any such activity are owned by the exchange, in the absence of extenuating circumstances, such approval will not be given.

(4) A concession contract will be approved only when it embodies the express provision that the concessionaire assumes complete liability for all local taxes applicable to the property, income, and transactions of the concessionaire.

(5) Contracts with concessionaires will neither state nor imply that any rental is to be charged the concessionaire for occupancy of space in buildings or for the use of utilities or facilities on the military reservation except that fuel, water, or electric services will not be supplied at Government expense for the operation of cooking devices, mechanical equipment, refrigeration, electrical appliances, washing, cleaning, or power machinery for such enterprises as restaurants, tailor shops, barber shops, shoe repair shops, or any other activities operated by the exchange or concessionaires.

The contract will contain provisions that the post authorities retain supervision of the activities and control of prices to be charged.

(6) When concessions occupy real estate not under control of the exchange, a license or lease is required (§52.1 and §§ 52.5–52.16).

(7) A concessionaire is in no sense an agent of the exchange and will not be permitted to represent himself as such to the public by the use of the words "------ Exchange" on letter or bill heads, signs, or in any other manner.

(8) The limitations imposed upon sales by exchanges apply equally to exchange concessionaires.

(d) *Vending and amusement machines.* (1) Vending and amusement machines may be installed in posts, camps, stations, and installations by:

(i) Outright purchase for cash, or installment contract.
(ii) Rental purchase.
(iii) Loan.
(iv) Rental.

(2) The negotiating agency for procuring vending and amusement machines at posts, camps, stations, or installations will normally be the exchange.

(3) All vending and amusement machines installed on the post will be under the control of the exchange. Exception is made for those installed in hospitals, service clubs, and messes operated under the provisions of AR 210–60,[1] for the benefit of the fund concerned, at the discretion of the post, camp, station, or installation commanding officer, and except where specific War Department authority has been granted under the provisions of AR 210–50.[2] [Par. 10]

§ 54.6 *Army Exchange Service.* (a) The Army Exchange Service is that part of the Army which has jurisdiction over and provides staff supervision of the operation of all Army exchanges, and consists of such officers, enlisted men, and civilian personnel necessary to perform the functions assigned to it.

(b) This Service will have jurisdiction over, and will be extended to, all exchanges of the Army through appropriate personnel on the staffs of commanding generals of service commands and commanding officers of posts, camps, stations, and installations, at whose directions exchanges have been established.

(c) With reference to all Army exchanges, the Army Exchange Service is charged with:

(1) Developing policies, plans, and procedures for and supervising the installation and operation of:

(i) A uniform and coordinated system of operating procedures, pricing policies, and merchandising methods, including the safeguarding of exchange funds and property, and the determination of permitted types of merchandise to be sold by exchanges.

(ii) Personnel policies and procedures, to include insurance plans, in-service training programs, and training of exchange officers.

(iii) Accounting and auditing methods and procedures.

(iv) Minimum and maximum percentages of gross profits, operating expenses, and net profits.

(v) The regulation of dividends.

(vi) Determination of type of equipment and fixtures to be used by exchanges.

(vii) Establishment of fees to be paid by exchanges to the Army Exchange Service for services enumerated herein.

(2) Performing the following functions:

(i) Providing and prescribing the use of purchasing and fiscal services.

(ii) Obtaining price agreements from manufacturers and distributors on items purchased by exchanges, and prescribing the use of such price agreements.

(iii) Administrating all funds accruing to the Army Exchange Service.

(iv) Negotiating for and providing funds to be loaned to exchanges under such regulations as the Chief of Army Exchange Service may prescribe.

(3) Transmitting to exchange officers and personnel in an appropriate manner necessary information as to all activities within the scope of the foregoing duties and functions.

(4) Exercising an advisory and policy-making function for the War Department in all other matters within the scope of the foregoing duties and functions. [Par. 11]

§ 54.7 *Purchases*—(a) *For exchange.* (1) Except as authorized in (i) and (ii) below and except when such duty has been delegated to an assistant exchange officer, all purchases of merchandise or other property will be made by the exchange officer who will notify all vendors on the purchase order, or by other appropriate means, that the contract is made with the exchange and not with the United States Government.

(i) Exception to the above requirement is authorized, when, by reason of absence on other duty, the exchange officer may not advantageously make such purchases. In these cases the exchange office manager may, when specifically authorized by the commanding officer, make routine purchases in limited quantity.

(ii) In large exchanges maintaining a purchasing department and stock control system, routine replacement of lines of merchandise handled in the exchange may be made by the head of the purchasing department from a list of dealers authorized by the exchange officer.

(2) The exchange officer will, in all cases, be responsible for the purchase made by any subordinate as authorized in (1) (i) and (ii) above.

(3) Purchases made verbally by the exchange officer, or as provided in (1) (i) and (ii) above, will be confirmed by written purchase order immediately thereafter.

(4) Inventories will be held to a reasonable minimum.

(5) Purchases at prices in excess of those published in Army Exchange Service price agreements (§ 54.6 (c)) are not authorized except to supply immediate needs to exchanges operating in the field, or in emergencies due to lost or delayed shipments or other like circumstances, or when procurement, delivery, or price considerations render it to the interest of the exchange to purchase from local distributors.

(6) (i) All purchases within the continental limits of the United States by exchanges located outside the continental limits of the United States will be made through Army Exchange Service.

(ii) Commercial and financial transactions of any type within the United States by exchanges located outside the continental limits of the United States will be conducted only through Army Exchange Service in accordance with provisions prescribed by the Chief of Army Exchange Service.

(7) The purchase or sale by Army exchanges of articles of military uniform and equipment not in conformity with the provisions of §§ 79.1 to 79.64, inclusive, is forbidden.

(b) *For concessionaires.* The purchase by the exchange of material needed by concessionaires in the operation of their concessions is permitted only after all taxes involved, if any, have been advanced by the concessionaire and when such material is not to be resold.

(c) *No merchandise will be held on consignment* or to be paid for by exchanges when sold. The provisions of this paragraph will not be construed as prohibiting the established business practice of making an agreement, at the time of purchase, for the return to the vendor for credit of unsold seasonable merchandise at a specific time. [Par. 12]

§ 54.8 *Sales*—(a) *To whom made.* Exchanges are authorized to sell to the following-named persons and organizations only. Purchases by individuals will be limited as hereinafter set forth.

(1) Personnel and organizations now or hereafter authorized by law and regulation to purchase subsistence stores or other quartermaster supplies as defined in paragraphs 2 and 6, AR 30–2290,[1] may purchase at exchanges. Dependent members of the families of persons so authorized may act as agents for such persons upon proper identification.

(2) Civilians other than those above defined and who are regularly employed or serving at military posts, camps, stations, or installations may purchase for their own consumption on the post, upon proper identification, items of food,

[1] Administrative regulations of the War Department relative to post messes.
[2] Administrative regulations of the War Department relative to unit and similar funds of posts, camps, and stations.

[1] Administrative regulations of the War Department relative to sale of supplies and services.

drink, and tobacco products and no other merchandise of any kind.

(b) *Sales to Government.* Sales to the Government by exchanges are authorized only in cases where the same class of service cannot be conveniently or reasonably obtained elsewhere and where a direct advantage will accrue to the Government from the method resorted to. In no case will an exchange or concessionaire bidding as such be permitted to enter into public competition or to submit bids in response to advertisements calling for proposals for furnishing supplies or services. When accounts are submitted for sales of the kind described, the vouchers will contain a full statement of the grounds upon which the sale of supplies or services was based and will fully set forth all the circumstances of the transaction with a view to enabling the proper agencies of the United States Government to determine whether such purchase was in the public interest. [Par. 13]

§ 54.9 *Personnel—(a) General.* (1) So far as is practicable, exchanges will be operated by civilian employees, with Army officers in executive control.

(2) Great care will be exercised in the selection of personnel in order that an efficient and permanent body of civilian employees may be developed. [Par. 15]

§ 54.10 *Enlisted employees.* (a) The commanding officer of the post, camp, station, or installation may, subject to the approval of the commanding general of the service command, authorize the use of enlisted men in exchanges.

(b) Position responsibility of enlisted employees will be as prescribed for civilian personnel.

(c) The employment of enlisted men by exchange concessionaires is prohibited. [Par. 21]

§ 54.11 *Civilian auditors.* Under unusual circumstances and only after approval by the commanding general of the service command the commanding officer may authorize the employment of a qualified civilian accounting firm at stated intervals to audit the accounts of the exchange at its expense. In such cases the commanding officer, the exchange council, and the auditing officer retain their full responsibility. The officer designated as the auditing officer may work with the accountant, in which case he is authorized to amend the certificate required of him. [Par. 27]

§ 54.12 *Contracts.* (a) Under the provisions of the regulations in this part the exchange officer is the contracting officer for the exchange, and he is authorized to execute a contract obligating the exchange.

(b) All contracts and agreements to which exchanges are parties will contain when applicable the statement that such contracts will be terminated when an exchange is liquidated or for other reasons at the option of the exchange.

(c) Contracts on behalf of an exchange will not cover periods of more than 1 year without the approval of the commanding general of the service command.

(d) Proposed concession contracts will be submitted to the commanding general of the service command for approval, as provided in § 54.5 (c).

(e) All contracts involving future performance will be reduced to writing, signed by the contracting parties, and filed in the records of the exchange.

(f) All contracts that involve the use of Government property not under the control of the exchange will be submitted to the commanding general of the service command for approval.

(g) Contracts involving the sale of 3.2 percent beer entered into in connection with the provisions of § 54.5 (b) (7) of these regulations will, without exception, be accompanied by affidavit of the manufacturer and distributor of such beer certifying that the alcoholic content of such product does not exceed that permitted by these regulations.

(h) (1) Exchange contracts are solely the obligation of the exchange. They are not Government contracts and the distinction between exchange contracts and Government contracts will be observed and clearly indicated at all times.

(2) Contracts for the erection of temporary exchange buildings will contain a statement that the proposed construction is an exchange transaction and that the exchange alone is responsible for the debt, and not the Government.

(i) When applicable, contracts for the erection of temporary buildings will contain a statement that immediately upon completion of the building, title thereto passes to the exchange. See § 54.4.

(j) Notwithstanding the provisions of (a) above, whenever an exchange outside the continental limits of the United States makes purchases within the United States as provided in § 54.7 (a) (6) the fiscal officer appointed for such exchange is, within the scope of his assigned duties under such appointment, the contracting officer for the said exchange in limitation of the functions of the commanding officer and the exchange officer. [Par. 33]

§ 54.13 *Liquidation of accounts payable of exchanges lost through enemy action.* (a) Creditors of exchanges which have been lost or hereafter may be lost or destroyed through enemy action may file with Army Exchange Service their claims, duly authenticated as hereinafter provided, for the payment of any amount of money lawfully owing to them by such exchange. The claims herein contemplated will be limited to claims for merchandise, equipment, and supplies.

(b) Creditor claims referred to in paragraph (a) of this section will be made on such form or forms as shall be prescribed by the Chief of Army Exchange Service, and will be accompanied by statements under oath of the claimant concerning the facts in support of such claim. Attached to such claim will be certified copies of bills of lading, indicating shipment of goods or merchandise made the subject of such claim, together with such other documents as will be required in each specific case by the Chief of Army Exchange Service to constitute proof thereof. Claimant will state, under oath, whether or not he has received direct or through any person, firm, or corporation payment of any part or portion of the amount represented in said claim for or because of the shipment of merchandise which is the basis of such claim.

(c) The Chief of Army Exchange Service will appoint a board of officers to review and recommend to him necessary action upon any such claim or claims properly filed, as provided in this section.

(d) Subject to the terms of this section and to such rules and regulations as the Chief of Army Exchange Service may hereafter prescribe under the provisions of this section, the creditors of any such exchange will be paid the amounts found by the board (paragraph (c)) to be owing to them respectively by such lost or destroyed exchange or exchanges out of such funds as Army Exchange Service may possess available for such purposes in its reserve fund for contingencies.

(e) Upon the approval of such payment, the creditor claimant will be required, prior to receipt of the amount so approved, to execute an assignment of such claim or claims to the Chief of Army Exchange Service.

(f) Under the provisions of the assignment provided for in paragraph (e) of this section, Army Exchange Service will be subrogated to all the rights of the creditor so assigning his claim against any person whomsoever, including the exchange to whose account the merchandise represented by such claim was charged, and against any enemy government responsible for the loss or damage occasioned to the exchange in question.

Chapter III—Bituminous Coal Division

[Docket No. A-1921]

PART 321—MINIMUM PRICE SCHEDULE, DISTRICT NO. 1

ORDER GRANTING RELIEF

Order granting temporary relief and conditionally providing for final relief in the matter of the petition of District Board No. 1 for the establishment of price classifications and minimum prices for the coals of certain mines and for changes in shipping points for the coals of certain other mines in District No. 1.

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, having been duly filed with this Division by the above-named party, requesting the establishment, both temporary and permanent, of price classifications and minimum prices for the coals of certain mines in District No. 1 and requesting changes in shipping points for the coals of certain other mines also located in District No. 1; and

It appearing that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The following action being deemed necessary in order to effectuate the purposes of the Act:

It is ordered, That, pending final disposition of the above-entitled matter, temporary relief is granted as follows: Commencing forthwith, § 321.7 (*Alphabetical list of code members*) is amended by adding thereto Supplement R, and § 321.24 (*General prices*) is amended by adding thereto Supplement T, which supplements are hereinafter set forth and hereby made a part hereof.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this order, pursuant to the rules and regulations governing practice and procedure before the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this order, unless it shall otherwise be ordered.

Temporary relief only is granted with respect to the request of petitioner for permission to mix coals for Mine Index Nos. 3960, 1023, 3762, 3763, 224 and 225, of the reason that insufficient facts have been presented upon which to base a final determination. Accordingly, an order has been issued severing that portion of Docket No. A-1921 which relates to them and designating such portion as Docket No. A-1921, Part II.

No relief is granted for the Arcadia No. 96 Mine, Index No. 3744, of H. C. Bonner, for the reason that the request relating to this mine was granted in Docket No. A-1809.

Dated: April 10, 1943.

PART 335—MINIMUM PRICE SCHEDULE, DISTRICT NO. 15

ORDER GRANTING RELIEF

Order granting temporary relief and conditionally providing for final relief in the matter of the petition of District Board No. 15 for the establishment of price classifications and minimum prices for the coals of certain mines in District No. 15.

An original petition pursuant to section 4 II (d) of the Bituminous Coal Act of 1937 having been duly filed with this Division by the above-named party requesting the establishment, both temporary and permanent, of price classifications and minimum prices for the coals of certain mines in District No. 15, and praying that no permanent price classifications or minimum prices be established for the coals of the Taylor Mine (Mine Index No. 1675), located in Putnam County, Missouri, pending the entry of a final order in Docket No. A–179; and

It appearing that a reasonable showing of necessity has been made for the granting of temporary relief as requested in the petition; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The following action being deemed necessary in order to effectuate the purposes of the Act:

It is ordered, That pending final disposition of the above-entitled matter temporary relief is granted as follows: Commencing forthwith § 335.5 (*Alphabetical list of code members*) is amended by adding thereto Supplement R and § 335.24 (*General prices in cents per net ton for shipment into all market areas*) is amended by adding thereto Supplement T, which supplements are hereinafter set forth and hereby made a part hereof.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this order, pursuant to the rules and regulations governing practice and procedure before the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this order unless it shall otherwise be ordered.

No relief is granted herein for the coals of the Taylor Mine (Mine Index No. 1675), of code member Tom Taylor in Putnam County, Missouri, for the reasons set forth in the Order severing that portion of Docket No. A–1914 relating to said coals from the remainder of the docket, designating such severed portion as Docket No. A–1914, Part II, and granting temporary relief therein.

Dated: April 9, 1943.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-288]

NATIONAL WEATHERSTRIP CO. AND SEAL TITE CAULKING CO.

Max Blatt, Ruth Blatt and David Slobin, doing business as the National Weatherstrip Company and the Seal Tite Caulking Company, 4234 Joy Road, Detroit, Michigan, are engaged in the business of manufacturing, selling and installing weatherstrip materials. From July 22, 1942 to October 9, 1942, the National Weatherstrip Company made over 400 separate installations of copper or copper base alloy weatherstripping in violation of Supplementary Conservation Order M-9-c-4. These installations were made in such reckless disregard of the order as to constitute wilful behavior. In addition, incomplete records were kept of the transactions in copper and copper base alloy weatherstripping, in violation of § 944.15 of Priorities Regulation No. 1.

These violations have hampered and impeded the war effort of the United States by diverting scarce materials to uses unauthorized by the War Production Board. In view of the foregoing: *It is hereby ordered*, That:

§ 1010.288 *Suspension Order S-288.* (a) Max Blatt, Ruth Blatt and David Slobin, doing business as the National Weatherstrip Company or the Seal Tite Caulking Company or otherwise, their successors and assigns, shall not purchase, accept delivery of, sell, install, deliver or otherwise deal in any copper or copper base alloy building material, as defined in Supplementary Conservation Order M-9-c-4, except as specifically authorized in writing by the War Production Board.

(b) Deliveries of material to Max Blatt, Ruth Blatt and David Slobin, doing business as National Weatherstrip Company or Seal Tite Caulking Company or otherwise, their successors and assigns, shall not be accorded priority, directly or indirectly, over deliveries under any other contract or order, and no preference rating shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders, or any other orders or regulations of the War Production Board, except as specifically authorized in writing by the War Production Board.

(c) No allocation shall be made to Max Blatt, Ruth Blatt and David Slobin, doing business as National Weatherstrip Company or Seal Tite Caulking Company or otherwise, their successors and assigns, of any material the supply or distribution of which is governed by any order of the War Production Board, except as specifically authorized in writing by the War Production Board.

(d) Nothing contained in this order shall be deemed to relieve Max Blatt, Ruth Blatt and David Slobin, doing business as National Weatherstrip Company or Seal Tite Caulking Company or otherwise, from any restriction, prohibition or provision contained in any order or regulation of the War Production Board except in so far as the same may be inconsistent with the provisions hereof.

(e) This order shall take effect on April 25, 1943 and shall expire on July 25, 1943, at which time the restrictions

contained in this order shall be of no further effect.

Issued this 23d day of April 1943.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-294]

ANDERSON FUR COMPANY

Morris Goralnik, doing business as Anderson Fur Company, at 106 South Main Street, Fall River, Massachusetts, is engaged in the retail fur business at said address.

After January 29, 1943, without the authorization of the Director General for Operations of the War Production Board, Goralnik began construction and ordered and purchased materials to begin construction on the remodeling of his leased premises, the estimated cost of which was in excess of the permitted cost of construction under Conservation Order L-41.

Prior to beginning construction Goralnik was put on notice that there was a limit upon construction, but elected to proceed without any further inquiry with respect to the order and its application to his proposed construction.

This construction was begun in wilful violation of Conservation Order L-41 and has hampered and impeded the war effort of the United States. In view of the foregoing facts, *It is hereby ordered*, That:

§ 1010.294 *Suspension order No. S-294.* (a) Morris Goralnik, doing business as Anderson Fur Company, or under any other name, his successors and assigns, shall not order, purchase, accept delivery of, withdraw from inventory, or in any other manner secure or use material or construction plant in order to continue or complete construction of the alteration and remodeling of the premises leased by the respondent at 106 South Main Street, Fall River, Massachusetts, unless specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Morris Goralnik, doing business as Anderson Fur Company, or under any other name, his successors and assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on issuance.

Issued this 23d day of April 1943.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-295]

GLEN AMUSEMENT CORPORATION

Glen Amusement Corporation is a New York corporation engaged in the amusement business for which purpose it undertook to construct a roller skating rink at 5031 Main Street, Williamsville, New York. This construction was commenced on or about June 1, 1942 and is now about 80 per cent completed. The respondent was aware of the governmental restrictions on construction work. The cost of this roller skating rink, if and when completed, was conceded by the respondent to total at least $15,000, and it follows that a reasonably accurate estimate of the cost of construction necessarily would have been in excess of the limit permitted by Conservation Order L-41. Commencing this construction constituted a wilful violation of Conservation Order L-41.

Said violation by the respondent has hampered and impeded the war effort of the United States, and has diverted essential critical materials and labor to uses unauthorized by the War Production Board. In view of the foregoing, *It is hereby ordered*, That:

§ 1010.295 *Suspension Order No. S-295.* (a) Neither Glen Amusement Corporation, nor its successors and assigns, nor any other person whether individual or corporate, shall order, purchase, accept delivery of, withdraw from inventory, or in any other manner secure or use material or construction plant in order to continue, or complete construction of, or remodel, rehabilitate, or in any manner alter the roller-skating rink building located at 5031 Main Street, Williamsville, New York, except as hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Glen Amusement Corporation, its successors and assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on April 25, 1943.

(b) The authority of the Administrator of Food Production and Distribution under this directive shall include the power to regulate or prohibit use of pyrethrum insecticides in agriculture and sale or other disposition of pyrethrum insecticides to or acquisition of pyrethrum insecticides by any ultimate consumer for use in agriculture. The Administrator of Food Production and Distribution may issue such regulations, orders and directives, direct such inspections, and take such measures as it may deem necessary or appropriate for the effectuation of the powers conferred by this directive.

(d) The Administrator of Food Production and Distribution may exercise the power, authority and discretion conferred by this directive, through such officials, including part time and uncompensated special agents, as it may determine.

(e) The Chairman or Executive Vice Chairman of the War Production Board may from time to time delegate to the Administrator of Food Production and Distribution such additional powers with respect to the distribution to or use in agriculture of pyrethrum insecticides or amend or revoke the delegation herein in such manner and to such extent as he may determine to be necessary.

(f) Nothing herein shall be construed to limit or modify any order heretofore issued by the Director of Priorities of the Office of Production Management, by the Director of Industry Operations of the War Production Board, by the Director General for Operations of the War Production Board, or by War Production Board, as from time to time amended, nor to delegate to the Administration of Food Production and Distribution the power to extend, amend or modify any such order.

(g) Nothing herein shall be construed to limit such authority as is conferred on the Secretary of Agriculture by section 2 of Executive Order No. 9280 of December 5, 1942.

(h) For the purposes of this directive: (1) "Pyrethrum" means pyrethrum flowers and the powder, dust or extract derived therefrom. (2) "Pyrethrum insecticides" means any compound containing pyrethrum combined with other liquid or dry materials, whether active or inert; provided that such compound is suitable for use as an insecticide. (9) Material for maintenance, repair and operating supplies shall not include any of the following items, regardless of whether normally carried as such according to established accounting practice:

(i) Fabricated containers (in knockdown or set-up forms, whether assembled or unassembled), required for packaging products to be shipped or delivered.

(2) No producer shall place any purchase order for any material for maintenance, repair or operating supplies, whether or not accompanied by preference ratings or allotment numbers or symbols assigned pursuant to this order, which would cause the producer to exceed his purchase order quota for such material assigned pursuant to paragraph (d) (1), unless authorized upon application pursuant to paragraph (e).

(e) *Special applications.* If the producer is unable to secure delivery of materials for maintenance, repair or operating supplies because the preference ratings or allotment numbers or symbols assigned hereunder are insufficient, or because the producer's purchase order quota or the unit cost limitation of paragraph (c) (1) would be exceeded, the War Production Board may, upon written or telegraphic request, assign such special ratings or allotments or additions to the purchase order quota as it deems proper. Such letters or telegrams shall be addressed to the War Production Board, Chemicals Division, Washington, D. C., Ref: P-89 and shall contain the following information:

(2) An order bearing such certification shall be deemed an authorized controlled material order in the case of controlled materials, and in the case of all other materials shall have the same status as an order bearing an allotment number or symbol for the purposes of CMP Regulation No. 3 and all other applicable CMP regulations.

(h) *Inventory diversion.* No producer shall use material for maintenance, repair or operating supplies obtained with ratings or allotment numbers or symbols assigned by or pursuant to this order, except in that portion of his productive facilities to which a serial number under this order has been assigned.

(i) *Inventory restriction.* No producer shall accept delivery of any non-controlled material for maintenance, repair or operating supplies, whether or not obtained with preference ratings or allotment numbers or symbols assigned by or pursuant to this order, which would cause his inventory of such material for maintenance, repair or operating supplies to exceed a minimum practicable working inventory. Inventories of controlled materials held by producers are subject to the provisions of CMP Regulation No. 2.

(j) *Applicability of regulations.* This order and all transactions affected hereby are subject to all applicable provisions of War Production Board regulations, as amended from time to time; *Provided, however*, That no producer shall be subject to the provisions of CMP Regulations No. 5 or No. 5A, and no producer shall obtain any material under the provisions of either of said regulations.

(k) *Miscellaneous provisions*—(1) *Records.* In addition to the records required to be kept under Priorities Regulation No. 1, a producer placing any purchase order or contract rated or assigned a CMP allotment number or symbol hereunder, shall retain, for a period of two years, for inspection by representatives of the War Production Board, endorsed copies of such purchase orders or contracts, whether accepted or rejected, segregated from all other purchase orders or contracts, or filed in such manner that they can be readily segregated for such inspection.

(2) *Reports.* The War Production Board may require each producer to file such other reports as may be prescribed, subject to the approval of the Bureau of the Budget pursuant to Federal Reports Act of 1942, and may issue special directions to any producer with respect to preparing and filing Form PD-762.

(3) *Conservation and standardization.* Each producer shall use his best efforts to conserve materials by elimination, simplification or standardization of types, sizes or forms or by substitution of less critical for more critical materials, and shall cooperate in any program developed for such purpose by the War Production Board. The Conservation Division of the War Production Board issues, periodically, a publication showing the relative scarcity of materials, entitled, "Materials Substitutions and Supply".

(4) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter, in triplicate, referring to the particular provisions appealed from and stating fully the grounds of the appeal.

(5) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(6) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Chemicals Division, Washington, D. C.; Ref.: P-89.

(2) Use any alkali blue or other organic toner as a toner for black ink in excess of eight percent (8%), by weight, of such black ink where such alkali blue or other organic toner is in paste form or, where in the form of dry color, then in excess of four percent (4%), by weight, of such black ink.

PART 1158—INDUSTRIAL MACHINERY

[Interpretation 2 to General Limitation Order L-83, as Amended March 12, 1943]

General Limitation Order L-83 restricts deliveries to those made on approved orders. An approved order is defined in paragraph (a) (6). Some confusion has arisen as to the exact requirements of an approved order assigned a rating on Form PD-3A, in accordance with the provisions of paragraph (a) (6) (iii). Under this paragraph Form PD-3A may be used after May 18, 1942 only to assign preference ratings to orders to be delivered to or for the direct account of the agencies specified in paragraph (a) (6) (i), and the machinery in question must be specified on the certificate. The two requirements are not alternates but must both be met in any one case.

PART 1223—STANDARDIZATION AND SIMPLIFICATION OF PAPER

[Schedule III to Limitation Order L-120, as Amended April 24, 1943]

FINE WRITING PAPERS

Section 1223.4 *Schedule III to Limitation Order L-120* is hereby amended and revised to read as follows:

§ 1223.4 *Schedule III to Limitation Order L-120*—(a) *Definitions.* For the purpose of this schedule, including the Appendix:

(1) The term "fine writing papers" means and is limited to the kinds of paper commonly described and distributed in the paper trade by the names used as captions in the Appendix below.

(2) A "grade" means one particular quality within a kind of fine writing paper, such grade having the essential properties peculiar to such kind of paper and common to all grades within such kind, but distinguished from other such grades by a difference in the degree to which one or several of those common properties are emphasized. However, a difference in the degree to which any such property is emphasized, due only to a difference in ash content, in sizing, in the quantity of adhesive in the coating formula, or in the dyes used in the paper and/or coating shall not be considered as resulting in a different grade.

(3) "Color" means any hue of the spectrum, including but not limited to ivory, india and green-white tints, and black, but not including white.

(4) The term "substance weight" means the weight of a kind of "fine writing paper" in pounds per 500 sheets in the size indicated under the appropriate caption.

(5) An "item" means a quantity of paper all of which is of the same size, grain, substance weight, finish, color and grade.

(6) The term "standard" as applied to grade, color, substance weight, and size means, with respect to each manufacturer, a grade and color selected and a substance weight and size specified under A of the appropriate caption in the Appendix below.

(7) The term "special" as applied to grade, color, substance weight, and size means with respect to each manufacturer, any grade, color, substance weight or size that is not standard.

(8) The term "special making order" means a single order placed by a single buyer for manufacture at one time for use by one printer, converter or consumer.

(9) The term "manufacture" includes all making and finishing operations prior to packaging or packing.

(10) "Person" means any individual, partnership, association, or other form of enterprise, including within one "person" all affiliates, subsidiaries, individuals, corporations, partnerships, or other form of enterprise subject to a common executive or operating management or with a common sales organization.

(b) *Identification of the papers subject to this schedule.* It shall be the duty of each person who manufactures

paper to determine in the first instance, but subject to review and official classification by the War Production Board at any time thereafter, under which caption of the Appendix, if any, belongs each of the "fine writing papers" manufactured by him. There shall be taken into account in such determination, and in any review and reclassification by the War Production Board, the designation by which the manufacturer heretofore identified or distributed the paper in question, the common designation in the paper trade of similar papers selling within the same general price range as the paper in question, and the common designation in the paper trade of papers possessing the same general physical characteristics, manufactured by the same general processes, or commonly distributed and used for the same general uses as the paper in question. If a manufacturer is uncertain as to the proper caption under which to classify a particular kind of "fine writing paper," or whether a particular kind of paper is such a paper at all or belongs under any caption of the Appendix to this schedule, he may apply to the War Production Board, in writing, for an official classification of such paper, submitting with his application representative samples of the grade or grades in which he manufactures such paper, a full explanation of the processes by which he manufactures the same, the designation by which he has heretofore identified or distributed the same, the general uses for which it is intended, the general price range within which it is sold, and the types of papers with which it chiefly competes, and a full explanation of the reasons for his uncertainty. The War Production Board may on its own motion review a manufacturer's classification and substitute therefor an official classification. In any event, an official classification by the War Production Board by telegram or notice in writing sent to the manufacturer shall, unless and until the War Production Board shall amend or revise the same by telegram or notice in writing sent to the manufacturer, be conclusive.

(c) *Selection of grades for regular manufacture.* Each person who manufactures any kind of "fine writing paper" shall with respect to each such kind he manufactures, select such "grade" or "grades" thereof, not to exceed the number specified in A (1) of the appropriate caption of the Appendix below, as he may desire to adopt for regular manufacture, and shall forthwith notify the War Production Board of such selection on Form PD-589. The manufacturer may thereafter apply to the War Production Board for leave to amend the original selection by dropping a "grade" or "grades" and substituting another or others, but unless and until such leave is granted by the War Production Board in writing the original selection shall be and remain binding. Each person who regularly manufactures any Extra 100 percent rag content grade of any kind of "fine writing paper" shall notify, as above, the War Production Board thereof on Form PD-589, stating in addition in what respect each such grade differs from his standard 100 percent rag grade, submitting with his statement representative samples of each such grade and a list of sizes, weights and colors regularly manufactured.

(d) *Selection of colors for regular manufacture.* If by the terms of A (2) under the appropriate caption of the Appendix below a manufacturer is permitted, with respect to a particular grade of a kind of "fine writing paper," to select a number of colors, each person who manufactures such grade, if he desires to manufacture such grade in colors, shall immediately select therefor such particular colors, not to exceed the number indicated in A (2) of the appropriate caption, as he may desire to adopt for regular manufacture, and shall forthwith notify the War Production Board of such selection, on Form PD-589. The manufacturer may thereafter apply to the War Production Board for leave to amend the original selection by dropping a color or colors and substituting another or others, but unless and until such leave is granted by the War Production Board in writing the original selection shall be and remain binding.

(e) *General limitations.* Except to the extent and upon the conditions indicated in paragraphs (f), (g), (h) and (i) of this revised schedule, or under B of the appropriate caption in the Appendix below, no person shall manufacture any kind of "fine writing paper" in any grade, color, substance weight or size other than those selected or specified as standard under A of the appropriate caption of the Appendix, or contrary to any other provision under A of the appropriate caption.

(f) *Tolerances and variations.* The prohibitions and restrictions of this revised schedule are subject to the normal tolerances customary in the manufacture of "fine writing papers" and to the normal variations in quantity manufactured customarily acceptable in the paper trade. Nothing in this revised schedule shall restrict the remaking, because of faulty manufacture or excessive underrun, of all or any part of a "special making order" accepted in good faith for manufacture in accordance with the terms of this revised schedule.

(g) *Cutting and slitting.* Nothing in this revised schedule shall restrict the cutting of any sheet size to sizes of which the parent size is a multiple, provided the parent size is manufactured in accordance with the provisions of this revised schedule, nor restrict the slitting to fractional width rolls of any parent roll size manufactured in accordance with the provisions of this revised schedule on an order for roll paper; however, a special sheet size may not be cut from a standard or special roll size except in a quantity and under the conditions applying to a "special size" under B of the appropriate caption in the Appendix below.

(h) *Jobs and seconds.* Nothing in this revised schedule shall restrict the sale of "job lots" or "seconds", resulting from faulty manufacture or overruns customarily unacceptable to the buyer, which occur during a bona-fide attempt to manufacture "fine writing paper" according to the terms of this revised schedule, provided that the manufacturer clearly informs the purchaser that such paper is a "job lot" or "seconds" and so indicates on each package.

(i) *Exception for export.* Regardless of the foregoing provisions of this revised schedule and of the provisions of Limitation Order L-120, a person may manufacture for export (but may not without permission in writing by the War Production Board sell in the domestic market) any kind of "fine writing paper" in any size or substance weight required, regardless of quantity, provided all other provisions of this schedule are complied with; and further, bonds, ledgers and writings may be manufactured with any percent of rag content specified by any foreign government to fill a special making order for such government.

(j) *Records and Reports*—(1) *Standard samples.* Each person who manufactures any kind of "fine writing paper" shall keep, readily available for inspection by the War Production Board, representative samples of each standard grade and each standard color of such grade selected by him under A (1) and A (2) of the appropriate caption.

(2) *Special making orders.* On and after the effective date of this revised schedule, each person who manufactures any "special making order" permitted under B of the appropriate caption of the Appendix below shall require from the buyer a statement to the effect that such order is purchased for use by one printer, converter or consumer, shall keep such statement, together with a complete record of such order, readily available for inspection by the War Production Board, and shall submit reports of such orders to the War Production Board as it may from time to time require.

(3) *Export orders.* On and after the effective date of this revised schedule, each person who manufactures "fine writing paper" for export shall require from the buyer a statement to the effect that such paper is purchased for export and, in the case of a foreign government that such paper is purchased for such government, shall keep such statement, together with a complete record of the order against which such paper is manufactured readily available for inspection by the War Production Board, and shall submit reports of such orders to the War Production Board as it may from time to time require.

Issued this 24th day of April 1943.

WAR PRODUCTION BOARD,

Recording Secretary.

PART 3122—ELECTRICAL MOTORS AND GENERATORS

[Interpretation 2 of General Conservation Order L-221, as Amended April 22, 1943]

Paragraphs (f) (1) and (2) of § 3122.1 *General Conservation Order L-221* exempt orders for motors and generators to be delivered for use outside continental United States and Canada. This provision is intended in this order (but not necessarily in other orders where a similar expression is used) to exempt from the limitations and restrictions of paragraphs (b) (1), (c) and (d) of Order L-221 any order for motors and generators delivered for use outside of the forty-eight states (and the District of Columbia) and Canada. Motors and generators delivered for use in Alaska, the Panama Canal Zone, Puerto Rico and other possessions and territories of the United States would be exempt from the above mentioned restrictions.

PART 3171—COMMERCIAL DISHWASHERS

[Interpretation 1 to Limitation Order L-248]

The following official interpretation is hereby issued by the War Production Board with respect to § 3171.1 *General Limitation Order L-248:*

Paragraph (c) (1) of General Limitation Order L-248 (Commercial Dishwashers) reads as follows:

(1) Any person may make or accept physical delivery of any such dishwasher on a specific contract or subcontract for delivery to or for the account of the Army, the Navy, the Maritime Commission, or the War Shipping Administration of the United States;

Question has been raised as to whether purchase by the Army Pre-Flight Training Schools is within the exception stated in this subparagraph or whether such schools desiring to purchase this equipment must apply on Form PD 638A for authorization.

The exception referred to applies only to specific contracts or subcontracts for deliveries to or for the account of the agencies named. It does not include equipment which will be owned by the training schools and not by the Army, even though it is intended that the equipment will for the present be used solely for the benefit of the personnel assigned to the school. Such a delivery is not made on a specific contract or subcontract for delivery to or for the account of the Army within the meaning of the provision quoted above. Accordingly, any training school desiring to purchase this equipment under these circumstances must apply on Form PD-638A for authorization.

Issued this 24th day of April 1943.

[General Limitation Order L-288]

GREY CAST IRON, MALLEABLE IRON AND BRASS AND BRONZE PIPE FITTINGS: SIMPLIFICATION

The fulfillment of requirements for the defense of the United States has created a shortage of iron, brass and bronze used in the manufacture of pipe fittings for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3224.6 *General Limitation Order L-288*—(a) *Definitions.* For the purpose of this order:

(1) "Producer" means any person who manufactures pipe fittings.

(2) "Pipe fitting" means any threaded or flanged pipe fitting made from grey cast iron, malleable iron, brass or bronze, except:

(i) Those known as hydraulic or high pressure pipe fittings;

(ii) Those known as cast or forged steel fittings;

(iii) Those known as brazed or soldered brass or bronze fittings, whether screwed or flanged at any outlet; and

(iv) Those produced under specific contract or subcontract for use as part of the equipment of aircraft or watercraft other than pleasure craft.

(3) "Manufacture" means to fabricate, assemble, produce, process, machine or alter materials by physical or chemical means, or to cause the doing of those acts.

(b) *Restrictions.* (1) No producer shall manufacture after March 1, 1942, any pipe fittings which do not conform to the types, sizes and specifications contained and prescribed in the Appendix hereto.

(2) No producer shall sell or make delivery, nor shall any person knowingly purchase or accept delivery of any pipe fittings manufactured in violation of this order.

(c) *Exemptions.* The provisions of this order shall not apply:

(1) To such pipe fittings as were in any producer's stock in finished form on March 1, 1942, or which had, on said date, been cast, machined or otherwise processed in such manner that their manufacture in conformity with this order and the Appendix hereto would be impractical; or

(2) To the manufacture, sale, purchase or delivery pursuant to specific authorization by the War Production Board of pipe fittings which do not conform to the types, sizes and specifications prescribed in the Appendix hereto.

(d) *Applicability of regulations.* This order and all transactions affected thereby are subject to the provisions of all applicable regulations of the War Production Board.

(e) *Records.* Every producer shall maintain and shall retain for a period of two years adequate records evidencing his manufacture, sale and delivery of all pipe fittings, which records shall be kept readily available and open to inspection by duly authorized representatives of the War Production Board.

(f) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate referring to the particular provision appealed from and stating fully the grounds of the appeal.

(g) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment or both. In addition any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control, and may be deprived of priorities assistance.

APPENDIX

GREY CAST IRON, MALLEABLE IRON AND BRASS AND BRONZE PIPE FITTINGS: SIMPLIFICATION

NOTE: (1) *Abbreviations:* SWP stands for steam working pressure; WWP, for water working pressure

(2) *Sizes.* The fittings listed herein are designated by the nominal pipe size of the pipe with which the fittings are intended to be used. All dimensions are in inches. Reducing tees, three-way reducing elbows, and reducing Y branches, are designated by size in the following order: (1) largest size on the run, (2) opposite size, (3) size of outlet or inlet. Reducing double Y branches are designated by (1) size of run openings, and (2) size of inlets. The last size given for circulating boiler fittings is the inside opening of the boiler end of the fitting. In the case of fittings with side outlets the size of the outlet is given last. The second dimension given for flanges is the outside diameter of the flange.

(3) *Threads.* All fittings have right hand threads, except where otherwise specified.

(4) *Column Markings.* Where columnar spaces are provided, an X in the applicable box indicates that the size specified in the heading is to be retained.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-289]

ABSOPROOF WEATHERSTRIP & CAULKING CO., ET AL.

Max Greenberg and Irwin Green, doing business as Absoproof Weatherstrip and Caulking Company and Century Metal Strip Products Company, 3030 West Davison Avenue, Detroit, Michigan, are engaged in the business of fabricating, selling and installing weatherstrip materials and thresholds. From July 22 to September 30, 1942, Absoproof Weatherstrip and Caulking Company made 635 separate installations of copper or copper base alloy weatherstripping, involving approximately 2,000 pounds of such materials, in violation of Supplementary Conservation Order M-9-c-4. The company's failure to familiarize itself with this restriction upon its business was so grossly negligent as to constitute wilful behavior. The Century Metal Strip Products Company, as a Class I producer, failed to file a Production Requirements Plan application for the fourth quarter of 1942. The company was familiar with the provisions of Priorities Regulation No. 11, and this failure to file such application was, therefore, in wilful violation of that regulation. Although they were aware of the requirement, both companies, in careless disregard of § 944.15 of Priorities Regulation No. 1, failed to keep complete records of their inventories and of the production of materials subject to War Production Board orders and regulations.

These violations have hampered and impeded the war effort of the United States by diverting scarce material to uses unauthorized by the War Production Board.

In view of the foregoing: *It is hereby ordered*, That:

§ 1010.289 *Suspension Order S-289.* (a) Max Greenberg and Irwin Green, doing business as Absoproof Weatherstrip and Caulking Company and Century Metal Strip Products Company or otherwise, their successors and assigns, shall not purchase, accept delivery of, sell, install, deliver or otherwise deal in any copper or copper base alloy building material, as defined in Supplementary Limitation Order M-9-c-4, except as specifically authorized in writing by the War Production Board.

(b) Deliveries of material to Max Greenberg and Irwin Green, doing business as Absoproof Weatherstrip and Caulking Company and Century Metal Strip Products Company or otherwise, their successors and assigns, shall not be accorded priority over deliveries under any other contract or order, and no preference rating shall be applied, assigned, or extended to such deliveries by any preference rating order, preference rating certificate, general preference order or any other order or regulation of the War Production Board, except to enable them to fill orders bearing Preference Rating AA-2X or higher and except as specifically authorized in writing by the War Production Board.

(c) No allocation shall be made to Max Greenberg and Irwin Green, doing business as Absoproof Weatherstrip and Caulking Company and Century Metal Strip Products Company or otherwise, their successors and assigns, of any materials the supply or distribution of which is governed by any order of the War Production Board, except to enable them to fill orders bearing Preference Rating AA-2X or higher and except as specifically authorized in writing by the War Production Board.

(d) Nothing contained in this order shall be deemed to relieve Max Greenberg and Irwin Green, doing business as Absoproof Weatherstrip and Caulking Company and Century Metal Products Company or otherwise, their successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board except in so far as the same may be inconsistent with the provisions hereof.

(e) This order shall take effect April 26, 1943 and shall expire on August 26, 1943, at which time the restrictions contained in this order are to be of no further effect.

Issued this 24th day of April 1943.

lyn, New York, is engaged in manufacturing electric fuses for distribution to wholesalers and jobbers. During the period from September 9 through December 30, 1942, the company violated Limitation Order L–161 by selling and delivering approximately 700,000 electric fuses on orders which did not bear any preference ratings. The company also violated Priorities Regulation No. 3 and Priorities Regulation No. 11 in that it improperly applied the preference rating assigned to it on its PD–25A certificate for the third quarter of 1942 to obtain more materials than it was authorized to obtain through the application of such rating.

These violations of orders and regulations of the War Production Board have hampered and impeded the war effort of the United States by diverting scarce material to uses unauthorized by the War Production Board. In view of the foregoing; *It is hereby ordered*, That:

§ 1010.296 *Suspension Order No. S–296.* (a) Deliveries of material to Rayjay Mfg. Co., Inc., its successors and assigns, shall not be accorded priority over deliveries under any other contract or order, and no preference rating shall be applied, extended, or assigned to such deliveries by any preference rating certificate, preference rating order, general preference order, or any other order or regulation of the War Production Board, except as specifically authorized in writing by the War Production Board.

(b) No allocation shall be made to Rayjay Mfg. Co., Inc., its successors and assigns, of any material the supply or distribution of which is governed by any order of the War Production Board, except as specifically authorized in writing by the War Production Board.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–298]

EMPIRE ELECTRIC MFG. COMPANY

W. J. Gorman, Philip France and Nate France, co-partners doing business as the Empire Electric Manufacturing Company, 673 West Madison Street, Chicago, Illinois, are engaged in the business of manufacturing and selling electric and fluorescent lighting fixtures. From June 13, 1942 to October 19, 1942 the Empire Electric Manufacturing Company sold approximately 2500 new fluorescent lighting fixtures in violation of Limitation Order L–78. After October 31, 1942, the Empire Electric Company used steel to partially manufacture approximately 600 reflectors for fluorescent lighting fixtures in violation of Limitation Order L–78. Between July 8, 1942 and November 12, 1942, the company sold approximately 1884 pounds of copper wire in violation of General Preference Order M-9-a. Between June 13, 1942 and November 16, 1942 the Empire Electric Manufacturing Company violated Priorities Regulation No. 3 by applying or extending preference ratings to obtain copper wire and iron and steel in excess of the specific quantities authorized. The company, in violation of Priorities Regulation No. 1, failed to keep complete records of its inventories, production and sales of fluorescent and electric lighting fixtures, and although it was a Class I producer, failed to operate as a Production Requirements Plan Unit after June 30, 1942 as required by Priorities Regulation No. 11. After November 20, 1942, the company furthermore, violated a specific order of the Director General for Operations of the War Production Board by continuing to manufacture and assemble fluorescent lighting fixtures.

The conduct of the Empire Electric Manufacturing Company was not only marked by careless disregard of whether its activities were governed by several of the above orders and regulations, but it consciously violated other of the above-mentioned orders and regulations. These wilful violations have hampered and impeded the war effort of the United States by diverting scarce materials to uses unauthorized by the War Production Board.

In view of the foregoing facts, *It is hereby ordered*, That:

§ 1010.298 *Suspension Order S–298.* (a) W. J. Gorman, Philip France and Nate France, doing business as the Empire Electric Manufacturing Company or otherwise, their successors and assigns, shall not manufacture, process, assemble, sell, deliver, or otherwise transfer any fluorescent lighting fixture, as defined in Limitation Order L–78, or any component part thereof, except with the written approval of the Regional Compliance Chief, Chicago Regional Office, War Production Board.

(b) Deliveries of material to W. J. Gorman, Philip France and Nate France, doing business as the Empire Electric Manufacturing Company or otherwise, their successors and assigns, shall not be accorded priority over deliveries under any other contract or order and no preference ratings shall be assigned, applied, or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders, or any other orders or regulations of the War Production Board, except as specifically authorized in writing by the War Production Board.

(c) No allocations shall be made to W. J. PART 3176—VALVES AND VALVE PARTS

[Limitation Order L–252, as Amended April 24, 1943]

The fulfillment of requirements for the defense of the United States has created a shortage of steel, copper, and other critical materials used in the manufacture of valves and valve parts, for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3176.1 *Limitation Order L–252*—(a) *Definitions.* Wherever used in this order:

(1) "Producer" means any person who manufactures valves and valve parts.

(2) "Valves" means gate, globe, angle, cross, lift check, angle check, or swing check valves (including variations of those types, such as the valves generally referred to as quick opening, blow off, hose end, Y-type and hydraulic), except drilling through and flow line valves for oil production service. This definition does not include valves of the types generally referred to as "specialties".

(3) "Valve parts" means parts for valves as defined above.

(4) "Put into process" means to process, machine, or fabricate or in any other manner alter any material by physical or chemical means.

(b) *Limitations.* Except as specifically authorized by the War Production Board, no producer shall after May 1, 1943, put into process or cause to be put into process, any material to be incorporated into valves or valve parts, except for the manufacture of valves and valve parts which conform to the specifications contained in the Appendix attached to and a part of this order, or for the manufacture of:

(1) Valves

(i) The bodies or bonnets of which were cast or forged before May 1, 1943;

(f) *Records.* Each producer shall retain in his files for a period of two years records showing his inventory and production of all valves, including those for the manufacture of which material was put into process subsequent to May 1, 1943. These records shall be kept readily available and open to inspection by duly authorized representatives of the War Production Board.

(g) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate referring to the particular provision appealed from and stating fully the grounds of the appeal.

APPENDIX

[Part 3, paragraphs 3 (b), (f), 4 (b), (f), (g), 5 (f), (g) are amended April 24, 1943]

Specifications for Valves and Valve Parts

The following specifications govern the manufacture of valves and valve parts. These specifications do not purport to contain any recommendations regarding the most efficient or safe use of any valve or valve parts covered herein.

Certain of the terms used in this appendix (including the terms valves and valve parts) are defined in the body of this order, L–252. In addition, certain exceptions are made, and certain obligations imposed upon producers and others. You should, therefore, be thoroughly familiar with the body of the order before reading this appendix.

PART 1

Iron Gate, Globe, Angle, Cross, and Check Valves and Valve Parts

1. *Standard size schedule: Iron valves.* (a) Valves shall be manufactured only in the pressure classes listed in Table 1 and in the particular sizes, specified in Table 2, which are comprehended within the size range specified in Table 1 for the particular pressure class:

[1] The primary pressure classification designates a class of valves and does not necessarily mean that all sizes in a given class carry the primary pressure classification. American Standards Association standards and manufacturers practice frequently reduce the pressure ratings as size increases, and may not always rate valves for both steam and water.

[2] In sizes 3" and smaller the 150# and 300# primary pressure classification valves are included as substitutes for brass valves. Flanged valves may be rated in accordance with the American Flange Standard used.

NOTE: Other valve end connections in common use on the date of issuance of this order, including among others, the types known as Victaulic, Dresser and Universal, may be manufactured, but only in accordance with the specifications listed in Table 1. For the purposes of this order, "common use" means use by at least ten companies.

(2) "Construction" means the erection, construction, reconstruction, restoration, or remodeling of any structure or project, or additions thereto or extensions or alterations thereof, but not including:

(i) "Maintenance and repair" as defined in paragraph (a) (12);

(ii) The excavation or other movement of earth where no material except earth or other unprocessed material is to be incorporated.

(3) "Residental construction" means any construction where the principal designed function of the structure or project is or will be to provide living space or accommodations.

(4) "Multiple residential construction" means any residential construction where the principal designed function of the structure or project is or will be to provide living space or accommodations for six or more families, or which is divided or to be divided into six or more suites.

(5) "Agricultural construction" means any construction, (other than residential construction), where the principal designed function of the structure or project is or will be the production of agricultural products including, but not limited to, those produced by farmers, planters, ranchmen, dairymen, poultrymen, or nut or fruit growers.

(6) "Industrial construction" means any construction where the principal designed function of the structure or project is or will be the manufacture, processing or assembling of goods or materials.

(7) "Other restricted construction" means any construction, other than residential, multiple residential, agricultural, or industrial construction, including, but not limited to, commercial, highway, roadway, sub-surface, railroad, and utilities construction, whether publicly or privately financed.

(8) "Project" means all separate structures or units of construction situated in close proximity to each other and integrated to serve a single general use; it does not mean a particular construction operation or job. In no case shall a single structure or unit of construction be subdivided into more than one project for the purpose of this order.

(9) "Begin construction" means to initiate construction, or to resume construction which has not been carried on as one continuous construction job, by physically incorporating or installing into a structure or project on the site, material which is to be an integral part of the structure or project.

(10) "Cost" shall be the sum of the total cost or value, whichever is higher, of the following (except as qualified in (a) (11) below):

(i) Material which is to be an integral part of the structure or project, including articles, chattels, or fixtures which are to be physically incorporated in and used as a part of the structure or project, or are to be so substantially affixed thereto that they cannot be detached without materially injuring them or the structure or project;

However, different materials may be used and different types of articles, chattels or

fixtures (but of the same general nature) may be incorporated, provided that there are no such structural alterations or changes in design. No building operation or job may be part construction and part maintenance and repair, as the terms are used herein, but if any construction is to be done, the entire building operation or job is construction. Maintenance and repair does not include the reconstruction or restoration of a structure or project or portion thereof destroyed by fire, flood, tornado, earthquake, act of God or the public enemy.

Chapter XI—Office of Price Administration

PART 1305—ADMINISTRATION

[Gen. RO 5,[1] Amendment 16]

FOOD RATIONING FOR INSTITUTIONAL USERS

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

General Ration Order No. 5 is amended in the following respects:

1. Section 5.4 is added to read as follows:

SEC. 5.4 *Future allotments for certain Group II or III institutional users.* (a) Because of transportation difficulties or unusually long distances from markets, some Group II or III institutional users must obtain rationed foods to last for more than one allotment period. When such institutional users apply for allotments pursuant to section 5.3 (b), they may also apply in writing, for allotments to be used in later allotment periods. (An allotment to be used in a later allotment period is called a future allotment.) The board may, for good cause, permit an application for a future allotment to be made at any other time.

(b) If the board finds that the applicant meets the tests set out in paragraph (a), it may grant the future allotment required by him.

(c) Each future allotment of a rationed food shall be equal in amount to the last allotment granted on application made pursuant to section 5.3(b). (For example on May 1, 1943, an applicant applies pursuant to section 5.3(b) for an allotment of sugar for May and June, and a future allotment for July and August. If his allotment for May and June is 500 pounds, the board may grant an allotment of an additional 500 pounds for July and August.)

(d) When an applicant who has received a future allotment next applies for allotments pursuant to section 5.3(b), the board shall compute the allotment which he would have received pursuant to that section for the allotment period covered by the future allotment. If the amount of a future allotment exceeds the amount of the allotment he would have been entitled to receive for that period pursuant to section 5.3(b), the difference shall be deducted from the allotment for which he is applying. If the amount of the future allotment is less than the amount which he would have been entitled to receive, the difference shall be added to the allotment for which he is applying.

2. The head note of section 10.1 is amended to read as follows:

SEC. 10.1 *Group II and III Seasonal Users.*

3. Section 10.3 is added to read as follows:

SEC. 10.3 *A Group I seasonal user may obtain a certificate in certain cases.* (a) A Group I institutional user is a seasonal user with respect to an establishment which is not in operation during every month in the year.

(b) A Group I seasonal user who must get rationed foods before the persons who will eat at his establishment arrive may apply for certificates for rationed foods to be used until he can obtain such foods with the ration books of those persons. If, because of transportation difficulties or unusually long distances from markets, the applicant finds it a hardship to acquire supplies of rationed foods as each successive stamp or series of stamps in war ration books become valid, he may include in his application a request for certificates covering a longer period.

(c) Application must be made to the board in writing and must show:

(1) The name, address and business of the applicant;

(2) The date on which such persons will arrive at his establishment;

(3) The earliest date thereafter on which rationed foods can be obtained with the books of such persons;

(4) The number of persons he expects to serve during the period covered by the application (in estimating the number of persons to be served, an individual is counted separately for each occasion on which he is served but no one individual may be counted more than three (3) times on any one day;

(5) Where the applicant includes in his application a request for certificates covering a longer period, the period of time for which his purchasing must be done.

(d) The board may issue certificates for an amount of a rationed food computed by multiplying the allowance per person for that food by the number of persons which it determines will be served during the period for which such certificates are required.

(e) An institutional user who has received a certificate under this Section must give up, to the board, stamps or certificates equal to the amount of the certificate issued to him. Only stamps taken from the war ration books of the individuals eating in his establishment, or certificates received from them may be given up. He must give them up within 60 days after receiving the certificate. However the board may, for good cause, give him additional time.

(f) An institutional user who obtains an allotment pursuant to section 26.1 of this order may not receive a certificate under this section for the same purpose.

4. Section 27.1 (b) (1) is amended to read as follows:

(1) The number of employees, the period of time covered by the application, and the place where such employees will be fed;

This amendment shall become effective on April 29, 1943.

RATIONALE ACCOMPANYING AMENDMENT NO. 17 TO RATION ORDER 13

1. Certain industrial users had on hand, as a result of seasonal purchases or other circumstances, very large stocks of a few kinds of processed foods and very small stocks of other kinds of processed foods. The large stocks may represent the user's entire allotment, not only for the first allotment period, but for periods running beyond that. He might thereby be prevented from making products which require other kinds of processed foods. He would not be able to obtain additional processed food until he had consumed a substantial portion of those foods of which he had large amounts.

It is desirable to permit industrial users who have these unbalanced inventories to obtain additional stocks of the processed foods they need. Section 6.6 (f) is, therefore, added to permit this, with a provision to insure that an adjustment of this kind will not permanently increase the industrial user's inventory.

Issued this 23d day of April 1943.

No transcript of such conference shall be kept, but the officer authorized to conduct such conference shall incorporate in the record of the proceedings any written stipulations or agreements made at, or as a result of, the conference. (1) The rules of evidence prevailing in courts of law or equity shall not be controlling; and

(2) The presiding officer, having due regard to the need for expeditious decision and for fair treatment to the protestant, applicant, or petitioner, may restrict oral argument and the examination and cross-examination of witnesses: *Provided*, That in no event shall this section be construed to limit the right of the protestant, applicant, or petitioner to submit affidavits or other written evidence or arguments.

10. Section 1300.233 is amended to read as follows:

§ 1300.233 *Filing of briefs.* The presiding officer shall allow the protestant, applicant, or petitioner to file briefs or written arguments within such time as he shall designate.

11. Section 1300.234 (a) is amended to read as follows:

PART 1499—COMMODITIES AND SERVICES

[Order 414 Under § 1499.3 (b) of GMPR]

SELLERS OF ARTICLES MADE OF BLACK PLATE

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, pursuant to and under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, Executive Order 9250, and § 1499.3 (b) of the General Maximum Price Regulation, *It is hereby ordered:*

§ 1499.1652 *Authorization to sellers of articles made of black plate which were formerly made of hot-dip tin plate.* (a) On and after the effective date of this order, any person manufacturing and selling an article made of black plate which was formerly made of hot-dip tin plate is hereby specifically authorized to determine his maximum price for such article in the following manner: From the ceiling price per unit of sale established under § 1499.2 of the General Maximum Price Regulation for the article made of tin plate there shall be deducted the delivered cost of tin plate per unit when last used in manufacturing the article, and there shall be added the delivered cost of black plate per unit, including enamel, if any. The resulting figure shall be the maximum price of the article made of black plate. Any person may purchase such article from such seller at such price.

For example: 1. A producer of gallon cans formerly used ten base boxes of 100-pound tin plate to produce 1,000 cans. He paid $5.00 per base box, (less 2% for cash, plus $0.50 freight, for a net delivered cost of $54.00 per 1,000 cans. Black plate costs him $1.20 per hundred pounds, less 1½% for cash, plus $0.50 freight, and plus $1.00 for lacquering, or a total of $56.80. His ceiling price for the hot-dip cans was $70; the ceiling price for the black plate cans under this order becomes $72.80. 2. A producer of friction-top cans formerly used two base boxes of 95-pound hot-dip tin plate in making 1,000 cans. His net delivered cost per 1,000 cans was $10.60. The necessary black plate now costs $7.66, or $2.94 less. His ceiling price, for hot-dip cans was $20 per 1,000; the ceiling price for the black plate cans is $17.06.

(b) Any person determining his maximum price pursuant to this order shall within ten days of making such determination file with the Office of Price Administration, Washington, D. (c) This order applies only to articles for which maximum prices are established under the General Maximum Price Regulation, and not to any article for which maximum prices are established by any specific maximum price regulation, for example, Maximum Price Regulation No. 350—Packers' Tin Cans.

(d) This order may be revoked or amended by the Price Administrator at any time.

(b) Snap beans.
(c) Carrots.
(d) Cabbage.
(e) Green peas.
(f) Lettuce.
(g) Spinach.

The fresh fruits and vegetables listed above are referred to in this regulation as the "listed commodities".

SEC. 2 *Prohibition against buying and selling above maximum prices.* On and after April 24, 1943, regardless of any contract, agreement or other obligation, no person shall sell or deliver a listed commodity and no person in the course of trade or business shall buy or receive a listed commodity at a price higher than the maximum price permitted by this regulation; and no person shall agree, offer, solicit or attempt to do any of the foregoing. Lower prices than the maximum prices may be charged, demanded, paid or offered.

SEC. 3 *Maximum prices for certain fresh fruits and vegetables.* (a) The seller's maximum price for any listed commodity shall be the highest price charged by the seller to a purchaser of the same class during the period February 18, 1943 to February 22, 1943, inclusive, (as to tomatoes, snap beans, carrots, cabbage, and green peas) and during the period February 20, 1943 to February 24, 1943, inclusive, (as to lettuce and spinach) for the same listed commodity.

(b) If, during the applicable base period, a seller did not sell, deliver or otherwise deal in a listed commodity, such seller's maximum price for such listed commodity shall be the highest price charged during the applicable base period by his most closely competitive seller to a purchaser of the same class for such listed commodity.

(c) If the seller cannot determine his maximum price for a listed commodity under the foregoing, because neither he nor his most closely competitive seller of the same class delivered or offered for delivery such listed commodity to a purchaser of the same class during the applicable base period, he shall determine his maximum price by the following procedure applied in the following order:

(1) By taking the maximum price for the similar listed commodity most nearly like it which he (or, if none, his most closely competitive seller of the same class) charged a purchaser of the same class during the applicable base period;

(2) By taking the maximum price of the same commodity which he (or, if none, his most closely competitive seller of the same class) charged a different class of purchaser during the applicable base period and adjusting the price to reflect the customary differential between the two classes of purchasers.

(3) By taking the maximum price of the similar listed commodity most nearly like it which he (or, if none, his most closely competitive seller of the same class) charged a different class of purchaser during the applicable base period, and adjusting the price to reflect the customary differential between the two classes of purchasers.

(4) In all other cases, by taking the maximum price for the most nearly similar listed commodity that he (or, if none, his most closely competitive seller of the same class) has delivered or offered for delivery during the applicable base period and adjusting that price to reflect the differential between the two commodities normal or customary to his business or, if none, to reflect the reasonable differential between the two commodities based upon the variances in the cost of the two commodities.

(d) Where a maximum price is established by using the maximum price of the most nearly similar listed commodity, the base period shall be the base period applicable to that listed commodity and not that applicable to the listed commodity being priced.

SEC. 4 *Applications for adjustments of maximum prices and regional adjustments.* (a) If any seller finds that by reason of distress sales or other unusual conditions, his maximum price for any of the listed commodities is abnormally low in relation to the maximum prices for merchantable quality of the listed commodities established for other sellers of the same class, he may file an application for adjustment of his maximum price.

(b) Such application shall be filed with the State or district office of the Office of Price Administration for the area in which the applicant is located. Such applicant shall submit a statement setting forth:

(1) His name and address.
(2) The type of business establishment operated by him (for example, but not limited to, commission merchant, wholesaler, country shipper, terminal seller, etc.)
(3) The listed commodity for which he seeks an adjustment.
(4) His present maximum price.
(5) A full description of the sale which established his present maximum price, including:
(i) The date of the sale.
(ii) The name and address of the purchaser.
(iii) The type of business establishment operated by the purchaser.
(iv) The quantity sold.
(v) A full description of the condition of the merchandise when sold.
(vi) The maximum price.
(vii) The terms of the sale.
(6) The reasons why the applicant's present maximum price is abnormally low.

(c) Any regional office of the Office of Price Administration, or such other offices as may be authorized by the appropriate regional office, may by order adjust any maximum price established by this regulation for any seller, or group of sellers, in any area or locality within its jurisdiction whenever it appears that the maximum price established for such seller, or group of sellers, is higher or lower than the maximum prices generally prevailing in the region and thereby disrupts, or threatens to disrupt, the normal distribution of any listed commodity. When adjusted the maximum prices shall be fixed in line with those generally prevailing in the region.

SEC. 5 *Exempt sales.* This Maximum Price Regulation No. 376 shall not apply to the following:

(a) Deliveries to the United States, or any agency thereof, under contracts entered into prior to February 18, 1943 (as to tomatoes, snap beans, carrots, cabbage and green peas) and February 20, 1943 (as to lettuce and spinach).

(b) Sales and deliveries by a farmer of any listed commodity grown on his farm to a country shipper and sales and deliveries to an ultimate consumer, if during the preceding month the farmer's sales to ultimate consumers of all food and food products produced on his farm did not exceed $75. This regulation shall apply to any sales and deliveries by a farmer directly to wholesalers, retailers, and commercial, industrial and institutional users.

(c) Such sales at retail are now or may hereafter be covered by Maximum Price Regulation No. 268.[1]

SEC. 6 *Evasion.* The price limitations set forth in this regulation shall not be evaded, whether by direct or indirect methods, in connection with an offer, solicitations, agreement, sale, delivery, purchase or receipt of or relating to a listed commodity, alone or in conjunction with any other commodity, or by way of any commission, service, transportation, or other charge, or discount, premium, or other privilege, or by tying-agreement or other trade understanding, or by changing a business practice relating to the price lines, grading, labeling, packaging or branding of a listed commodity.

SEC. 7 *Sales for export.* The maximum prices at which a person may export a listed commodity shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation,[2] issued by the Office of Price Administration.

SEC. 8 *Records and reports.* (a) As to all sales not specifically exempted by other sections of this regulation, every person selling a listed commodity shall preserve for examination by the Office of Price Administration all his existing records relating to prices which he charged for such listed commodity, delivered or supplied during the applicable base period and his offering prices for delivery or supply of a listed commodity during such period; and shall prepare on or before May 15, 1943, on the basis of all available information and records, and thereafter keep for examination by any person during ordinary business hours, so long as the Emergency Price Control Act of 1942 remains in effect, a statement showing (1) the highest prices charged for such listed commodity during such period, together with an appropriate identification of such commodity, and (2) all his customary allowances, discounts, and other price differentials.

(b) As to all sales not specifically exempted by other sections of this regulation every person selling a listed commodity shall keep and make available for examination by the Office of Price Administration, so long as the Emergency Price Control Act of 1942 remains in effect, records of the same kind as he has customarily kept relating to the prices which he charges for such listed commodity and, in addition, records showing, as precisely as possible the basis upon which he determined maximum prices.

(c) Such persons shall submit such reports to the Office of Price Administration and keep such other records in addition to or in place of the records required in paragraphs (a) and (b) of this section as the Office of Price Administration may from time to time require.

SEC. 9 *Enforcement.* (a) Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions and suits for treble damages provided by the Emergency Price Control Act of 1942, as amended.

(b) Persons who have evidence of any violation of this regulation or of any price schedule, regulations, or order issued by the Office of Price Administration, or of any acts or practices which constitute such a violation are urged to communicate with the nearest district, State or regional office of the Office of Price Administration, or its principal office in Washington, D. C.

SEC. 10 *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,[3] and amendments, issued by the Office of Price Administration.

SEC. 11 *Relationship to the General Maximum Price Regulation.*[4] The following sections of the General Maximum Price Regulation, and amendments to them, shall be applicable to every person selling a listed commodity:

(a) *Adjustment of maximum prices in cases of special deals* (§ 1499.4).

(b) *Transfers of business or stock in trade* (§ 1499.5).

No seller shall change his customary allowances, discounts or other price differentials unless such change results in a lower price. No seller shall require any purchaser, and no purchaser shall be permitted to pay a larger proportion of transportation costs incurred in the delivery or supply of any listed commodity than the seller required purchasers of the same class to pay during the applicable base period on deliveries of a listed commodity.

(3) "Purchaser of the same class" refers to the practice followed by the seller in the ninety-day period preceding the first day of the applicable base period, in setting different prices for sales to different purchasers or kinds of purchasers (for example, but not limited to manufacturer, wholesaler, jobber, retailer, government agency, public institution, individual consumer, or any ordinarily recognized subgroup or combination of the foregoing) or for purchasers located in different areas or for different quantities or under different conditions of sale.

(b) Unless the context otherwise requires, the definitions set forth in section 302 of the Emergency Price Control Act of 1942, as amended, and in the General Maximum Price Regulation, issued by the Office of Price Administration, shall apply to other terms used herein.

DISTRICT BOARD 12

MEMORANDUM OPINION AND ORDER

In the matter of the petition of District Board No. 12 for the establishment of price classifications and minimum prices for Mine Index No. 519 and for other relief; Docket Nos. A–1907.

In the matter of the petition of District Board No. 12, requesting the establishment of absorptions of certain freight charges and a Federal Tax on transportation of certain locomotive fuels; Docket No. A–1907.

Memorandum opinion and order severing Docket No. A–1907, Part II, from Docket No. A–1907.

The original petition in the above-entitled matter filed with the Division on March 13, 1943, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, requested the establishment of temporary and permanent price classifications and minimum prices for the coals produced at Mine Index No. 519 of G. B. Jensen (Wilson Bridge Coal Co.) when shipped by rail and further requested that certain off-line mines in District No. 12 be granted permission to absorb certain freight charges and a federal tax on the transportation of certain rail shipments of locomotive fuel.

As was found in an order issued this day in Docket No. A–1907, a reasonable showing of necessity has been made for the granting of the relief requested by petitioner for Mine Index No. 519. With respect to the request that certain off-line mines in District No. 12 be granted permission to absorb certain freight charges and a federal tax on the transportation of certain rail shipments of locomotive fuel, however, it appears that the original petitioner has not set forth sufficient facts to warrant the granting of such relief, either temporary or permanent, without a hearing.

Now, therefore it is ordered, That the portion of Docket No. A–1907 relating to the request that certain mines in District No. 12 be granted permission to absorb certain freight charges and a federal tax on the transportation of certain rail shipments of locomotive fuel, be, and hereby is, severed from the remainder of Docket No. A–1907 and designated as Docket No. A–1907, Part II.

It is further ordered, That the request that this relief be granted temporarily, be, and the same hereby is, denied without prejudice to the renewal of such request for temporary relief upon further showing, or upon the basis of the record to be made at a hearing to be held herein.

An order scheduling a hearing to adduce facts upon which final relief in this matter may be based will be issued in due course.

Dated: April 22, 1943.

DISTRICT BOARD 2

MEMORANDUM OPINION AND ORDER

In the matter of the petition of District Board No. 2 for the establishment of price classifications and minimum prices for the coals of certain mines in District No. 2; Docket No. A–1949.

In the matter of the petition of District Board No. 2 for the establishment of price classifications and minimum prices for truck shipments for the coals produced at the Nagel Mine of Edgar H. Nagel in District No. 2; Docket No. A–1949, Part II.

Memorandum opinion and order severing Docket No. A–1949, Part II, from Docket No. A–1949 and granting temporary relief in Docket No. A–1949, Part II.

The original petition in the above-entitled matter, filed with the Division pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, prays for the establishment of temporary and permanent price classifications and minimum prices for Truck Shipment for the coals produced at the Nagel Mine of Edgar H. Nagel in District No. 2. It appears, however, that mine index numbers have heretofore been assigned to this same mine and that from the facts alleged in this petition no final determination can be made at this time with regard to the assigning an additional mine index number to this mine without a hearing.

In view of the foregoing, it is deemed advisable to grant only temporarily the request of petitioner to establish minimum prices and price classifications for the coals produced at the aforementioned mine.

It appearing that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The following action being deemed necessary in order to effectuate the purposes of the Act;

Now, therefore, it is ordered, That the portion of Docket No. A–1949 relating to the request of petitioner to establish minimum prices and price classifications for coals to be produced at the Nagel Mine of Edgar H. Nagel be, and it hereby is, severed from the remaining part of that Docket and designated as Docket No. A–1949, Part II.

It is further ordered, That, pending further order of the Director, temporary relief be, and the same hereby is, granted as follows: Commencing forthwith, the schedule of effective minimum prices for District No. 2 for Truck Shipments is supplemented to include the price classifications and minimum prices appearing in Supplement T which is annexed hereto and made a part hereof.

It is further ordered, That pleadings in opposition to that portion of the original petition in the above-entitled matter which pertains to the Nagel Mine of Edgar H. Nagel, and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division pursuant to the rules and regulations governing practice and procedure before the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

An order scheduling a hearing to adduce facts upon which final relief in this matter may be based will be issued in due course.

Dated: April 22, 1943.

UNIVERSAL SEWER PIPE CORP.

MEMORANDUM OPINION AND ORDER

In the matter of the application for exemption of Universal Sewer Pipe Corporation.

On January 16, 1943, Universal Sewer Pipe Corporation filed an application pursuant to the second paragraph of section 4-A of the Bituminous Coal Act of 1937, requesting a determination that the coal produced at a mine of the applicant located at Uhrichsville, Tuscarawas County, Ohio, is exempt from the provisions of section 4 of the Act because the applicant is both the producer and the consumer of the coal produced at the said mine within the meaning of section 4 II (1) of the Act, and further requesting that such determination be made retroactive to December 15, 1937.

The applicant represents that it operates plants at Uhrichsville, Goshen, and Palmyra, Ohio, for the manufacture of vitrified clay products; that it consumes large quantities of bituminous coal in the burning of its vitrified clay products; that the coals produced at the aforesaid mine, which was acquired in 1919, are used primarily at the applicant's Uhrichsville plant; and that any such coals not consumed at the Uhrichsville plant are consumed at the Goshen plant. The applicant further represents that the actual mining operations connected with the production of the coal coming from the said mine are performed by the applicant through its own employees and that no subsidiary company is involved in the mining operations and no salesmen or brokers are involved in the disposition of the coal produced at this mine.

It appearing on the basis of the representations made by the applicant that coal of the said mine is both produced and consumed by the applicant within the meaning of section 4 II (1) of the Bituminous Coal Act of 1937;

Now, therefore, it is ordered, That in accordance with the provisions of the second paragraph of section 4-A of the Bituminous Coal Act of 1937, Universal Sewer Pipe Corporation is exempt as of January 16, 1943, from any obligation, duty or liability imposed by section 4 of the Act with respect to the commerce covered by its application herein, *Provided, however*, That the exemption established by this paragraph is subject to further order, and provided, further, that this paragraph shall not become effective until sixty (60) days from the date hereof.

It is further ordered, That, subject to the provisions of Rule VIII of the Rules of Practice and Procedure Before the Bituminous Coal Division, interested parties may file petitions of intervention in this matter within forty-five (45) days from the date hereof.

It is further ordered, That the exemption granted herein shall terminate if the applicant shall fail at the end of each six-month period from the date hereof, to file with the Division a verified statement setting forth (a) the name of the applicant and of the coal mine involved herein; (b) the tonnage produced during the preceding six months by size groups; (c) the distribution by size groups during the preceding six months; and (d) a statement that all the facts as set forth in the original application continue to be true and correct.

It is further ordered, That the request that any exemption granted in this matter be made retroactive to December 15, 1937, be, and the same hereby is, denied.

In connection with the request that any exemption which may be granted herein be made retroactive to December 15, 1937, it is noted that on April 10, 1943, applicant was granted code membership effective as of December 15, 1937.

Dated: April 22, 1943.

(a) Between April 20, 1941, and May 1, 1941, selling 100 tons of high volatile 2" x 0 coal, Size Group 7, produced at the Fox Mine, at a price of 50 cents per net ton f. o. b. the mine, whereas the effective minimum price for such coal was $1.55 per net ton f. o. b. the mine; and

(b) On May 3, 1941, selling 31 tons of high volatile lump coal, Size Group 1, likewise produced at the Fox Mine, at a price of $1.50 per net ton f. o. b. the mine, whereas the effective minimum price for such coal was $2.55 per ton f. o. b. the mine.

The Examiner recommended that an order be entered requiring code member Arthur Fox to cease and desist from selling coal at prices below the applicable minimum prices established by the Division or from otherwise violating the Act, the Code, and orders, rules and regulations issued thereunder, and recommended further that the complaint be dismissed as to Elbert Engle and as to Fox and Engle.

Opportunity was afforded to all parties to file exceptions to the Examiners' Report. No exceptions have been filed.

I have considered the report of the Examiner and find that it adequately and accurately reflects the evidence disclosed in the record. Upon the basis of the proposed findings of fact, proposed conclusions of law, and recommendation set forth in the report, and upon the entire record in this proceeding:

It is hereby ordered, That the proposed findings of fact and proposed conclusions of law of the Examiner are approved and adopted as the findings of fact and conclusions of law of the Director.

SEC. 3 *Reports of Handlers*—(a) *Submission of reports.* Each handler shall report to the market administrator, in the detail and on forms prescribed by the market administrator, as follows:

(1) On or before the 7th day after the end of each delivery period, each handler who purchases or received milk from associations of producers and other handlers, with respect to all milk purchased or received from such sources, shall submit to the market administrator and to the association of producers or handlers from whom the milk was purchased, a record of the utilization of such milk, classified pursuant to section 4.

(b) *Verification of reports and payments.* The market administrator shall verify all reports and payments of each handler by audit of such handler's records, and of the records of any other handler or person upon whose disposition of milk such handler claims classification. Each handler shall keep adequate records of receipts and utilization of milk and shall, during the usual hours of business, make available to the market administrator or his representative such records and facilities as will enable the market administrator to:

(1) Verify the receipts and disposition of all milk required to be reported pursuant to this section, and, in case of errors or omissions ascertain the correct figures;

(2) Weigh, sample, and test for butterfat content the milk received from producers and any product of milk upon which classification depends; and

(3) Verify the payments to producers prescribed in section 8.

SEC. 4 *Classification of milk*—(a) *Basis of classification.* All milk purchased or received by a handler from producers, associations of producers, and other handlers, including milk produced by him, if any, and including milk or cream purchased or received from sources other than producers or handlers, shall be reported by the handler in the classes set forth in paragraph (b) of this section: *Provided*, That (1) any milk moving as fluid milk from any handler's plant to a plant of a nonhandler who distributes fluid milk shall be classified as Class I milk and any cream moved in the form of cream to such nonhandler shall be classified as Class II milk, except for milk or cream in excess of the amount of Class I or Class II milk distributed by the nonhandler; (2) any milk or cream moving from a handler's plant to a plant of a nonhandler, who does not distribute fluid milk shall be classified according to its use by such nonhandler subject to verification by the market administrator; (3) any milk moving from the handler's plant where the milk was first received from producers to the plant of a second handler, which has manufacturing facilities, shall be Class I milk if moved from the second handler's plant as fluid milk, and Class II if moved as cream; and (4) any milk moving from the handler's plant where the milk was first received from producers to a second handler's plant which has no manufacturing facilities may be classified according to its utilization by a third handler: *And provided further*, That in the case of the sale of milk or cream by a handler to a person who is a handler under another Federal milk agreement or order, such milk may be classified on a prorata basis.

(b) *Classes of utilization.* Subject to the conditions set forth in paragraph (a) of this section, the classes of utilization of milk shall be as follows:

(1) Class I milk shall be all milk disposed of in the form of fluid milk, including bulk milk disposed of to bakeries, hotels, restaurants, and other retail food establishments, and all milk not accounted for as Class II milk, Class III milk, or Class IV milk.

(2) Class II milk shall be all milk, except skim milk, disposed of in the form of flavored milk and flavored milk drinks, and all milk, the butterfat from which is disposed of in the form of sweet or sour cream, cottage cheese, and buttermilk.

(3) Class III milk shall be all milk the butterfat from which is used to produce a milk product other than one of those specified in Class II and Class IV including frozen cream, ice cream, and ice cream mix.

(4) Class IV milk shall be all milk the butterfat from which is used to produce butter and cheese, except cottage cheese, and all milk accounted for as actual plant shrinkage: *Provided*, That such plant shrinkage shall not exceed 3 percent of the total receipts of milk from producers and from the handler's own production. Any handler whose report claimed the original classification of milk in this class shall be liable under the provisions of section 8 (f) for the difference between the Class IV and Class III prices for the delivery period in which the Class IV classification was claimed on any such milk, if the butterfat used in the production of butter is subsequently used in the production of ice cream or ice cream mix.

(c) *Responsibility of handlers in establishing the classification of milk.* In establishing the classification of milk as required in paragraph (b) of this section, the responsibilities of handlers in establishing the classification of milk received by them shall be as follows:

(1) In establishing the classification of any milk received by a handler from producers, the burden rests upon the handler who receives the milk from producers to account for the milk and to prove to the market administrator that such milk should not be classified as Class I milk.

(2) With respect to milk, or skimmed milk, disposed of to another handler, the burden rests upon the handler who purchased the milk from producers to account for the milk, or skimmed milk, and to prove to the market administrator that such milk, or skimmed milk, should not be classified as Class I milk: *Provided*, That if verification by the market administrator discloses a higher utilization than that reported for milk purchased by a handler from a cooperative association, the market administrator shall notify the purchasing handler and such handler shall within 5 days after notification by the market administrator make adjustment to such cooperative association on the basis of such higher utilization as verified by the market administrator.

(d) *Computation of milk in each class.* For each delivery period, each handler shall compute, in the manner and on forms prescribed by the market administrator, the amount of milk in each class, as defined in paragraph (b) of this section, as follows:

(1) Determine the total pounds of milk (a) received from producers, (b) produced by him, if any, (c) received from other handlers, if any, (d) received from other sources, if any, and (e) add together the resulting amounts.

(2) Determine the total pounds of butterfat received as follows: (a) multiply the weight of the milk received from producers by its average butterfat tests, (b) multiply the weight of the milk produced by him, if any, by its average butterfat test, (c) multiply the weight of the milk received from other handlers, if any, by its average butterfat test, (d) multiply the weight of the milk received from other sources, if any, by its average butterfat test, and (e) add together the resulting amounts.

(3) Determine the total pounds of milk in Class I as follows: (a) convert to quarts the quantity of milk disposed of in the form of milk, and multiply by 2.15, (b) multiply the result by the average butterfat test of such milk, and (c) if the quantity of butterfat so computed when added to the pounds of butterfat in Class II milk, Class III milk, and Class IV milk, computed pursuant to subparagraphs (4) (b), (5) (b), and (6) (c) of this paragraph, is less than the total pounds of butterfat received, computed in accordance with subparagraph (2) of this paragraph, an amount equal to the difference shall be divided by 3.5 percent and added to the quantity of milk determined pursuant to (a) of this subparagraph.

(4) Determine the total pounds of milk in Class II as follows: (a) multiply the actual weight of each of the several products of Class II milk by its average butterfat test, (b) add together the resulting amounts, and (c) divide the result obtained in (b) of this subparagraph by 3.5 percent.

(5) Determine the total pounds of milk in Class III as follows: (a) multiply the actual weight of each of the several products of Class III milk by its average butterfat test, (b) add together the resulting amounts, and (c) divide the result obtained in (b) of this subparagraph by 3.5 percent.

(6) Determine the total pounds of milk in Class IV as follows: (a) multiply the actual weight of each of the several products of Class IV milk by its average butterfat test, (b) add together the resulting amounts, (c) subtract the total pounds of butterfat in Class I milk, Class II milk, and Class III milk, computed pursuant to subparagraphs (3) (b), (4) (b), and (5) (b) of this paragraph, and the total pounds of butterfat computed pursuant to (b) of this subparagraph, from the total pounds of butterfat computed pursuant to subparagraph (2) of this paragraph, which resulting quantity shall be allowed as plant shrinkage for the purposes of this paragraph (but in no event shall such plant shrinkage allowance exceed 3 percent of the total receipts of butterfat from producers by the handler) and shall be added to the result obtained in (b) of this subparagraph, and (d) divide the result obtained in (c) of this subparagraph by 3.5 percent.

(7) Determine the classification of milk received from producers as follows:

(i) Subtract from the total pounds of milk in each class the total pounds of milk which were received from other handlers and used in such class.

(ii) Subtract from the total pounds of milk in each class the total pounds of milk which were received from sources other than producers and handlers and used in such class.

(iii) Subtract pro rata out of the remaining milk in each class the quantity of milk received from the handler's own farm.

section 5 (a) (2), without any adjustment for transportation.

(b) *Computation of the uniform price.* The market administrator shall com-

render such handler a transcript of his account.

(iv) Except as set forth in paragraph (e) of this section, the result shall be known as the "net pooled milk" in each class.

(e) *Reconciliation of utilization of milk by classes with receipts of milk from producers.* In the event of a difference between the total quantity of milk utilized in several classes as computed pursuant to paragraph (d) of this section and the quantity of milk received from producers, except for excess milk or milk equivalent of butterfat pursuant to section 6 (c), such difference shall be reconciled as follows:

(1) If the total utilization of milk in the various classes for any handler, as computed pursuant to paragraph (d) of this section, is less than the receipts of milk from producers, the market administrator shall increase the total pounds of milk in Class IV for such handler by an amount equal to the difference between the receipts of milk from producers and the total utilization of milk by classes for such handler, which result shall be known as the "net pooled milk" in each class.

(2) If the total utilization of milk in the various classes for any handler, as computed pursuant to paragraph (d) of this section, is greater than the receipts of milk from producers, the market administrator shall decrease the total pounds of milk in Class IV for such handler by an amount equal to the difference between the receipts of milk from producers and the total utilization of milk by classes for such handler, which result shall be known as the "net pooled milk" in each class.

SEC. 5 *Minimum prices*—(a) *Class prices.* (1) Except as set forth in paragraph (d) of this section and subject to the differentials set forth in paragraph (c) of this section, each handler shall pay, at the time and in the manner set forth in section 8, for milk purchased or received by such handler at any plant where accepted from producers, not less than the prices set forth in this paragraph. Any handler who purchases or receives, during any delivery period, milk from a cooperative which is also a handler shall, on or before the 15th day after the end of the delivery period, pay such cooperative association in full for such milk at not less than the minimum class prices, with appropriate differentials, applicable pursuant to this section.

(2) *Class I milk.* The price per hundredweight for Class I milk during each delivery period shall be the price determined pursuant to paragraph (b) of this section, plus 65 cents.

(3) *Class II milk.* The price per hundredweight for Class II milk during each delivery period shall be the price determined pursuant to paragraph (b) of this section, plus 40 cents.

(4) *Class III milk.* The price per hundredweight for Class III milk shall be the average, as computed by the market administrator, of basic prices ascertained to have been paid for milk containing 3.5 percent butterfat during the delivery period delivered at the following plants:

Goshen Milk Condensing Co..	Goshen, Ind.
Litchfield Creamery Co.....	Warsaw, Ind.
New Paris Creamery Co.....	New Paris, Ind.

Provided, That if any of such plants fails to report the price paid for milk so purchased during the delivery period the price per hundredweight for Class III milk shall be the average computed by the market administrator of prices, as reported by the United States Department of Agriculture, paid during such delivery period to farmers at each of the manufacturing plants or places listed in this subparagraph for which prices are reported, but in no event shall such price be less than the price computed pursuant to subparagraph (5) of this paragraph.

(5) *Class IV milk.* Multiply by 3.5 the average price per pound of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture for the delivery period during which such milk was received, and add 20 percent: *Provided,* That such price shall be subject to the following adjustments: (1) add 3½ cents per hundredweight for each full one-half cent that the price of dry skim milk for human consumption is above 5½ cents per pound, or (2) subtract 3½ cents per hundredweight for each full one-half cent that the price of such dry skim milk is below 5½ cents per pound. For purposes of determining this adjustment the price per pound of dry skim milk to be used shall be the average of the carlot prices for dry skim milk for human consumption, f. o. b. manufacturing plant, as published by the United States Department of Agriculture for a Chicago area during the delivery period, including in such average the quotations published for any fractional part of the previous delivery period which were not published and available for the price determination of such dry skim milk for the previous delivery period. In the event the United States Department of Agriculture does not publish carlot prices for dry skim milk for human consumption, f. o. b. manufacturing plant, the average of the carlot prices for dry skim milk for human consumption, delivered at Chicago, shall be used. In the latter event the Class IV price shall be subject to the following adjustments: (1) add 3½ cents per hundredweight for each full one-half cent that the price of dry skim milk for human consumption, delivered at Chicago, is above 7½ cents per pound, or (2) subtract 3½ cents per hundredweight for each full one-half cent that such price of dry skim milk is below 7½ cents per pound.

(b) *Basic formula price to be used in determining Class I and Class II prices.* The basic formula price to be used in determining the prices per hundredweight of Class I and Class II milk, set forth in this section, shall be the price for Class III milk determined pursuant to paragraph (a) (4) of this section, the price for Class IV milk determined pursuant to paragraph (a) (5) of this section, or that derived from the following formula, whichever is the highest:

(1) Multiply the average wholesale price per pound of 92-score butter at Chicago for the delivery period as reported by the United States Department of Agriculture, by six (6);

(2) Add 2.4 times the average weekly prevailing price per pound of "Twins" during the delivery period on the Wisconsin Cheese Exchange at Plymouth, Wisconsin: *Provided,* That if the price of "Twins" is not quoted on the Wisconsin Cheese Exchange the weekly prevailing price of "Cheddars" shall be deemed to be the prevailing price for "Twins" and shall be used in determining the price pursuant to this formula;

(3) Divide by seven (7), the sum so determined being hereafter referred to in this paragraph as the "combined butter and cheese value";

(4) To the combined butter and cheese value add 30 percent thereof; and

(5) Multiply the sum computed in subparagraph (4) of this paragraph by 3.5.

(c) *Butterfat differential to handlers.* If any handler has purchased or received milk from producers containing more or less than 3.5 percent butterfat, such handler shall add or deduct, per hundredweight of milk, for each one-tenth of 1 percent butterfat above or below 3.5 percent, an amount computed as follows: to the average price per pound of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture for the delivery period during which the milk was received, add 20 percent and divide the result obtained by 10.

(d) *Sales outside the marketing area.* (1) The price to be paid by a handler for Class I milk disposed of outside the marketing area, in lieu of the price otherwise applicable pursuant to this section, except as provided in subparagraph (2) of this paragraph, shall be the price, as ascertained by the market administrator, which is being paid for milk of equivalent use in the market where such milk is disposed of: But in no event shall such price be more than 20 cents per hundredweight below the price for Class I milk disposed of within the marketing area.

(2) The price to be paid by a handler for Class I milk, disposed of outside the marketing area, for which no price can be ascertained as provided in subparagraph (1) of this paragraph, including Class I milk disposed of to Government institutions and establishments shall be the price for Class I milk set forth in section 5 (a) (2), without any adjustment for transportation.

SEC. 6 *Application of provisions*—(a) *Handlers who are also producers.* No provisions hereof shall apply to a handler whose sole sources of supply are receipts from his own production and from other handlers, except that such handlers shall make reports to the market administrator at such time and in such manner as the market administrator may request.

(b) *Payment for milk received from sources determined as other than from producers or other handlers.* If any handler has purchased or received milk or butterfat from sources determined as other than producers or other handlers, the market administrator, in computing the value of milk for such handler pursuant to section 7, shall consider such milk or the milk equivalent of such butterfat as Class IV milk. If the receiving handler uses such milk or butterfat for other than Class IV purposes, such handler shall pay to producer, through the producer-settlement fund, the difference between (a) the value of such milk or butterfat at the Class IV price and (b) the value according to its actual utilization by the handler. This provision shall not apply to milk or butterfat from sources determined as other than producers or handlers, if such handler can prove to the market administrator that such milk or butterfat was used for purposes which did not violate any regulations issued by the various health authorities in the marketing area.

(c) *Payment for excess milk or butterfat.* In the event that a handler, after subtracting receipts from his own production, receipts from other handlers, and receipts from sources determined as other than producers or other handlers, has disposed of milk and/or butterfat in excess of the milk and/or butterfat which, on the basis of his reports, has been credited to his producers as having been delivered by them, such handler shall pay to producers, through the producer-settlement fund, the value of such milk and/or the milk equivalent of such butterfat in accordance with its utilization.

SEC. 7 *Determination of uniform price*—(a) *Net pool obligation of handlers.* Subject to the provisions of section 6, the net pool obligation of each handler for milk received from producers during each delivery period shall be a sum of money computed for such delivery period as follows:

(1) Multiply the "net pooled milk" in each class, computed pursuant to section 4, by the class price, with appropriate differentials applicable pursuant to section 5 (c) and (d), and add together the resulting values.

(2) Deduct, if the average butterfat content of all milk received from producers is in excess of 3.5 percent, and add, if the average butterfat content of all milk received from producers is less than 3.5 percent, the total value of the butterfat differential applicable pursuant to section 8 (b).

(b) *Computation of the uniform price.* The market administrator shall compute the uniform price per hundredweight of milk for each delivery period in the following manner:

(1) Combine into one total the net pool obligations of all handlers, computed pursuant to paragraph (a) of this section, who made the reports pursuant to section 3 (a) (2) for such delivery period;

(2) Add the amount of cash balance in the producer-settlement fund;

(3) Divide the result by the total quantity of net pooled milk of all handlers whose reports are included in this computation; and

(4) Subtract not less than 4 cents nor more than 5 cents to provide against the contingency of errors in reports and payments or of delinquencies in payments by handlers. The result shall be known as the uniform price for milk containing 3.5 percent butterfat received from producers at plants located within the 70-mile zone.

SEC. 8 *Payment for milk*—(a) *Time and method of payment.* On or before the 18th day after the end of each delivery period each handler shall pay each producer, for milk purchased or received during the delivery period, an amount of money representing not less than the total value of such milk, at the uniform price per hundredweight, computed pursuant to section 7 (b) subject to the location adjustment and butterfat differential set forth in this section.

(b) *Butterfat differential to producers.* For each one-tenth of 1 percent above or below 3.5 percent in average butterfat content of milk delivered by any producer during any delivery period, the uniform price paid to such producer shall be plus or minus, as the case may be, an amount computed as follows: To the average price per pound of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture for the delivery period during which the milk was received, add 20 percent and divide the result obtained by 10.

(c) *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to paragraphs (e) and (g) and out of which he shall make all payments to handlers pursuant to paragraphs (f) and (g) of this section: *Provided,* That the market administrator shall offset any such payment due to any handler against payments due from such handler. Immediately after computing the uniform price for each delivery period, the market administrator shall compute the amount by which each handler's net pool obligation, including the payments to producers which are required to be made pursuant to section 6, is greater or less than the sum obtained by multiplying such handler's net pooled milk by the uniform price and shall enter such amount on each handler's account as such handler's pool debit or pool credit, as the case may be, and render such handler a transcript of his account.

(d) *Payments to the producer-settlement fund.* On or before the 16th day after the end of each delivery period each handler shall make full payment to the market administrator of any pool debit balance shown on the account rendered, pursuant to paragraph (d) of this section, for the preceding delivery period.

(e) *Payments out of the producer-settlement fund.* On or before the 17th day after the end of each delivery period, the market administrator shall pay to each handler the pool credit balance shown on the account rendered, pursuant to paragraph (d) of this section, if any, for the preceding delivery period, less any unpaid obligations of the handler. If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. No handler who, on the 18th day after the end of each delivery period, has not received the balance of the payment due him from the market administrator shall be deemed to be in violation of paragraph (a) of this section if he reduces his total payments uniformly to all producers by not more than the amount of the reduction in payment from the producer-settlement fund.

(f) *Adjustment of errors in payments.* Whenever verification by the market administrator of reports or payments of any handler discloses errors made in payments to the producer-settlement fund pursuant to paragraph (d) of this section, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, pursuant to paragraph (d) of this section, the market administrator shall, within 5 days, make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer, for milk purchased or received by such handler, discloses payment to such producer of less than is required by this section, the handler shall make up such payment to the producer not later than the time of making payment to producers next following such disclosure.

SEC. 9 *Expense of administration*—(a) *Payments by handlers.* As his prorata share of the expense of the administration hereof each handler, except those handlers exempt from the provisions hereof, shall pay to the market administrator, on or before the 18th day after the end of each delivery period, a sum not exceeding 4 cents per hundredweight with respect to all milk purchased or received by him during such delivery period from producers, from sources other than producers or other handlers, or produced by him, the exact sum to be determined by the market administrator,

subject to review by the Secretary: *Provided*, That each handler, which is a cooperative association, shall pay such prorata share of expense of administration only on that milk of producers actually received at a plant of such cooperative association, or caused to be delivered by such cooperative association to a plant from which no milk or cream is disposed of in the marketing area.

(b) *Suits by market administrator.* The market administrator may maintain a suit in his own name against any handler for the collection of such handler's prorata share of expense set forth in this section.

SEC. 10 *Marketing services*—(a) *Marketing service deduction.* In making payments to producers pursuant to section 8, each handler, with respect to all milk received from each producer during each delivery period, at a plant not operated by a cooperative association of which such producer is a member, shall, except as set forth in paragraph (b) of this section, deduct 3 cents per hundredweight or such lesser amount as the market administrator shall determine to be sufficient, such determination to be subject to review by the Secretary, and shall, on or before the 18th day after the end of such delivery period, pay such deductions to the market administrator. Such moneys shall be expended by the market administrator for verification of weights, samples, and tests of milk received from such producers and in providing for market information to such producers. The market administrator may contract with an association or associations of producers for the furnishing of the whole or any part of such services to, or with respect to, the milk received from such producers.

(b) *Marketing service deductions with respect to members of a producers' cooperative association.* In the case of producers whose milk is received at a plant not operated by a cooperative association of which such producers are members and for whom a cooperative association is actually performing the services set forth in paragraph (a) of this section, each handler shall, in lieu of the deductions specified in paragraph (a) of this section, make such deductions from payments made pursuant to section 8 as may be authorized by such producers, and pay over on or before the 18th day after the end of each delivery period such deductions to the associations rendering such service of which such producers are members.

SEC. 11 *Market advisory committee.* (a) Subsequent to the effective date hereof, the market administrator may select a representative committee of the industry for purposes (1) of recommendation of amendments to this order and (2) for conference, counsel, and advice.

SEC. 12 *Effective time, suspension, or termination*—(a) *Effective time.* The provisions hereof, or any amendment hereto, shall become effective at such time as the Secretary may declare and shall continue in force until suspended, or terminated, pursuant to paragraph (b) of this section.

(b) *Suspension or termination.* Any or all of the provisions hereof, or any amendment hereto, shall be suspended or terminated as to any or all handlers after such reasonable notice as the Secretary may give and shall, in any event, terminate whenever the provisions of the act authorizing it cease to be in effect.

(c) *Continuing power and duty of the market administrator.* If, upon the suspension or termination of any or all provisions hereof there are any obligations arising hereunder the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(d) The market administrator, or such other person as the Secretary may designate, shall (a) continue in such capacity until removed by the Secretary, (b) from time to time account for all receipts and disbursements and when so directed by the Secretary deliver all funds on hand, together with the books and records of the market administrator or such person, to such person as the Secretary shall direct, and (c) if so directed by the Secretary, execute assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant thereto.

(d) *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions hereof the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions hereof, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

SEC. 13 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States, or name any bureau or division of the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions hereof.

SEC. 14 *Liability of handlers.* The liability of the handlers hereunder is several and not joint, and no handler shall be liable for the default of any other handler.

SEC. 15 *Counterparts and additional parties*—(a) *Counterparts of marketing agreement.* This marketing agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary all such counterparts shall constitute, when taken together, one and the same instrument, as if all such signatures were obtained in one original.

(b) *Additional parties to marketing agreement.* After this marketing agreement first takes effect any handler may become a party to this marketing agreement if a counterpart hereof is executed by him and delivered to the Secretary. This marketing agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this marketing agreement shall then be effective as to such new contracting party.

(2) *Classes of purchasers.* (i) Class AA shall consist of all persons who purchase f. o. b. railroad cars at seller's yard, dock or other terminal facilities.

(ii) Class A shall consist of the following persons who purchase f. o. b. truck or wagon:

(*a*) All wharf dealers.

(*b*) Those consumers who have customarily been supplied by one or more wharf dealers at the same, or substantially the same, price applicable to sales to wharf dealers, whether said price was quoted as f. o. b. point of shipment or, when delivery was arranged for, as a delivered price which was in fact arrived at by the addition to said f. o. b. price of the actual cost of transportation.

(iii) Class B shall consist of the following persons who purchase f. o. b. truck or wagon:

(*a*) Dealers (other than wharf dealers) who have yards or other terminal facilities for the unloading and storing of coal, whether or not such facilities are designed or are customarily used for the handling of bituminous coal.

(*b*) Operators of greenhouses which are used for the growth of vegetables and/or flowers.

(iv) Class C shall consist of the following persons who purchase f. o. b. truck or wagon:

(*a*) All dealers who are not included in Classes A or Class B, except brokers.

(*b*) All consumers who purchase on an f. o. b. truck, or wagon basis and who are not included in Class A or Class B.

Provided, however, That nothing contained herein shall be so construed as to require a dealer to sell coal on an f. o. b. shipping point basis to any consumer to whom said dealer has not customarily so sold, or who has customarily purchased on a delivered basis.

(3) *Sales to brokers.* The maximum price for a sale to a broker who purchases f. o. b. transportation facilities at seller's yard, dock or other terminal facilities and resells without physically handling the coal, shall be 10¢ per ton less than the price applicable to a direct sale to a purchaser of the class of which the broker's customer is a member. The broker shall, when he places the order with the dealer, supply the name of his customer and a statement of his classification.

(4) *Terms of sale and services.* (i) Terms of sale may be c. o. d. However, if credit is extended no additional charge shall be made if payment is received by the tenth day of the month following the month in which the coal is shipped. For the extension of credit beyond the tenth day of the month following the month in which the coal is shipped, interest may be charged at a rate not to exceed one-half of one per cent per month on the unpaid balance.

(ii) The seller shall, upon request, arrange and pay for the transportation of the coal to the purchaser by the method of transportation indicated by the purchaser, to the extent that the requested transportation facilities can, by the exercise of reasonable diligence, be secured. No charge shall be made for such service. The actual cost of the transportation shall be shown separately on the invoice or similar document rendered to the purchaser. In performing such service the dealer shall, when proper under the rules and regulations of the Bureau of Internal Revenue, furnish to the carrier the certification required to avoid further taxation on the transportation of the coal to the purchaser under section 620 of the Revenue Act of 1942.

(c) *Maximum prices for all sales on a delivered basis*—(1) *Table of prices, per net ton:*

The foregoing prices apply to deliveries made directly from truck or wagon into the consumer's storage facilities, and are inclusive of any trimming that may be necessary. If the coal cannot be so discharged and is carried or wheeled from the truck or wagon to consumer's storage facilities, an additional 50¢ per ton may be charged if such charge is separately stated on the invoice or similar document rendered to the purchaser.

(2) *Classes of purchasers.* Quantities refer to the consumer's annual purchases, but apply only when the minimum delivery is one ton. Prices for deliveries of less than one ton are governed by subparagraph (4) of this paragraph (c). The consumer's annual purchases determine his classification whether or not he purchases all of his requirements from a single dealer, except that a dealer may charge the Class I price to any consumer, regardless of his general classification, who purchases less than 4 tons from said dealer during the course of a year.

Class I. Less than 4 tons.

Class II. Four tons or more, but less than 1000 tons, regardless of the number of points within the area at which delivery is received by the purchaser.

Class III One thousand tons or more, regardless of the number of points within the area at which delivery is received by the purchaser.

Class IV. Three thousand tons or more but less than 7,000 tons, delivered to a single point.

Class V. Seven thousand tons or more, delivered to a single point.

If the purchaser's proper classification cannot be determined at the time of the delivery (as for example, in the case of a purchaser who converts from oil to coal), an estimate shall be made of his probable consumption, he shall be tentatively classified upon the basis of that estimate, and the dealer or dealers supplying him shall make an appropriate refund and may require that the purchaser agree to pay an appropriate additional amount if, when his actual classification has been determined, it appears that he was entitled to a lower price or could properly have been charged a higher one.

(3) *Sales to brokers.* The maximum price for a sale by a dealer to a broker who orders coal to be delivered by the dealer directly to the broker's customer shall be 10¢ per ton less than the price applicable to a direct sale to a purchaser of the class of which the broker's customer is a member. The broker shall, when he places the order with the dealer, supply a statement of his customer's classification.

(4) *Maximum prices for half and quarter ton deliveries.* (i) The maximum price for delivery of one-half ton shall be the result arrived at by dividing the Class I price by 2, adjusting the quotient to the nearest multiple of 5¢ and adding 50¢. If the quotient is an exact multiple of 2½¢, the next higher multiple of 5¢ shall be considered the nearest multiple thereof.

(ii) The maximum price for delivery of one-quarter ton shall be the result arrived at by dividing the maximum price for delivery of one-half ton (determined pursuant to the preceding subparagraph) by 2, adjusting the quotient to the nearest multiple of five cents and adding 25¢.

(5) *Terms of sale.* Terms of sale may be c. o. d. However, if credit is extended no additional charge shall be made if payment is received by the tenth day of the month following the month in which the coal is delivered. For the extension of credit beyond the tenth day of the month following the month in which the coal is delivered, interest may be charged at a rate not to exceed one-half of one per cent per month on the unpaid balance.

(d) *Dust treatment.* No extra charge may be made for coal subject to this Order No. 7 which has been subjected to a chemical, oil or waxing process for allaying dust except that ten cents (10¢) per ton may be added to the otherwise applicable maximum price in the following cases:

(1) When the coal has been so treated at the mine and the producer or distributor makes an extra charge for such treatment pursuant to § 1240.210 (a) (10) of Maximum Price Regulation No. 120.

(2) When the coal has been so treated by a dealer subject to this order; but no dealer shall require a purchaser to buy coal which has been so treated by the dealer.

The additional charge for such treatment shall be shown separately on the invoice or similar document which is furnished by the dealer to the purchaser.

(e) *Geographical applicability.* The maximum prices set forth in paragraph (b) hereof for all sales f. o. b. transportation facilities at seller's yard, dock or other terminal facilities shall apply to all such sales when the coal is shipped from a point within the Metropolitan Boston area, regardless of the ultimate destination of the coal, except sales for export and sales of bituminous coal for direct use as bunker fuel, which latter are governed by Maximum Price Regulation No. 189.

The maximum prices set forth in paragraph (c) hereof for all sales on a delivered basis shall apply to all coal sold on a delivered basis to purchasers who receive the coal within the Metropolitan Boston area, regardless of whether the dealer is located within said area, except sales of bituminous coal for direct use as bunker fuel which are governed by Maximum Price Regulation No. 189.

(f) *Specifications for the kinds of coal for which maximum prices are established by this Order No. 7.* (1) "Domestic run of mine" is bituminous coal which is defined by the Bituminous Coal Division as "Domestic, dealer, modified or screened run of mine," or its equivalent as to coarseness, produced in Producing Districts 1, 2, 3, 7 or 8.

(8) "High volatile nut or pea" is bituminous coal, double screened at the mines, with a top size two (2) inches and smaller and a bottom size smaller than two (2) inches, and produced in the high volatile section of Producing District 8.

(g) *Addition of railroad freight rate increase prohibited.* The specific maximum prices established by this Order No. 7 include the amount of the railroad freight rate increase incurred as a result of the Interstate Commerce Commission's order in its Docket Ex Parte 148, effective March 13, 1942, and such railroad freight rate increase may not be added to the specific maximum prices.

(h) *Taxes.* A dealer subject to this order may collect, in addition to the specified maximum prices established herein, provided he states it separately, the amount of the Federal tax upon the transportation of property imposed by section 620 of the Revenue Act of 1942 actually paid or incurred by him, or an amount equal to the amount of such tax paid by any of his prior suppliers and separately stated and collected from the dealer by the supplier from whom he purchased.

(i) *Petitions for amendment.* Any person seeking an amendment of any provision of this order may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1, except that the petition shall be filed in the Boston Regional Office of the Office of Price Administration. No appeal from a denial in whole or in part of such petition by the Regional Administrator may be made to the Price Administrator.

(j) *Posting of maximum prices; sales slips and receipts.* (1) Every dealer subject to this Order No. 7 shall post all of the maximum prices established hereby which apply to the types of sales made by him in his place of business in a manner plainly visible to and understandable by the purchasing public, and shall keep a copy of this Order No. 7 available for examination by any person during ordinary business hours. The prices established hereby need not be reported under § 1340.262 (c) of Revised Maximum Price Regulation No. 122.

(2) Every dealer subject to this Order No. 7 shall give to each purchaser an invoice or similar document showing (i) the date of the sale or delivery, the name and address of the dealer, the name and address of the purchaser, the kind and quantity of the bituminous coal sold, the purchaser's classification and the price charged and (ii) separately stating any special items which are required to be separately stated by the terms of this Order No. 7.

Order granting application for extension of time, pursuant to section 11 (e).

The Commission having by order dated March 4, 1942, entered pursuant to section 11 (b) (1) of the Public Utility Holding Company Act of 1935, directed that United Public Utilities Corporation, a registered holding company, divest itself of all of its interests in, and in the properties and assets owned or operated by the companies designated in the said order, and the order having provided that the respondent should make application to the Commission for the entry of such further orders as are necessary or appropriate for that purpose, and the Commission having reserved jurisdiction to enter such further orders as might be necessary or appropriate; and

The respondent, United Public Utilities Corporation, having filed an application requesting an extension of time for one year within which to comply with our order of March 4, 1942; and

ORDER FOR HEARING AND DESIGNATING OFFICER TO TAKE TESTIMONY

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 22d day of April, A. D. 1943.

In the matter of proceeding under section 19 (a) (2) of the Securities Exchange Act of 1934, as amended, to determine whether the registration of Reorganized Broken Hills Silver Corporation, non-assessable common stock, 10¢ par value, should be suspended or withdrawn.

I

It appearing to the Commission:

That the Reorganized Broken Hills Silver Corporation, a corporation organized under the laws of the State of Nevada, is the issuer of Non-Assessable Common Stock, 10¢ Par Value; and

That the said Reorganized Broken Hills Silver Corporation registered its Assessable Common Stock, Par Value 10¢, on the San Francisco Mining Exchange, by filing with the Exchange and with the Commission on or about November 13, 1935, an application on Form 10, pursuant to section 12 (b) and (c) of the Securities Exchange Act of 1934, as amended, and Rule X-12B-1, as amended, promulgated by the Commission thereunder, registration pursuant to such application having become effective on June 1, 1936, and that the aforesaid company having changed its Assessable Common Stock, Par Value 10¢, to Non-Assessable Common Stock, Par Value 10¢, and having on or about November 21, 1939 filed an application on Form 8-A, pursuant to the aforesaid section of the Act and the aforesaid Rule, registration pursuant to such application having become effective on January 10, 1940, and remaining in effect to and including the date hereof; and

It further appearing to the Commission:

That Rule X-13A-1, promulgated pursuant to section 13 of said Securities Exchange Act of 1934, as amended, did and does require that an annual report for each issuer of a security registered on a national securities exchange shall be filed on the appropriate form prescribed therefor; and

That Rule X-13A-2, promulgated pursuant to section 13 of the Securities Exchange Act of 1934, as amended, did and does prescribe Form 10-K as the annual

report form to be used for the annual reports of all corporations except those for which another form is specified, and that no other form was or is specified for use by the said Reorganized Broken Hills Silver Corporation; and

That said Rule X-13A-1 requires that said annual report be filed not more than 120 days after the close of each fiscal year or such other period as may be prescribed in the instruction book applicable to the particular form; that the Instruction Book for Form 10-K does not prescribe any period other than such 120 days; and that pursuant to said Rule X-13A-1 the annual report must be filed within such period unless the registrant files with the Commission a request for an extension of time to a specified date within six months after the close of the fiscal year; and

That the said Reorganized Broken Hills Silver Corporation has a fiscal year ending December 31; that the annual report for its fiscal year ended December 31, 1941, was due to be filed not later than April 30, 1942; and that to date the registrant has not filed with the Commission such annual report nor has it filed with the Commission a request for an extension of time within which to file same; and

It is ordered, Pursuant to section 19 (a) (2) of said Act, that a public hearing be held to determine whether Reorganized Broken Hills Silver Corporation has failed to comply with section 13 of the Securities Exchange Act of 1934, as amended, and the Rules, Regulations and Forms promulgated by the Commission thereunder, in the respects set forth above; and if so, whether it is necessary or appropriate for the protection of investors to suspend for a period not exceeding twelve months or to withdraw the registration of the Non-Assessable Common Stock, 10¢ Par Value, of the said Reorganized Broken Hills Silver Corporation on said San Francisco Mining Exchange;

It is further ordered, Pursuant to the provisions of section 21 (b) of the Securities Exchange Act of 1934, as amended, that for the purpose of such hearing, John G. Clarkson, an officer of the Commission, is hereby designated to administer oaths and affirmations, subpoena witnesses, compel their attendance, take testimony and require the production of any books, papers, correspondence, memoranda or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law;

Pacific War Time at the Regional Office of the Securities and Exchange Commission, 625 Market Street, San Francisco, California, and continue thereafter at such time and place as the officer hereinbefore designated may determine.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-292]

PERMANENT SIGN DISPLAY COMPANY

Samuel F. Blatt is the sole owner of the business known as Permanent Sign Display Company, located at 1811 Center Avenue, Reading, Pennsylvania, and is engaged in the manufacture of signs, calendars and advertising novelties. Subsequent to August 15, 1942, the Permanent Sign Display Company put into process iron and steel to make advertising novelties and subsequent to September 15, 1942, it assembled them. Advertising novelties are an item appearing on Supplementary List A of Conservation Order M-126, and both their manufacture and assembly are prohibited. Prior to August 15, 1942, the Permanent Sign Display Company had knowledge of the provisions of Conservation Order M-126 and, therefore, the processing and assembling of iron and steel as aforesaid, constituted a wilful violation of the order.

These violations of Conservation Order M-126 have hampered and impeded the war effort of the United States by diverting scarce materials to uses not authorized by the War Production Board. In view of the foregoing facts: *It is hereby ordered*, That:

§ 1010.292 *Suspension Order No. S–292.* (a) Samuel F. Blatt, doing business as Permanent Sign Display Company, or otherwise, his or its successors and assigns, shall not receive, process, fabricate or use any of the metals specified on the metals list attached to Priorities Regulation No. 11, in any form, nor shall Samuel F. Blatt, doing business as Permanent Sign Display Company or otherwise, his or its successors and assigns, assemble any article or item containing or to which is attached, any of the metals specified in the metals list attached to Priorities Regulation No. 11, in any form, unless hereafter specifically authorized in writing by the War Production Board.

(b) The provisions of this order shall not be applicable to orders bearing a preference rating of AA–2X or higher.

(c) Nothing contained in this order shall be deemed to relieve Samuel F. Blatt, doing business as Permanent Sign Display Company, or otherwise, his or its successors and assigns, from any restriction contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on April 28, 1943, and shall expire on July 28, 1943, at which time the restrictions contained in this Order shall be of no further effect.

Issued this 26th day of April 1943.

PART 1001—TIN

[Supplementary Order M-43-b as Amended April 27, 1943]

Section 1001.3 *Supplementary Order M–43–b,* is hereby amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of tin for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1001.3 *Supplementary Order M–43–b*—(a) *Definition.* For the purpose of this order:

"Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(b) *Restriction on use of tin in certain gas meters.* After February 15, 1943, no person shall use tin-bearing solder or other tin-bearing material in the adjustment, repair, or resealing of any tin-cased gas meter having a rated capacity of less than 300 cu. ft. per hour except:

(1) A meter which is found not to be accurate within an accuracy range of plus or minus 4% when tested by standard meter prover tests;

(2) A meter which has not been previously repaired for twelve years or more;

(3) A meter which has developed an opening through which gas escapes in the outside case or connections; or

(4) A meter which has a functional defect other than mere failure to register accurately within the range specified in subparagraph (b)(1) above.

The restrictions of this paragraph (b) shall not apply to any such gas meter which was withdrawn prior to January 26, 1943, for the purpose of testing and returning it to service. Furthermore, nothing contained in this paragraph (b) shall prevent the repair or resealing of any tin-cased gas meter if the only tin-bearing solder or other tin-bearing material used for such purpose is derived from material reclaimed from meters brought in for repair.

(c) *Appeals and communications.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal. Such appeals and all communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Tin and Lead Division, Washington, D. C., Reference: M–43–b.

(d) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 27th day of April 1943.

PART 1068—CANS

[Conservation Order M-81, as Amended April 27, 1943]

§ 1068.1 *Conservation Order M–81*—(a) *Definitions.* (1) "Can" means any unused container which is made in whole or in part of tinplate, terneplate, blackplate, or waste, and which is suitable for packing any product. The term includes any container closure or fitting made in whole or in part of tinplate, terneplate, blackplate, or waste, but does not include a closure or fitting to be used on or as a part of a glass container. The term does not include fluid milk shipping containers, as defined in Conservation Order M–200.

(2) "Tinplate" means any sheet steel coated with tin and includes "primes", "seconds", "waste-waste" (except "electrolytic waste-waste"), and all other forms of tinplate except waste.

(3) "Terneplate" means sheet steel coated with a lead-tin alloy, and includes "primes", "seconds", "waste-waste", and all other forms of terneplate except waste.

(4) "Blackplate" means any sheet steel 29-gauge or lighter, other than tinplate or terneplate. The term includes "blackplate rejects" and "electrolytic waste-waste", and all other forms of blackplate except waste.

(5) "Waste" means scrap tinplate, terneplate, and blackplate, produced in the ordinary course of manufacturing cans.

(6) "Pack", unless particularly specified, means the quantity, by area measurement of tinplate, terneplate, and blackplate required for the manufacture of all sized cans used by a person for packing a particular product during the base period specified.

(b) *Restrictions upon manufacture, sale, and delivery of cans.* (1) No person shall sell or deliver any can except under a purchase order or contract validated by a delivery to such person of a purchaser's certificate, manually signed by the purchaser or an authorized official of the purchaser, in substantially the form attached hereto as Exhibit A. No person shall manufacture, sell, or deliver any can which he knows or has reason to believe will be used in violation of any provision of this order.

(2) No person shall manufacture any can smaller than 5 gallons, with ears, bails, or handles.

(c) *Restrictions upon purchase, acceptance of delivery, and use of cans.* (1) No person shall, during the calendar year 1943 (or the seasonal year 1942–1943, when specified), purchase, accept delivery of, or use for packing a product any can except to the extent permitted in Schedules I, II, and III, attached to this order: *Provided, however,* That a jobber or retail store may obtain and sell cans in conformity with the provisions of this order.

(2) The schedules attached to this order list the only products permitted to be packed in cans, packing quotas, sizes of cans, and the kinds of plate permitted for the manufacture of cans.

The calendar year basis shall obtain except for products for which a seasonal year is specified. A seasonal year for a particular product represents a twelve months' period beginning in one calendar year and ending in the next.

The sizes of the can specified for a particular product indicate the only sized cans which may be used for packing that product, except that such product may, subject to all other restrictions imposed by this order, be packed in cans larger than the largest size specified therefor.

When tinplate is specified for the manufacture of cans for packing a particular product, the coating indicated represents the maximum weight of tin coating per single base box. When SCMT is specified, Special Coated Manufacturers' Terneplate is referred to. When blackplate is specified, the specification includes chemically treated blackplate (CTB).

(3) No product packed in a can shall be repacked for sale in a can or any other container by the same or a different person in the same or a different

form except to the extent specifically permitted in the schedules attached to this order or pursuant to Conservation Order M–104.

(4) No dried or frozen fruit or vegetable shall be packed in a can, except to the extent specifically permitted in the schedules attached to this order.

(d) *Exceptions.* (1) The restrictions imposed by this order shall not apply to the purchase, acceptance of delivery, or use of the following cans:

(i) Cans for packing any product which is not to be sold.

(ii) Fiber or paper bodied cans with ends made of waste, for packing any food product for human consumption, and antiseptic or medicinal powders.

(iii) Open-top sanitary tinplate cans for packing any products listed in Schedules I and II attached to this order: *Provided,* (1) The packer has packed and set aside the full amount of any such product which he is required to set aside pursuant to Food Distribution Order No. 22 and orders supplementary thereto; (2) the cans are not of any of the specific sizes listed for open-top sanitary cans in Schedules I and II; and (3) the cans either were manufactured on or before December 9, 1942, or were or are manufactured from parts lithographed, cut to individual size, or partially assembled on or before December 9, 1942, and/or from parts produced from tinplate which, on or before December 9, 1942, was so processed or was of such size, gauge or grade that it is not suitable for the manufacture of tinplate cans of the types and sizes permitted by this order (exclusive of cans for which "frozen tinplate" is specified).

(iv) Cans (other than open-top sanitary tinplate cans) for packing any product listed in Schedules I, II, and III or, if the cans are not suitable for any such product, for packing any product not so listed: *Provided,* That, in either event, the cans (1) are not of any of the specific sizes listed, in the schedules attached to this order, for the products for which the cans were originally designed and (2) either were completely manufactured on or before December 9, 1942, or were or are manufactured from parts cut to individual size for such cans on or before December 9, 1942.

(v) Cans for packing any product not listed in Schedules I and II attached to this order, when such cans are to be delivered pursuant to a letter of intent approved by, or a purchase order or contract negotiated for or with the Army, Navy, Marine Corps, Maritime Commission, or War Shipping Administration of the United States.

[NOTE: Paragraph (v) redesignated April 27, 1943]

(2) [Revoked April 27, 1943]

(3) No certificate shall be required for the sale or delivery of cans to any purchaser who has already filed a certificate with his seller under Conservation Order M–81.

(e) *Miscellaneous provisions.*—(1) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(2) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of appeal.

(3) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to: Containers Division, War Production Board, Washington, D. C. Ref.: M–81.

(4) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further delivery of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(5) [Revoked April 27, 1943]

Issued this 27th day of April 1943.

SCHEDULE I—FOOD CANS

NOTE: Items 4, 35, 41, 48, and 57 were amended and items 8, 13, 29, 30, 31, 32, 46, 63, and 66 were added April 27, 1943.

(1) Packing quotas specified in this Schedule I indicate total packs of the respective products listed, for all purposes including cans required by any order of the War Production Board, the Department of Agriculture, or the Director of Food Distribution, to be set aside for purchase by a government agency. The designation FDO–22 indicates that cans may be used for packing only the quantity of product required to be set aside by Food Distribution Order No. 22 and orders supplementary thereto, as same may be amended from time to time. Such quantity is hereinafter sometimes referred to as "set aside quotas."

(2) All persons manufacturing cans shall, to the greatest extent available, use 0.50 tinplate wherever the single asterisk appears, in columns (4) or (5), and chemically treated blackplate wherever the double asterisk appears. All persons using cans marked with the asterisk, are hereby required to accept from the manufacturer making delivery, to the greatest extent available, cans made as specified of 0.50 tinplate wherever the single asterisk appears; and cans made as specified of chemically treated blackplate wherever the double asterisk appears. Wherever the double asterisk appears, to the extent that chemically treated blackplate is not available, 0.50 tinplate is to be used by manufacturers, and cans made therefrom accepted by users, to the greatest extent available, in preference to 1.25 tinplate.

(3) Wherever the triple asterisk appears in Column (3) for any product, every canner who possesses No. 10-size can equipment shall pack his entire set-aside quota in No. 10

cans, if the fullest practicable use of that equipment provides sufficient capacity. If such use does not provide sufficient capacity, he shall pack as much of the set-aside quota in No. 10 size cans as such capacity does permit and shall pack the balance of that quota in the other sizes of cans permitted for the particular product.

(1) Packing quotas specified in this Schedule II indicate permitted packs of the respective products listed, for all purposes except for the Army, Navy, Marine Corps, Maritime Commission, War Shipping Administration of the United States, or for any agency of the United States purchasing for a foreign country, pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States (Lend Lease Act). While restrictions pertaining to can sizes and can materials are applicable to such cans, cans used for packing the respective products listed shall be in addition to the specified quotas, when delivered pursuant to a letter of intent approved by, or a contract or purchase order negotiated with or for, any of the foregoing agencies. The word "none" indicates that no cans shall be used for packing the applicable product except for the above-mentioned agencies. When determining a quota for packing a product listed in this Schedule II, cans packed during the base period (1942) for the above-mentioned agencies shall be excluded.

(2) All persons manufacturing cans shall, to the greatest extent available, use 0.50 tinplate wherever the single asterisk appears, and chemically treated blackplate wherever the double asterisk appears. All persons using cans marked with the asterisk, are hereby required to accept from the manufacturer making delivery, to the greatest extent available, cans made as specified of 0.50 tinplate wherever the single asterisk appears; and cans made as specified of chemically treated blackplate wherever the double asterisk appears.

PART 1200—CIVILIAN DEFENSE HELMETS

[Limitation Order L–105 as Amended April 27, 1943]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of materials entering into the production of civilian defense helmets for the war effort, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the war effort:

§ 1200.1 *General Limitation Order L–105*—(a) *Definition.* For the purposes of this order, "civilian defense helmet" means any helmet or hat designed or adapted for civilian use in connection with air raids, air raid drills or other civilian defense activities. The term shall not include any head covering consisting entirely (except for trimmings) of cloth.

(b) *General restrictions.* No person shall manufacture any civilian defense helmet, or part or component thereof, except:

(1) Under purchase order from the Office of Civilian Defense, or other agency or department of the United States, or

(2) For delivery to a foreign country pursuant to the Act of Congress of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act), or

(3) From fabricated or semi-fabricated parts or material which on April 29, 1942 were in process of manufacture into civilian defense helmets.

(c) *Application of Priorities Regulation No. 1.* This order and all transactions affected hereby are subject to the provisions of Priorities Regulation No. 1 (Part 944) as amended from time to time, except to the extent that any provision hereof may be inconsistent therewith, in which case the provisions of this order shall govern.

(d) *Reports.* All persons affected by this order shall execute and file such reports and questionnaires as the War Production Board shall, from time to time, prescribe.

(e) *Records.* All persons affected by this order shall keep and preserve for not less than two years, accurate and complete records concerning inventories, production and sales.

(f) *Audit and inspection.* All records required to be kept by this order shall, upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(g) *Violations and false statements.* Any violation of this order is a criminal offense. In addition, any person who violates this order, or who by any act or omission falsifies any records to be kept or information to be furnished pursuant to this order, may be prohibited from receiving further deliveries of any material subject to allocation, and such further action may be taken as is deemed appropriate, including a recommendation for prosecution under section 35 (A) of the Criminal Code (18 U.S.C. 80).

(h) *Appeal.* Any person affected by this order who considers that compliance herewith would work an exceptional and unreasonable hardship upon him or would disrupt or impair a program of conversion from non-war to war work, may appeal to the War Production Board, setting forth the pertinent facts and the reasons such person considers that he is entitled to relief. The War Production Board may thereupon take such action as it deems appropriate.

(i) *Communications.* All reports required to be filed hereunder and communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Safety and Technical Equipment Division, Washington, D. C. Ref.: L–105.

Issued this 27th day of April 1943.

establish maximum prices for sales of relaying rail which differ in certain respects from those established by Revised Price Schedule No. 46—Relaying Rail,[1] and also to establish maximum prices for used track accessories. The Price Administrator has ascertained and given due consideration to the prices of relaying rail, relaying girder rail and used track accessories between October 1 and 15, 1941, and has made adjustments for such relevant factors as he has determined to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator, the maximum prices established by this regulation are, and will be, generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Appendix A: Maximum prices for relaying rail.
Appendix B: Maximum prices for relaying girder rail.
Appendix C: Maximum prices for used track accessories.

SECTION 1 *Maximum prices*—(a) *Relaying rail.* On and after December 2, 1941, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer relaying rail, and no person shall buy, offer to buy, or accept delivery of relaying rail, at prices higher than the maximum prices set forth in Appendix A.

(b) *Relaying girder rail.* On and after December 19, 1942, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer relaying girder rail, and no person shall buy, offer to buy, or accept delivery of relaying girder rail, at prices higher than the maximum prices set forth in Appendix B.

(c) *Used track accessories.* On and after May 1, 1943, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer used track accessories, and no person shall buy, offer to buy, or accept delivery of used track accessories, at prices higher than the maximum prices set forth in Appendix C.

SEC. 2 *Less than maximum prices.* Lower prices than those set forth in Appendices A, B and C may be charged, demanded, paid or offered.

SEC. 3 *Evasion.* The price limitations set forth in this regulation shall not be evaded either by direct or indirect methods in connection with a purchase, sale, delivery or transfer of relaying rail, relaying girder rail or used track accessories, alone or in conjunction with any other material, or by way of any commission, service, transportation, or other charge, or discount, premium, or other privilege, or by tying-agreement or other trade understanding, or by division of orders to obtain more favorable quantity differentials, or otherwise.

SEC. 4 *Registration and licensing.* The provisions of Supplementary Order No. 17,[2] licensing sellers of iron and steel products, are applicable to every person subject to this regulation. That order provides, in brief, that a license is necessary to make sales of any iron or steel products for which maximum prices are established by this and other maximum price regulations. A license is automatically granted. It is not necessary to apply for the license but all sellers may later be required to register. The license may be suspended for violations in connection with the sale of any commodity covered by the order, and no person whose license is suspended may sell any such commodity during the period of suspension.

SEC. 5 *Records and reports.* (a) Every person making purchases or sales of:

(1) Relaying rail which weighed 35 pounds or more per yard when new, after January 1, 1942;

(2) Relaying rail which weighed less than 35 pounds per yard when new, after December 19, 1942;

(3) Relaying girder rail, after December 19, 1942;

(4) Used track accessories, after April 30, 1943;

shall keep for inspection by the Office of Price Administration for a period of not less than two years or for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, whichever period is shorter, complete and accurate records of each such purchase or sale, showing the date thereof, the name and address of the buyer or the seller, the shipping point price paid or received, transportation charges, if any, and the quantity and weight purchased or sold.

(b) Before any person shall sell relaying rail or used track accessories pursuant to paragraph (c) of Appendix A, and paragraph (c) of Appendix C, he must file with the Office of Price Administration a statement indicating that he operates a reconditioning plant equipped with machinery for reconditioning relaying rail and used track accessories, giving a list of such machinery, and must obtain written recognition by the Office of Price Administration of his plant as a relaying rail warehouse. Those persons who have already received written recognition by the Office of Price Administration as a relaying rail warehouse, are hereby granted permission to sell used track accessories out of such warehouse without the filing of any further application therefor. A storage point or yard, not customarily operated as a warehouse, is not a warehouse within the meaning of this paragraph.

(c) Persons affected by this regulation shall submit such reports to the Office of Price Administration as it may from time to time require.

SEC. 6 *Enforcement.* Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions, license suspension proceedings, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 7 *Petitions for amendment.* Persons seeking any modification of this regulation may file petitions for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,[3] issued by the Office of Price Administration.

SEC. 8 *Definitions.* (a) When used in this regulation, the term:

"Relaying rail" means steel rail of any weight per yard (other than relaying girder rail) which is suitable for relaying and which is to be used for relaying or for a purpose other than relaying for which new rail is ordinarily used, and which has been submitted to all reconditioning processes, if any, necessary to render it fit for such reuse.

"Shipping point" means on board the means of transportation to the buyer, whether truck, freight car, barge, or ship.

"Used track accessories" means railroad or mine track spikes, track bolts and nuts, tie plates and joint bars (which shall include rail joints, angle bars, splice bars and fish plates) of any size and weight which are suitable for reuse and which are to be used for relaying purposes and which have been submitted to all reconditioning processes if any, necessary to render them fit for reuse.

(b) Unless the context otherwise requires, the definitions set forth in section 302 of the Emergency Price Control Act of 1942, as amended, shall apply to other terms used herein.

SEC. 9 *Geographical application.* The provisions of this regulation shall apply only to sales, offers to sell or deliveries of relaying rail, relaying girder rail or used track accessories moving within, into or out of one of the States of the United States or the District of Columbia.

SEC. 2 *To what products, transactions and persons this regulation applies*—(a) *What products are covered by this regulation.* This regulation covers sales and rentals of all domestic washing machines which have ever been used or which have been in the possession of one or more consumers for more than 90 days, or which are models of the year 1940 or earlier. A used domestic washing machine is a mechanically operated machine made for use in the home for washing clothes or other household fabrics.

(b) *What transactions are covered by this regulation.* This regulation covers all sales and rentals of used domestic washing machines by any person to any other person, including sales by an individual who is selling his own washing machine, and sales by dealers or auctioneers, except sales by a foreign seller to any domestic buyer. This exception includes domestic buyers who purchase through a bona fide agent.

(c) *What persons are covered by this regulation.* This regulation applies to any person who sells or rents a used domestic washing machine except foreign sellers and domestic buyers, insofar as they purchase from the foreign sellers. The term "person" includes: An individual, corporation, or any other organized group; their legal successors or representatives; the United States, or any government, or any of its political subdivisions; or any agency of the foregoing.

SEC. 3 *Maximum prices for sales of used domestic washing machines by all persons*—(a) *Standards for washing machines sold with a guaranty.* If the seller sells a used domestic washing machine and gives the purchaser a guaranty, the machine must meet the following standards. (The terms of the guaranty are set forth in section 3 (c)).

(1) Aluminum tubs must have been wire brushed and free from corroded spots. Copper tubs must have a full covering surface, on the inside, of tin or nickel plating. The exterior of copper tubs, when not protected by an outer wall or panel, must have been thoroughly cleaned and polished, and varnished or painted. Porcelain tubs must be free from chipped spots. A tub which has been chipped meets the standards of this paragraph providing the seller has repaired the chipped spot with porcelain cement which reasonably matches the color of the tub at the time of sale.

*Copies may be obtained from the Office of Price Administration.

(2) The chassis, and all exterior metal parts of the machine must have been thoroughly cleaned and repainted, if worn, scratched, or rusty spots have appeared.

(3) All moving and motor parts shall have been carefully cleaned and lubricated.

(4) Wringer rolls must be of uniform diameter and free from badly worn spots.

(5) Operating mechanisms must be in good working order and capable of remaining so under ordinary use for the length of the guaranty period.

(b) *Machines sold without guaranty.* If the seller does not give the purchaser a guaranty, the washing machine must be in working condition when delivered to the purchaser and if the machine is equipped with a wringer, the top and bottom wringer rolls must be of the same size.

(c) *Guaranty.* The maximum price for the sale of a used machine depends on whether the seller gives the purchaser a guaranty, and, if so, upon the length of the guaranty period. The guaranty to be furnished shall be a written guaranty for at least six months, or for one year or more, which provides that while the guaranty is in effect any part of the machine which proves defective will be replaced without charge for labor, materials or other services.

(d) *Table of maximum prices for used domestic washing machines.* With certain exceptions, the table below establishes maximum prices for used washing machines which are based not on the model or year of manufacture but on the features and specifications of the particular machine offered for sale. To find the maximum price, the machine must be identified as belonging in Class A, B, C, etc., by comparing the machine offered for sale with the specifications in the table below. The maximum price for any machine within a designated class shall be one of the three prices set forth for that class depending on whether the machine is sold without a guaranty, or guaranteed for six months or for one year. In certain circumstances additions to the maximum prices set forth below may be made because of special equipment furnished. These additions are contained in section 4. The maximum prices of the several classes of machines are set forth in the table below:

ARTICLE V—APPENDIX A: SHORTLEAF YELLOW PINE LUMBER

ARTICLE VI—APPENDIX B: LONGLEAF YELLOW PINE LUMBER

ARTICLE VII—APPENDIX C: TABLE OF ESTIMATED WEIGHTS

ARTICLE I—SCOPE OF THE REGULATION

SECTION 1 *Prices higher than ceiling prohibited.* (a) On and after May 1, 1943, regardless of any contract or other obligation, no person shall sell or deliver, and no person shall buy or receive in the course of business, any Southern pine lumber for direct-mill shipment at prices higher than the ceiling prices fixed by this regulation, and no person shall agree, offer or attempt to do any of these things.

(b) Prices lower than the ceiling prices may, of course, be charged and paid.

SEC. 2 *What transactions are covered.* (a) This regulation covers, under the name of "sales for direct-mill shipment" all sales of Southern pine lumber, no matter who the seller is, and regardless of the quantity involved, except sales of Southern pine lumber which was part of the regular stock of a distribution yard at the time the sale was made.

(b) A "distribution yard" is an establishment which meets all of the following tests:

(1) It sells substantially all of the lumber of all species handled through its yard in the same size and condition of dressing in which received. However, a yard located in the Southern pine producing area will be deemed to meet this test if it receives in rough form and processes by sawing or planing less than 30 percent of its Southern pine lumber. If the yard receives in rough form and processes by sawing or planing 30 percent or more of its Southern pine lumber it cannot be considered a distribution yard for sales of this species although it may be considered a distribution yard for other species of lumber and lumber products provided it qualifies as such under the terms of the regulation governing the particular product.

(2) It sells 51 percent or more of the lumber handled through the yard in quantities of 18,000 board feet or less.

(3) It maintains permanent stocks of different species of lumber from different regions (such as Southern pine, Douglas fir, Ponderosa pine, etc.) in various lengths, grades and sizes, and of lumber products (such as millwork, plywood, shingles, etc.).

(4) It maintains a storage yard, offices, yard help and a sales force, for the handling and sale of its stocks.

(5) It is prepared to make prompt delivery, by truck, of lumber and lumber products out of its yard stock in small and large quantities.

(6) It does not manufacture lumber from logs.

(7) It is located in a lumber consuming area.

(c) An establishment will be considered a distribution yard only if it met all the above tests both during the single calendar month and the period of six calendar months preceding the transaction in question. For example, if the date of the transaction is June 10th, the percentage of processing and other tests must be based both upon the month of May and upon the period of December through May.

(d) "CPA yards" as defined in Maximum Price Regulation 215,[1] are considered distribution yards, regardless of the above requirements.

SEC. 3 *What products are covered.* This regulation covers all items of Southern pine lumber, whether the item is specifically named in the price tables or not, (except switch ties and cross ties, which are subject to Maximum Price Regulation 216[2]—Railroad Ties). This means all lumber of the species included in the following definitions of shortleaf and longleaf yellow pine.

(a) "Shortleaf yellow pine" means the species of shortleaf pine (Pinus echinata), loblolly pine (Pinus taeda), slash pine (Pinus caribaea), such longleaf pine (Pinus palustris) as contains less than six annual rings per inch and less than one-third summerwood, or any other pinus species, (except longleaf yellow pine) as defined in paragraph (b) of this section, known commercially as "Southern pine".

(b) "Longleaf yellow pine" means the botanical species of Pinus palustris which contains not less than six annual rings per inch and not less than one-third summerwood.

SEC. 4 *What persons are covered.* Any person who makes the kind of sale or purchase described above, for himself or others, is subject to this regulation. The term "person" includes an individual, corporation, partnership, association or any other organized group, their legal successors and representatives, the United States or any government or any of their political subdivisions or any agency of any of the foregoing.

[2] 7 F.R. 7097, 7368, 8199, 8403, 9130, 10782; 8 F.R. 434.

ARTICLE II—MAXIMUM PRICES AND TERMS OF SALE

SEC. 5 *Basic prices and cash discount*—(a) *Basic prices.* The maximum f. o. b. mill prices for shortleaf lumber are set forth in Article V and for longleaf in Article VI.

(b) *Cash.* If cash is paid the maximum price must be reduced by the seller's August 1941 cash discount. For example, if this discount was 2%, and if the maximum price without cash discount is $30.00, the maximum price when cash is paid is $29.40. In any case, on specific written allocations issued by the Office of the Chief of Engineers, War Department, the terms 30 days net may be used by the seller regardless of his established practice.

(c) *Sales of certain items of rough lumber.* In all sales of boards, dimension and box items of Southern pine, in rough form, where shipment originates at a sawmill which has no planing mill or which customarily sells the Southern pine lumber produced by it in rough form, the maximum prices set forth in price tables No. 1 (Boards, S. L.) No. 2 (Dimension S. L.), No. 10 (Box S. L.) No. 18 (Boards L. L.) and No. 19 (Dimension L. L.) contained in Article V and VI of this regulation shall include delivery within a radius of 25 miles when made to any purchaser for resale, subject to the following considerations:

(1) This rule shall not apply to carload shipment by rail.

(2) Where delivery over 25 miles is made by the sawmill, the maximum prices set forth in the tables shall be reduced by $2.50 per MBM before applying the transportation addition provided in Section 7.

(3) Where the purchaser himself makes the pick-up at the sawmill the maximum prices established in the price tables shall be reduced $2.50 per MBM.

SEC. 6 *Addition for direct-mill retail sale.* An addition of $3.50 per thousand board feet may be made on a sale of less than 18,000 ft. BM (or less than carload if by rail), to any buyer who does not purchase for resale, where the shipment originates at a mill and the seller:

(a) Sees that the lumber is delivered to the job site at such time and in such manner as the buyer specifies;

(b) Gives the buyer the privilege of exchanging the lumber and returning unused material; and

(c) Agrees to make good any shortage promptly from stocks kept on hand for this purpose.

The size of the sale is determined by the total quantity involved in the transaction without regard to whether it is broken up into smaller orders or deliveries.

SEC. 7 *Transportation charges*—(a) *Rail charges.* (1) Only two methods of selling are recognized by this Regulation. Any other method is prohibited, as a device to evade the ceiling by manipulation of freight.

The two permitted methods are: on a delivered basis using the estimated weights in Article VII, or on an f.o.b. mill basis with actual freight (figured, of course, on actual weights) to be paid by the purchaser.

The two methods may not be combined in a single transaction; that is, a seller may not sell on a basis which gives him the benefit of favorable estimated weights but requires the use of actual weights on items where estimated weights would be unfavorable to him. Note that sales described as "ceiling delivered", or as f. o. b. mill with freight paid or included to a given destination, are to be treated as sales on a delivered basis. In such cases, the given estimated weights must be used. However, sales f. o. b. mill with seller to pay the freight to a stated destination and include it in his invoice to the buyer is a sale on an f. o. b. mill basis, and settlement on the basis of the actual weights must be made.

(2) The estimated green weights may be used only when green lumber is actually specified and shipped.

(3) The transportation charge, when estimated weights are used, must be evened out to the nearest quarter-dollar per 1000 feet board measure (or nearest 5 cents per 1000 pieces of plastering lath).

(b) *Common or contract carrier (other than rail).* Where transportation is by common or contract carrier (other than rail) the only rule is that actual cost of transportation may be added to f. o. b. mill ceiling.

(c) *Private truck.* When shipment is by truck owned or controlled by the seller, the amount added for transportation may not be more than the "actual cost" to the seller of delivery by truck. The "actual cost" may not be higher than the over-all average trucking charge for a similar delivery, arrived at as of the six-month period ending June 30, 1942. In any event, the amount added may not be more than the rail carload rate for the most similar haul as applied to the quantity of lumber actually shipped. However, if this railroad charge is less than $1.50 per MBM, and if the actual cost of delivery is more than $1.50 per MBM, a transportation charge of $1.50 per MBM may be made.

(d) *Trucking to rail shipping point.* When a truck haul precedes rail shipment, as when a mill located away from a railhead hauls lumber by truck to the railroad, no addition may be made for the truck haul. However, in the following three cases a mill may apply for special permission to make an addition:

(1) Where the mill was located away from rail connections because it specialized in water-borne lumber, and where shortage of shipping has forced it to operate by rail;

(2) Where the mill, prior to the shortage of tires and gasoline, shipped lumber to the particular final destination principally by all-truck haul, and now wishes to convert to truck-and-rail haul to save tires and gasoline, and is a substantial distance from a railhead.

(c) Where random length shipments

(3) Where a mill's rail connection has been abandoned since September 5, 1941, and it has no comparable rail shipping point.

The application should be made by letter to the Lumber Branch of the Office of Price Administration, Washington, D. C., and may be acted upon by letter or telegram. The addition may not be made on quotations or sales until permission has been received.

(e) *Truck delivery after rail haul.* When truck delivery to yard or job site follows a rail haul, and is specified in the order, the actual cost of truck delivery may be added. This may include the actual cost of handling and reloading involved in transfer from rail cars to trucks.

(f) *All-truck haul.* When an all-truck haul ends in delivery to the job site, no special addition may be made above the charges provided in sub-paragraphs (b) and (c) of this section.

SEC. 8 *Sales for export.* The maximum price at which a person may export any Southern pine lumber shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation [1] issued by the Office of Price Administration.

SEC. 9 *Addition for mixed car or mixed truck shipments.* $1.00 additional per 1,000 ft. board measure may be charged for mixed car or mixed truck shipments. A mixed car shipment consists of 3 or more items provided at least 3 items amount to not less than 2,000 board feet each, or at least 6 items amount to not less than 1,000 board feet each, or at least 12 items amount to not less than 500 board feet each. A mixed truck shipment consists of 3 or more items provided at least 3 items amount to not less than 500 board feet each, or at least 6 items amount to not less than 250 board feet each. An item consists of one width, thickness, species (shortleaf or longleaf), working, or "class" of lumber. For the purpose of this regulation an item is in a different "class" if it appears in a different table in this regulation. Different grades or lengths or random widths so ordered do not establish different items for the purpose of this section.

SEC. 10. *F. A. S. sales.* On all F. A. S. sales of lumber to be shipped outside of territorial United States one addition of $3.50 per MBM may be made. This addition may be made only if the seller, at the request of the buyer, bears the expense of so many of the following services as are actually to be performed: marking, bundling, assembling, switching, unloading, tallying, painting the ends, dock insurance and other services required for the proper dispatch of offshore cargo. In other words, if the buyer actually bears the expense of any of these services because of the seller's failure to perform such service or services, the addition may not be made. However, if the buyer's requirements do not include or permit unloading and any dock services which may be incidental thereto, but all other required services are performed, the addition shall be reduced to $2.25.

ARTICLE III—SPECIFIC DUTIES AND PROHIBITED PRACTICES

SEC. 11 *What the invoice must contain.*—(a) *F. o. b. mill price.* All invoices must contain a sufficiently complete description of the lumber to show whether the price is proper or not. Any working, specification, or extra which affects the maximum f. o. b. mill prices must be mentioned in the description. The amount added for these does not have to be separately shown.

(b) *Charges for transportation.* In all delivered sales, the invoice must contain the:

(1) Point of origin of shipment;

(2) Destination;

(3) Rail rate, if estimated weights are used; otherwise the actual amount added for transportation;

(4) The words "Direct-mill shipment".

(c) *Delivery and related charges.* Any separate charge which the seller is permitted to make for truck delivery after rail haul, or for trucking to railhead, must be separately shown on the invoice.

(d) *Direct-mill retail sale.* If the "direct-mill retail sale" mark-up is permissible and is added, this must be separately indicated in the invoice.

SEC. 12 *Special rule on averaging out.*—(a) *Different grades, classes or sizes.* Different grades, classes or sizes of lumber may be sold and invoiced at an average price if all of the following conditions are observed:

(1) The footage of each item must be shown separately, and a piece tally must be furnished for each shipment.

(2) The average price for the lumber actually shipped must not be higher than it would have been if all the individual grades, classes and sizes shipped had been sold separately at the individual ceiling price.

(3) If the order is shipped in more than a single carload, truckload, or boat shipment the following invoicing and charging practices must also be followed:

(i) The invoice must show that it is part of a larger order and identify the order. It must also show the individual ceiling prices for the various items of lumber actually contained in each shipment, and the average selling price agreed upon.

(ii) The charges which may be made and collected on account for each shipment must not exceed the average price agreed upon or the total of the ceiling prices for the items in the particular shipment, whichever is the lower. Thus, if an average price was quoted on widths from 4" to 12", and if a car of all 4" was shipped, only the 4" price can be charged and collected on that car. But if a car of all 12" widths was shipped, only the average price quoted could be charged on that car.

(iii) Upon completion of the order the seller must render a final invoice showing the quantity of each shipment or delivery, the freight charge for each if sold on a delivered basis, the amount received on account, the total amount due on the order at the agreed average prices, and a reconciliation of the total amount so computed with the maximum prices permitted by this regulation. Final payment and all necessary adjustments between buyer and seller are to be made upon the final reconciliation.

(b) *Different freight rates.* When a single order, for which a single flat delivered price was quoted and accepted, is shipped from two or more mills to a single destination on varying freight rates, the seller may average-out the transportation charges. For example, if a wholesaler bids $33.00 per MBM on a single order of a hundred thousand feet of lumber, the ceiling price being $30.00 per MBM and the estimated freight $3.00, he can ship half of it on a rate resulting in a $2.00 freight charge and half on a rate resulting in a $4.00 freight charge.

(1) Where this practice is adopted, the seller must observe all of the following conditions:

(i) Each invoice must state that the particular shipment is part of a larger order and identify the order. It must also show the individual rates for each shipment or delivery.

(ii) The transportation charges which may be made and collected for each shipment or delivery, on account, must not exceed the average transportation charge figured on the entire order or the actual transportation charge for the particular shipment based upon the permitted estimated weights, whichever is the lower.

(iii) Upon completion of the order the seller must render a final invoice showing the individual f. o. b. mill prices separately, the amount shipped from each mill, the freight charge for each shipment, and a reconciliation of the total amount so computed with the agreed delivered selling prices and also with the maximum prices permitted by this regulation. In the event that the sale was made at an average price for different grades, classes or sizes of lumber as well as an averaging-out of transportation charges, the provisions of (a) above shall also be observed. Final payment and all necessary adjustments between buyer and seller are to be made upon the final reconciliation.

SEC. 13 *What records must be kept.* All sellers of Southern pine lumber must keep records which will show a complete description of the items of lumber sold (i. e. grade, condition of dressing, quantity, etc.) the name and address of the buyer, the date of the sale and price, for a period of two years. Buyers must keep similar records, including the name and address of the seller. Failure to comply with this provision shall constitute a violation of this regulation. Persons violating are subject to all penalties, actions and proceedings provided for by the Emergency Price Control Act of 1942 as amended, including a fine of not more than $5,000 or imprisonment for not more than two years, or both.

SEC. 14 *Prohibited practices.*—(a) *General.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price. This applies to changes in credit practices and cash discounts and to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings and the like.

(b) *Specific practices.* The following are some of the specific practices prohibited;

(1) Getting the effect of a higher price by changing credit practices from what they were in August 1941. This includes decreasing credit periods or making greater charges for extension of credit.

(2) Refusing, without good reason, to ship except in specified or restricted random lengths, or in mixed cars, or under other circumstances which bring the seller an extra return.

(3) Selling as specified lengths or widths, a specific lot or shipment of lumber which is substantially equivalent to random lengths or widths, or reselling intact as specified lengths or widths a specific lot or shipment bought by the seller as standard or random lengths or widths, unless specifically permitted in the price tables. This prohibition shall not apply to shipments or deliveries which have been sorted out as to widths and lengths and then resold.

(4) Grading as a special grade lumber which can be graded as a standard grade; or wrongly or falsely grading or invoicing lumber.

(5) Making additions for special specifications, services, or other extras which are not specifically permitted.

(6) Refusing to sell on an f. o. b. mill basis, and insisting on selling on a delivered basis.

(7) Failing to invoice properly and in accordance with the requirements of this regulation.

(8) Unnecessarily routing lumber through a distribution yard.

(9) Quoting a gross price above the maximum price, even if accompanied by a discount the effect of which is to bring the net price below the maximum.

(10) Making additions for kiln-drying, anti-stain treatment or other services, treatments, or specifications unless they are expressly ordered by the buyer.

(11) Getting a higher price by charging the buyer for ripping or resawing, or charging on the basis of an original size larger than the item actually delivered: (for example: charging the price of 4 x 4 ripped to 2 x 4 on a sale and delivery of 2 x 4's) except where the items ordered and delivered are non-standard sizes not specifically priced in the tables. This prohibition has no application where the buyer specified the larger size to be ripped or resawn into items of smaller size and the resulting items are priced higher in the tables than the original larger size; for example, the buyer may order 1 x 4 x 12' #2 Common Shortleaf, priced at $31.00 per MBM ripped to 1 x 2 x 12'. By buying the larger size ripped the price to the buyer is lower ($32.00) than it would have been had he ordered the 1 x 2 as such ($34.00). In this example the maximum price is $32.00.

(12) Making the buyer take something he does not want in order to get what he does want; for example, making a buyer who orders No. 2 Common take all the upper grades that develop.

(13) Breaking up an order or apportioning deliveries in order to get the $3.50 direct-mill retail sale addition.

(c) *Adding commission to ceiling prohibited.* It is unlawful for any person to charge, receive or pay a commission for the service of procuring, buying, selling or locating lumber, or for any related service (such as "expediting") which does not involve actual physical handling of lumber, if the commission plus the purchase price results in a total payment by the buyer of lumber which is higher than the maximum price of the lumber. For purposes of this regulation, a commission is any service charge or payment which is figured either directly or indirectly on the basis of the quantity, price or value of the lumber in connection with which the service is performed.

(d) *Combination grades.* Lumber sold on combination grades may not be sold above the maximum price for the lowest priced grade actually named in the combination. For example, the maximum price for lumber sold as No. 2 Common and better is the maximum price fixed for No. 2 Common lumber. But it is permissible to quote a grade with specified percentages of higher grades, provided that when the lumber is shipped, lumber of each grade is tallied on a board foot basis and invoiced separately at prices not in excess of ceiling prices for the respective grades.

(e) *Adjustable pricing.* A price may be made adjustable to the maximum price in effect at the time of delivery. It may not be made adjustable to a maximum price in effect later than the date of delivery, except by special authorization. The Lumber Branch of the Office of Price Administration, Washington, D. C., may issue this authorization, by letter, telegram or general order, when an amendment to this regulation is pending, as the result either of a petition for amendment or of a formal industry advisory committee recommendation.

SEC. 15 *Special pricing rules.* (a) Where the buyer specifies restricted lengths or an average length and the shipment or order fails to conform, the entire shipment must be priced at the random length price (unless the agreed price is lower).

(b) Where the buyer orders a random length shipment, and the given percentages of lengths as specified in footnotes to some of the price tables are not met because there is too large a percentage of shorts, the excess shorts must be priced at the separate prices for the short lengths.

(c) Where random length shipments required to average a specified length (e. g. 12' in the Board Table) fall short of this average, the price may not exceed that of the nearest shorter even length below the average length actually shipped.

(d) Where the order does not specify whether longleaf or shortleaf is required, the seller may only charge shortleaf prices.

(e) Where the order fails to specify the grade required, the seller may only ship and charge for No. 2 Common, unless otherwise agreed.

(f) Where the invoice does not specify the grade shipped or delivered, the price of the lowest grade in the shipment shall apply to the whole order.

(g) Where moisture content requirements are waived by the purchaser, the maximum price for the whole order, shipment or delivery shall be the price herein established for green lumber. Where such a sale is made on a delivered basis, the seller may only use the given estimated weights for dry lumber in computing transportation costs.

(h) None of the additions contained in the footnotes to the tables in Articles V and VI may be added to the prices of the various items set forth in the tables unless the order expressly requires the working, grade, condition, size, or length for which the additions are permitted.

ARTICLE IV—MISCELLANEOUS

SEC. 16 *Petitions for adjustment or amendment.*—(a) *Government contracts.* (1) The term "Government contract" is here used to include any contract with the United States or any of its agencies or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to promote the Defense of the United States" which also includes any subcontract under this kind of contract.

(2) Any person who has entered into or proposes to enter into a "Government contract", who believes that the maximum prices contained in this Regulation impede or threaten to impede production of Southern pine lumber essential to the war program, may file an application for adjustment in accordance with Procedural Regulation No. 6 [1] issued by the Office of Price Administration. As soon as the application is filed, contracts, deliveries, and payments may be made at the requested price, subject to refund if the requested price is disapproved or lowered. The seller must notify the buyer that the delivery is made subject to this refund.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a

[1] 7 F.R. 5087, 5664.

petition for amendment in accordance

grade which is not specifically priced in

made at the requested price, but the

petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1[6] issued by the Office of Price Administration.

SEC. 17 *Enforcement.* (a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided for by the Emergency Price Control Act of 1942, as amended.

(b) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. Persons who make sales covered by this regulation to War procurement agencies and buyers to whom lumber has been allocated by any such agencies are, however, subject to all the liabilities imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Divison of the Treasury Department, or any of their agencies.

SEC. 18 *Licensing.* All sellers under this regulation, except mills, are licensed by Supplementary Order 18. This order, in brief, provides that a license is necessary, except for mills, to make sales under this regulation. A license is automatically granted to all sellers making these sales. It is not necessary to apply specially for the license, but a registration may later be required. The Emergency Price Control Act of 1942, as amended, and Supplementary Order 18 tell the circumstances under which licenses may be suspended. The license cannot be transferred.

SEC. 19 *Grades.* The grades and terms in this regulation are based on the 1939 standard specifications for Southern pine lumber of the Southern Pine Inspection Bureau, the 1923 Gulf Coast Classification, issued by the Southern Pine Association, and the 1934 standard specifications for grades of Southern pine lumber for freight cars and locomotives in accordance with the Association of American Railroads' recommended practice, issued by the Southern Pine Inspection Bureau.

SEC. 20 *Grades, services, or extras not listed.* (a) If a seller wishes to sell a grade which is not specifically priced in the price tables, or wishes to make an addition for special workings, specifications, services, or other extras for which additions are not specifically permitted, he must apply to the Lumber Branch, Office of Price Administration, Washington, D. C., for a maximum price. He must provide the following information:

(1) The requested price;

(2) A complete description of the item to be priced; and

(3) The price differential between it and the most comparable item in the price tables, between January 1 and August 1, 1941, from the seller's own records, or if that is impossible, from the experience of the trade. If no established price differential existed, a detailed analysis of comparative value should be furnished.

(b) As soon as the request has been filed, quotations and deliveries may be made at the requested price, but the final payment may not be made until the price has been approved. Action on the request may be by letter or telegram.

(c) In all cases where special prices have been approved by the Lumber Branch of the Office of Price Administration under § 1381.212, paragraphs (f), (g) and (h) of the earlier regulation, Maximum Price Regulation 19, these special prices shall no longer apply if specific prices for the items are established by this regulation; but where no specific prices are established in the price tables, price approved under the earlier regulations shall continue in effect.

If there is no even multiple length 12' or shorter, charge the 12' price. In either case, add $1.50 per M. B. M. for each necessary cross cut, but the addition for precision cutting permitted in footnote 12 may not also be charged, and no total charge for such service may be greater than $6.00 per M. B. M. If length breaks on even one half foot compute footage on actual length, otherwise compute on six inch breaks on the next break above.

22. For an average width, charge the price which would have been charged had the buyer ordered the various widths which were shipped.
23. Random widths (Other than restricted random widths), each width shall be priced at the specified width price.

[1] Edge widths are random widths including odd, even or fractional widths. Measurement shall be according to paragraph 136 S. P. I. B. Rules.

[2] Restricted random widths are 4" to 12" inclusive, and must not contain over 20% of 4" widths, and not less than 20% of 10" and wider.

ADDITIONS AND DEDUCTIONS PER 1,000 FEET BOARD MEASURE (See Sec. 15 (h))

For working:
1. Rough, deduct $1.00.
2. End-matching, add $2.00.
3. No addition may be made for any matcher dressing not otherwise provided for. Patterns requiring moulder work, add $0.50.
4. Ripping or Resawing, add $1.00 for each cut.

For grade:
5. No. 1 common 85 or 90% heart facial area, add $20.00.
6. No. 2 common 85 or 90% heart facial area, add $12.00.

For condition:
7. Kiln dried, add $1.00.
8. Green, deduct $2.00.
9. Anti-stain treatment (any form), add 50¢ to air dried prices, but not to kiln dried prices.

For length:
10. Random lengths must average at least 12' (with a tolerance of 3") and must take the 12' price.
11. Restricted random lengths, 10' to 16', or longer, all grades and 8' to 16', or longer No. 2 or lower grades, charge the specified length price for the lengths actually shipped.
12. For any average length, charge the price for the specified length corresponding to the average length required and shipped.
13. For precision cutting to a specified exact length, with tolerance of not more than ¼" allowed, add $1.50. No addition is permitted for customary double end trimming.
14. Odd or fractional lengths over 4', not listed, shall be counted and priced as the next longer even length.
15. For any length shorter than 4', cut to a specified exact length, charge the price of the nearest even multiple length up to 12'. If there is no even multiple length 12' or shorter, charge the 12' price. In either case add $1.50 per M. B. M. for each necessary cross cut, but the additions for precision cutting permitted in footnote 13 may not also be charged and no total charge for such service may be greater than $6.00 per M. B. M. If length breaks on even one half foot compute footage on actual length, otherwise compute on six inch breaks on the next break above.

For size:
16. Stock thinner than ¾", deduct $1.00 from the ¾" price for each 1/8" thinner than ¾". However, sizes that can be resawn from boards or strips 1" in nominal thickness shall take the 1" price plus the resawing addition permitted.
17. 12" and wider, add $2.50 per inch or fraction thereof to 12" price and compute footage on actual size.
18. 5/4, 6/4, and 7/4 No. 1 and No. 2 Common, add $7.00.
19. 5/4, 6/4 and 7/4 No. 3 Common, add $4.00.
20. 5/4, 6/4 and 7/4 No. 4 Common and dunnage, add $2.00.
21. Extra standard thickness, thicker than American lumber standards (for yard stock), add $1.00 where stock is dressed clean. No addition may be made for hit or miss dressing.
22. For an average width, charge the price that would have been charged had the buyer ordered the various widths that were shipped.
23. Random widths (other than restricted random widths) each width shall be priced at the specified width price.

[1] Restricted random widths are 4" to 12" inclusive, and must not contain over 20% of 4" and not less than 20% of 10" and wider.

3. Ripping or resawing, add $1.00 for each cut.
4. Tongued and center matched, add $4.00.

For grade:
5. No. 2, 1650 f. Par. 333, *when grade marked*, add $2.50 to No. 2 common prices.
6. No. 1 common and No. 2 common, 85 or 90% heart facial area, sizes 2 x 2 to 2 x 8, add $15.00.
7. No. 1 common and No. 2 common, 85 or 90% heart facial area, sizes 2 x 10 and 2 x 12, add $20.00.

For condition:
8. Kiln dried, add $1.00.
9. Green, deduct $2.00.
10. Anti-stain treatment (any form), add 50¢ to air dried prices, but not to kiln dried prices.

For size:
11. Extra standard thickness, thicker than American lumber standards (for yard stock), add $1.00 where stock is dressed clean. No addition may be made for hit or miss dressing.
12. Odd or fractional widths, not listed, add $3.00 to nearest greater listed width and compute footage on actual size.

For length:
13. On random length shipments, sold at a flat price, the average length to be shipped must be specified and the price shall not exceed that of the longest average shipped. If a flat price is not quoted, the specified length price for each length shipped shall be charged. In either case a per tally must accompany the invoice.
14. For any average length, even ft. 0", charge the price for the specified length corresponding to the average length required and shipped. Where a 9" average is required charge the 8" price.
15. For precision cutting to a specified exact length, with tolerance of not more than ¼" allowed, add $1.50. No addition is permitted for customary double end trimming.
16. Odd or fractional lengths over 4', not listed, shall be counted and priced as the next longer even length.
17. For any length shorter than 4', cut to a specified exact length, charge the price of the nearest even multiple length up to 12'. If there is no even multiple length 12' or shorter, charge the 12' price. In either case, add $1.50 per M. B. M. for each necessary cross cut, but the addition permitted in footnote 15 for precision cutting may not also be charged, and no total charge for such service may be greater than $6.00 per M. B. M. If length breaks on even one-half foot, compute footage on actual length, otherwise compute on six inch breaks on the next break above.
18. Lengths longer than 24', add to 24' price as follows (for all grades):

Length:		Length:	
26'	$ 2.00	34'	$14.00
28'	4.00	36'	18.00

16. Extra standard thickness, thicker than American lumber standards (for yard stock), add $1.00 where stock is dressed clean. No addition may be made for hit or miss dressing.
17. Random widths (other than restricted random widths [3]), each width shall be priced at the specified width price.

For length:
18. For precision cutting to a specified exact length, with tolerance of not more than ¼″ allowed, add $1.50. No addition is permitted for customary double end trimming.
19. Odd or fractional lengths over 4′, not listed, shall be counted and priced as next longer even length.
20. For any length shorter than 4′, cut to a specified exact length, charge the price of the nearest even multiple length up to 12′. If there is no even multiple length 12′ or shorter, charge the 12′ price. In either case, add $1.50 per M. B. M. for each necessary cross cut, but the addition for precision cutting permitted in footnote 18 may not also be charged, and no total charge for such service may be greater than $6.00 per M. B. M. If length breaks on even one half foot compute footage on actual length, otherwise compute on six inch breaks on the next break above.

[1] Standard lengths are 8′ to 20′ inclusive, and in shipments of standard lengths, 5% of 8 foot in C and better grades shall be permitted.

[2] Edge widths are random widths including odd, even or fractional widths. Measurement shall be according to paragraph 136.

[3] Restricted random widths are 4″ to 12″ inclusive, and must not contain over 20% of 4″ widths, and not less than 20% of 10″ and wider.

estimated weights used by him during the first eight months of 1941 together with a statement that he believes them to be the nearest possible estimate to the present average actual weights. After an order has been published in the FEDERAL REGISTER, listing the producer's name, any seller of the producer's lumber may use the approved estimated weights in computing transportation charges.

The following producers have qualified under this provision up to the day of issuance of this revised regulation. The permitted estimated weights are on file with the FEDERAL REGISTER and may there be examined by any interested person:

Brooks-Scanlon Corporation, Foley, Fla.
Dowling and Camp, Inc., Slater, Fla.
Peavy-Wilson Lumber Co., Holopaw, Fla.

Effective Date

This regulation shall become effective May 1, 1943, except that:

(a) If lumber has been received before May 1, 1943, by a carrier other than one owned or controlled by the seller, for shipment to a buyer, that shipment is not subject to this revised regulation. It remains subject to the terms of the earlier regulation, Maximum Price Regulation 19.

(b) If this regulation lowers any maximum price below that fixed in the earlier regulation, contracts that were in existence before the date of issuance of this revised regulation at lawful prices may be completed according to their terms, if delivery is made on or before June 1, 1943.

NOTE: The mere fact that this revised regulation increases some maximum prices does not of itself allow any seller to apply the higher prices to existing uncompleted contracts without the consent of the buyer. The regulation permits the making of certain adjustable pricing agreements to cover such situations. Apart from that, increasing prices in existing uncompleted contracts to the level of increased maximum prices in the regulation is purely a matter of agreement between buyer and seller.

PART 1394—RATIONING OF FUEL AND FUEL PRODUCTS

[RO 5C,[1] Amendment 45]

MILEAGE RATIONING: GASOLINE REGULATIONS

A rationale accompanying this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Ration Order 5C is amended in the following respects:

1. Section 1394.7706 (v) is revoked.

2. Section 1394.7706 (w) is added to read as follows:

(w) By any person who requires mileage for driving in the course of any occupation for which the vehicle is used, if such driving does not consist of preferred mileage under any other paragraph of this section. The total occupational mileage allowable for any such driving, when added to any non-preferred occupational mileage allowed for use in such vehicle, shall not exceed an average of 720 miles per month. However, if any mileage is available to a person by reason of a ration issued for his use with any other vehicle, the maximum of 720 miles per month of occupational driving allowable for the use of such person under this paragraph shall be decreased by the occupational mileage available to him by reason of the rations issued for any such other vehicle, unless such mileage consists of preferred mileage allowed under another paragraph of § 1394.7706.

(1) In the event that a person requires more than 470 miles per month in connection with his occupation for driving between home and fixed place or places of work or between fixed places of work, and the vehicle is also used for driving for which preferred mileage is allowable under this paragraph, the board may allow additional mileage in accordance with § 1394.7707. However, if the mileage allowed pursuant to that section equals or exceeds 720 miles per month the board may allow no preferred mileage pursuant to this paragraph.

(2) No mileage may be allowed under this paragraph in the gasoline shortage area until the Office of Price Administration finds that the available gasoline supply in that area justifies the extension of the provisions of this paragraph to that area.

3. Section 1394.7707 (a) is amended to read as follows:

(a) In any case outside the gasoline shortage area where the applicant or person entitled to the use of the vehicle requires more mileage than 470 miles per month for driving between home and a fixed place or places of work, or between fixed places of work in connection with any occupation he may have, or in any case in the gasoline shortage area where such a person requires more mileage than 360 miles per month for driving between home and a fixed place or places of work, or between fixed places of work in connection with his principal occupation, and such driving in either case is not preferred mileage, the board, upon approval of the State director, may allow additional mileage in excess of such maximum, to the extent required for such driving. No mileage may be allowed in any such case for driving in the course of work, unless the driving in the course of work consists of preferred mileage.

4. Section 1394.7707 (b) is amended to read as follows:

(b) An applicant for additional mileage under this section must establish by clear and convincing proof that: (1) a bona fide ride-sharing arrangement has been made pursuant to which at least four persons (including the operator) are regularly carried in the vehicle for the purpose of going to and from their occupations, or that no such ride-sharing arrangement exists but that the vehicle carries as many persons as could reasonably be expected under the circumstances, and (2) there is no reasonably adequate alternative means of transportation.

5. Section 1394.7754 (b) is amended by substituting the figures "720" for the figures "470" wherever the same appear and by substituting a comma for the final period and adding the phrase "except paragraph (w) of § 1394.7706".

6. Section 1394.8052 (a) is amended by adding at the end of the first sentence a new sentence to read as follows:

The holder of a supplemental or fleet ration may also apply for further rations to which he may become entitled by reason of a change in Ration Order 5C increasing the amount of mileage allowable to him.

This amendment shall become effective May 1, 1943.

AIR-CONDITIONING AND REFRIGERATING EQUIPMENT

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

PART 1364—FRESH, CURED, AND CANNED MEAT AND FISH PRODUCTS

[MPR 364,[1] Amendment 1]

FROZEN FISH AND SEAFOOD

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation 364 is amended in the following respects:

1. Section 2 is amended by inserting after the clause "for fresh fish from the port of entry to the freezing point." the sentence "A processor who performs the function of a primary wholesaler at a separately maintained warehouse, or who performs the function of a cash-and-carry or service-and-delivery wholesaler, as specified in section 3, shall establish his maximum price by adding the mark-up provided for the particular class of sale to the maximum price f. o. b. freezing point plus transportation to the warehouse from which the sale is made."

2. Section 3 (c) is amended to read as follows:

(c) *Wholesaler's mark-up for different classes of sales.* Mark-up is the percentage over net cost set forth hereinafter for each class of wholesaler or the type of sale involved. To obtain the selling price, multiply the net cost by the percentage mark-up figure—the result added to the net cost is the selling price. The mark-up which applies in any particular sale depends on the class in which the wholesaler is and the kind of service performed in the particular sale. No wholesaler who purchases from another wholesaler may sell at a price higher than the maximum price permitted hereunder by the seller, except as provided in paragraph (d) (1) *Primary wholesalers,* under this section. The classes, types of service, and mark-ups are set forth in the following paragraph (d).

3. Section 3 (e) is amended to read as follows:

(e) *Imported frozen fish and seafood.* The maximum price at which a wholesaler, including any agent of a foreign processor, may sell any imported frozen fish or seafood listed in section 14 shall be the base price listed in section 14 for the species and style of dressing plus or minus the differential for packaging provided for in section 13, plus the actual freight to the wholesaler's warehouse from the point at which the frozen fish enters the United States. If that freight is less than the carload rail freight rate from the shipping point in the United States closest to the processor's plant to the wholesaler's warehouse, the latter may be added in place of the actual freight. To this amount, may be added the mark-up provided for the class of sale in paragraphs (c) and (d) of section 3.

4. Section 3 (f) is added to read as follows:

(f) *Sales to war procurement agencies.* The maximum price for sales to war procurement agencies shall be determined by reference to the class of sale and kind of service performed. Wholesalers or processors who had executed contracts prior to April 13, 1943 for the sale and delivery of frozen fish and seafood to war procurement agencies may continue to sell and deliver at prices set in the contracts for a period of forty-five days after April 13, 1943.

5. Section 4 is amended by deleting the words "United States, its territories and possessions" and inserting in their place the words "forty-eight states of the United States and the District of Columbia."

6. In section 12 (a), the "Processor" definition is amended to read as follows:

"Processor" means the person who owns the fish or seafood at the time they are frozen, or the person who becomes the owner before they leave the original freezing point.

7. Section 14, Schedule No. 15, base price per pound for Items No. 3, 4, and 5 is amended by deleting the figures ".19", ".18", and ".18", and inserting in their respective places the figures ".20", ".19", and ".19".

8. Section 14, Schedule No. 28 is amended by adding Item No. 3, steaks (Sliced), All sizes, .21, base price per pound.

9. Section 14, Schedule No. 40, Item No. 1, style of processing, is amended by deleting the word "Skinned" and inserting in its place the word "Dressed".

10. Section 14, Schedule No. 54, Name, is amended by deleting the words "Atlantic & Gulf Coasts (Peneus setiferus), (Peneus brasiliensis)," and inserting the words "and Prawn."

11. The *effective date* provision of the regulation is amended to read as follows:

This regulation shall become effective in the United States on April 13, 1943.

This amendment shall become effective April 26, 1943.

Ration Order 17 is amended in the following respects:

1. Section 1.4b is added to read as follows:

SEC. 1.4b *Residents of Mexico may acquire shoes in the United States.* (a) Any person who resides in Baja California, Mexico, within ninety kilometers of the border between Mexico and the United States, or in any other part of Mexico within twenty kilometers of that border, may apply for special shoe stamps to enable him to acquire shoes in the United States at the rate of one pair for each period for which a War Ration Stamp is valid, as specified in section 1.16. An application may be made by a person under 18 years of age only if he is the head of a household or is not a member of a family. However, anyone who can complete the application may sign or present it as agent for an applicant who is unable to appear.

(b) The application must contain or be accompanied by all information needed to establish the eligibility of all the persons for whom the application is made, and any other information called for by the form or requested by the Board or the Customs Officer. (c) The board, or the Customs Officer, may issue to the applicant, for each period, one special shoe stamp for each eligible person for whom the application is made, and shall insert on each stamp issued the symbol "M" and the date of the commencement of the period for which the stamp is issued. However, stamps issued for the first period shall be dated April 20, 1943.

(d) Stamps may be obtained for subsequent periods without making a new application unless the Board or Customs Officer otherwise requires.

(e) Stamps issued pursuant to this section shall be deemed to be valid for use by the consumer at any time during the period for which they were issued.

2. Section 2.9 (a) is amended by adding, between the second and third sentences, the following sentence: "Special shoe stamps issued pursuant to section 1.4b may be deposited within 30 days after the end of the period for which they were issued."

This amendment shall become effective April 26, 1943.

A new Article XXV containing sections 25.1, 25.2, 25.3, and 25.4 is added to read as follows:

Article XXV—Acquisition of Foods Covered by This Order by Residents of Mexico

to acquire any foods covered by this order other than "rationed fats or oils". He shall also give any other information which the board or the Customs Officer may request.

(c) If the board (or the customs officer) finds, that the persons included in the application reside in Mexico, within the area described in paragraph (a), and desire to acquire foods covered by this order, in the United States, it shall grant the application. Each certificate issued shall be for all the persons included in the application.

(d) Each certificate issued shall cover one month. There are two exceptions to this rule:

(1) If the application is made in April 1943, the first certificate issued shall cover April and May 1943.

(2) If the persons included in the application are unable for any reason to acquire foods covered by this order in the United States at least once a month, the board (or customs officer) may issue a single certificate to cover two consecutive calendar months.

(e) If the application shows that any foods covered by the order other than rationed fats or oils are to be acquired in the United States for the persons included in the application, the monthly ration for each of the persons included shall be 64 points; if only rationed fats or oils are to be acquired, the monthly allowance for each of the persons included shall be 16 points. The full monthly ration shall be allowed for the month in which the application is made, regardless of the time of the month when the application is made.

(f) The certificate shall be issued in the name of the retailer, wholesaler or primary distributor from whom the foods covered by this order will be acquired. The board (or the customs officer) shall insert, at the top of the certificate above the words "Food Ration Certificate", the name of the applicant for the certificate and the number of persons for whom the certificate is issued. After the words "not valid after" appearing on the certificate, the last day of the period for which it is issued shall be inserted. At the time a certificate is issued, the board (or the customs officer) shall endorse the letter "R" on the applicant's nonresident alien's border crossing identification card, or passport bearing either a visa for entry into the United States or a notation showing that such a visa has been issued and upon the immigration papers, if any, of the other persons included in the application.

(g) The board (or customs officer) shall send the original of the certificate to the person in whose name it is issued, and shall give the duplicate to the applicant. If the certificate is prepared by a customs officer, he shall send the triplicate to the board nearest his customs station. The board shall keep the triplicate in its files.

(h) The board (or customs officer) shall issue certificates for subsequent periods after the first period, only if the applicant returns to the board (or customs officer) his duplicate copy of any certificate which was issued to him for the preceding period. The applicant shall, within five days after the expiration of any certificate issued to him, return his duplicate copy to the board (or customs officer) either in person or by mail. However, if the duplicate copy of a certificate has been lost, destroyed or stolen, a statement given to the applicant by his supplier as provided in section 25.2 may be returned to the board (or customs officer) in place of the duplicate or, if the applicant has not received such a statement, a board may excuse him from returning the duplicate. No new application is required for the issuance of certificates for subsequent periods, after the first, unless, since the date of the last application, the number of members of the applicant's household related to him by blood, marriage or adoption who wish to acquire foods covered by this order has been reduced or new ones have been added. Acceptance by an applicant of a duplicate certificate for a subsequent period in exchange for a duplicate issued for a prior period shall constitute a representation by the applicant that the number of such persons has not been reduced.

(i) An applicant may apply to the board (or the customs officer) where his original application was made, to change the retailer, wholesaler, or primary distributor from whom he acquires foods covered by this order. However, no application for such a change shall be granted with respect to any currently valid certificate unless the supplier in whose name it was issued has refused to accept it. The application, if made with respect to a future certificate, must be made before the 25th day of the month before the one for which the change is requested. Any certificate thereafter issued to the applicant by the board (or customs officer) shall be issued in the name of the new supplier and the original of such certificate shall be sent to him.

SEC. 25.2 *How foods covered by this order may be transferred to residents of Mexico.* (a) The supplier to whom a certificate of the type described in section 25.1 is issued, may "transfer" to the applicant named thereon, or to his authorized agent, and the applicant (or his agent) may acquire from the supplier, foods covered by this order up to the point value of the certificate, at any time before the expiration date stated on the certificate. At the time of each such transfer, the transferor shall write on the back of the duplicate copy of the certificate held by the applicant, the date of the transfer, and the point value of the foods covered by this order which were transferred. No transfer may be made unless the duplicate is presented to the transferor. However, if the applicant or his agent fails to present the duplicate on the ground that it has been lost, destroyed or stolen, the supplier may give the applicant a statement signed by the supplier, containing the applicant's name and address and the point value and dates of all transfers of foods covered by this order made against the duplicate. This statement may then be used in place of the duplicate.

SEC. 25.3 *Records to be kept by persons who transfer foods covered by this order to residents of Mexico.* (a) Any retailer, wholesaler or primary distributor to whom a certificate has been issued shall maintain and keep at his place of business a record showing the name of each applicant for whom he has received a certificate, the point value of each certificate and of all foods covered by this order transferred against it and the dates of such transfers.

SEC. 25.4 *Procurement of foods covered by this order by supplier.* Any retailer, wholesaler or primary distributor to whom a certificate has been issued may, after signing his name on the back of the certificate, use it to acquire foods covered by this order equal in point value to the value of the certificate. Before the 10th day of each month after May 1943, he must give to his board a written statement showing the total point value of all certificates received by him for the preceding month or, in the case of the June report, for the period of April and May 1943, and the total point value of all transfers of foods covered by this order made under such certificates. He shall account to the Office of Price Administration at a time and in a manner to be fixed by that office for the amount by which the number of points given to him by certificates issued under this article exceeds the point value of his transfers against such certificates during the period for which such certificates were issued.

This amendment shall become effective April 26, 1943.

NOTE: All reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

REQUEST FOR APPROVAL OF PROGRAM INVOLVING JOINT ACTION BY PURCHASERS OF LOGS AND BOLTS

APRIL 21, 1943.

THE CHAIRMAN, WAR PRODUCTION BOARD:

In order for the Office of Price Administration adequately to discharge its duties under the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328, it is necessary that buyers of logs and bolts, who are subject to Maximum Price Regulation 348, as amended (Logs and Bolts) (8 F.R. 3670, 5163), act together in a manner proper to the preparation of joint petitions to be filed under and provided for in section 9 of the regulation.

Section 9 in part reads as follows:

SEC. 9 *Establishment of dollars-and-cents prices by areas*—(a) *Petition for "area pricing"*. Any group of four or more buying plants, of any kind, may petition the Lumber Branch of the Office of Price Administration in Washington, D. C., to establish a system of dollars-and-cents prices by grades, sizes, and species for buying plants in an area of at least 400 square miles which contains at least five buying plants. The petition must relate to all grades, sizes, and species of logs and bolts bought by plants in that area of the kind joining in the petition, and must request establishment of a system of ceiling prices applicable to all buying plants in the area.

(b) *Contents of petition*. The petition must contain:

(1) A description of the exact boundaries of the area, and the reasons for the boundary lines chosen; that is, the reasons why the particular area constitutes a market area in which a single pricing system should prevail.

(2) Copies of the notices of maximum prices of the petitioning plants.

(3) A proposal of uniform grades with detailed specifications, uniform scaling rules, and a dollars-and-cents ceiling price system; and a comparison of these with the average prices, and the grades and rules prevailing in the area during the period September–October 1942. The system proposed may contain price differentials within the area, based on differences in transportation rates, which will prevent diversion of logs as between buying plants in the area.

(4) A showing that the proposed prices will not cause diversion of logs or bolts away from buying plants in either this area or elsewhere.

In preparing area pricing petitions, it will be necessary for buyers of logs and bolts subject to regulation to discuss, in meetings or in correspondence, the following matters:

1. Specifications, scaling practices, and grading rules for logs and bolts.

2. Boundaries of areas to which maximum price systems should apply.

3. Maximum prices for logs and bolts, including such matters as price differentials, zones, and transportation charges as they relate to maximum prices.

All joint actions and discussions contemplated by this regulation are to relate directly, and are restricted, to the proper preparation of a petition for area pricing under section 9. If the actions or discussions in concert go beyond this limitation, the entire course of joint conduct shall be considered improper and subject to the restrictions of law which would apply in the absence of any certification by you pursuant to this recommendation. Specifically, but not exclusively, the following actions or discussions shall be deemed to be improper:

1. Discussions relating to products made from logs and bolts, including matters of prices, costs of production, and trade practices, or the like.

2. Discussions relating to allocations of territories within a given area or to allocations to particular buyers of sellers of products.

3. The use of any coercion, direct or indirect, to secure participation of any individual or group in the permissible discussions or the petitions. Coercive practices include the imposition of any condition or prerequisites to participation, such as requiring the joining of an association, grading bureau, or the like.

4. Interfering with, or preventing, the communication to the Office of Price Administration, of the separate views or expressions of any affected individual or group. This includes preventing a person from joining in the petition with reservations or conditions.

It appearing that some joint discussions and actions by buyers of logs and bolts are in conformity with Maximum Price Regulation 348 as amended and that the effectuation thereof will accomplish the purposes of the regulation, I have approved the program set out in section 9 of the regulation and recommend that you find and certify pursuant to section 12 of Public Law 603, 77th Congress (56 Stat. 357) the doing of any act or thing, or the omission to do any act or thing, by any person in compliance with this Recommendation and said section 9, is requisite to the prosecution of the war.

Administrator.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-300]

A. W. HEBEBRAND

A. W. Hebebrand is a partner in the firm of Hebebrand Builders with offices at 18,900 Lorain Avenue, Cleveland, Ohio. The partnership has been engaged for a number of years in building operations and has built more than 200 houses during the last two years. A. W. Hebebrand is the person actively in charge of the firm's operations.

Shortly before October 1, 1942, he purchased for his own use a large house on a 33 acre estate located at 6388 Rocky River (Riverside) Drive, Cleveland, Ohio. On or about October 1, 1942, the respondent employed an architect to prepare plans to remodel this house, in addition to making numerous and extensive changes in the appurtenances and grounds, which contain a stream, tennis court, stable, and four-car garage. Shortly thereafter, the respondent, as owner and installer, began construction of alterations and improvements using critical materials and labor in violation of Conservation Order L-41, Conservation Order M-9-c-4 and Preference Rating Order P-84. Early in December, 1942, when the work was stopped, the respondent had already paid out to apply thereon a total of $4,230.53 and the ultimate cost would have approximated $7,500.00 which was greatly in excess of the amount permitted under L-41. The use of copper pipe and tubing was a violation of Conservation Order M-9-c-4. The purchase and use of new metal heating and plumbing equipment was a violation of P-84. The respondent either knew or should have known of these restrictions on construction work and scarce materials.

Such actions constitute wilful violations of Conservation Order L-41, Conservation Order M-9-c-4 and Preference Rating Order P-84; they have diverted critical materials and labor into nonessential uses without authorization of the War Production Board, and have impeded and hampered the war effort of the United States. In view of the foregoing; *It is hereby ordered*, That:

§ 1010.300 *Suspension Order S-300.* (a) Neither A. W. Hebebrand, nor his successors or assigns, nor any other person, directly or indirectly, shall order, purchase, accept delivery of, withdraw from inventory, or in any other manner secure or use any material or construction plant in order to begin or continue any "construction" (as "construction" is defined in Conservation Order L-41, as amended), whether heretofore commenced or not, on the buildings and premises located at 6388 Rocky River (Riverside) Drive, Cleveland, Ohio, unless specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve A. W. Hebebrand, his successors and assigns from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on April 29, 1943.

Issued this 27th day of April 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 1042—IMPORTS OF STRATEGIC MATERIALS

[General Imports Order M-63 as Amended April 28, 1943]

§ 1042.1 *General Imports Order M-63*—(a) *Definitions.* For the purposes of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, or any organized group of persons, whether or not incorporated.

(2) "Owner" of any material means any person who has any property interest in such material except a person whose interest is held solely as security for the payment of money.

(3) "Consignee" means the person to whom a material is consigned at the time of importation.

(4) "Import" means to transport in any manner into the continental United States from any foreign country or from any territory or possession of the United States (including the Philippine Islands). It includes shipments into a free port, free zone, or bonded custody of the United States Bureau of Customs (bonded warehouse) in the continental United States and shipments in bond into the continental United States for transshipment to Canada, Mexico, or any other foreign country.

(5) "Place of initial storage" means any warehouse, yard ground storage, or other place, to which the person making the entry or withdrawal from custody of the United States Bureau of Customs of material imported subject to this order directs or has directed that such material be transported from the port of entry to be held until disposed of pursuant to this order.

(6) Material shall be deemed "in transit" if it is afloat, if an on board ocean bill of lading has actually been issued with respect to it, or if it has actually been delivered to and accepted by a rail, truck, or air carrier, for transportation to a point within the continental United States.

(7) "Governing date" with respect to any material means the date when such material first became subject to General Imports Order M-63.

(b) *Restrictions on imports of materials*—(1) *General restriction.* No person, except as authorized in writing by the War Production Board, shall purchase for import, import, offer to purchase for import, receive, or offer to receive on consignment for import, or make any contract or other arrangement for the importing of, any material subject to this order after the governing date. The foregoing restrictions shall apply to the importation of any material subject to the order, regardless of the existence on the governing date or thereafter of any contract or other arrangement for the importation of such material. The materials subject to this order are those listed from time to time upon List I, List II, and List III attached hereto.

(2) *Authorization by War Production Board.* Any person desiring such authorization, whether owner, purchaser, seller, or consignee of the material to be imported, or agent of any of them, shall make application therefor in duplicate on Form PD-222C, addressed to the War Production Board, Ref.: M-63, Washington, D. C. Unless otherwise expressly permitted, such authorization shall apply only to the particular material and shipment mentioned therein and to the persons and their agents concerned with such shipment; it shall not be assignable or transferable either in whole or in part.

(3) *Restrictions on financing of imports.* No bank or other person shall participate, by financing or otherwise, in any arrangement which such bank or person knows or has reason to know involves the importation of any material subject to this order after the governing date unless such bank or person has received either a copy of the authorization issued by the War Production Board, or, if the transaction comes within the exceptions set forth in paragraph (b) (4), an affidavit stating the facts which show the exception.

(4) *Exceptions.* Unless otherwise directed by the War Production Board, the restrictions set forth in this paragraph (b) shall not apply:

(i) To the Board of Economic Warfare, Commodity Credit Corporation, Metals Reserve Company, Defense Supplies Corporation, or any other United States governmental department, agency, or corporation, or any agent acting for any such department, agency, or corporation; or

(ii) To any material of which any United States governmental department, agency, or corporation is the owner at the time of importation, or to any material which the owner at the time of importation had purchased or otherwise acquired from any United States governmental department, agency, or corporation; or

(iii) To any material which on the governing date was in transit to a point within the continental United States.

N. S. C.—No separate class or commodity number has been assigned for the material as described by the Department of Commerce, Statistical Classification of Imports.

Interpretation 1

No authorization under paragraph (b) of the order is necessary for the release or withdrawal of materials on List II or List III from a free port, a free zone, or the bonded custody of the United States Bureau of Customs (bonded warehouse) in the continental United States regardless of the date when such materials first entered such place. The actual importation, which is the subject of restriction under paragraph (b), is deemed to have occurred before the question of release or withdrawal arises. Also, no authorization under paragraph (d) of the order is necessary for the subsequent disposition, processing, or shipment of such released or withdrawn List II and List III materials.

As to List I materials which are similarly situated, no authorization under paragraph (b) of the order is necessary for their release or withdrawal from free port, free zone, or bonded custody, but authorization under paragraph (d) of the order is necessary for their subsequent disposition, processing, or shipment unless they are shipped in bond to Canada, Mexico, or some other foreign country, in which event the foreign destination is deemed to be the place of initial storage as such term is used in the order. (Issued June 30, 1942.)

INTERPRETATION 2

The following official interpretation is hereby issued by the War Production Board with respect to the meaning of the term "in transit" as defined in paragraph (a) (6) of General Imports Order M-63 (§ 1042.1) as amended.

By amendment dated December 17, 1942, the definition of material "in transit" was changed by adding the following clause, "or if it has actually been delivered to and accepted by a rail, truck, or air carrier, for transportation to a point within the continental United States." The question has been raised as to the meaning of the term as applied to a case where the material on the governing date had been delivered to and accepted by a rail, truck, or air carrier on a through bill of lading for transportation to a specified port and from thence by boat to a point within the continental United States.

The material in the stated case is not deemed to be in transit within the meaning of the term as used in the order. If the material is to be carried to the port of arrival in the continental United States by ship, the material must have been afloat, or an on board ocean bill of lading must have been issued with respect to it, on the governing date in order for it to be considered as having been in transit on such date.

Material which has been delivered to and accepted by a rail, truck, or air carrier on the governing date for transportation to a point within the continental United States is deemed to be in transit within the meaning of the term as used in the order only when the transportation specified in the bill of lading issued by such carrier calls for delivery of the material at the port of arrival in the continental United States by rail, truck, or air carrier, not by ship. (Issued March 5, 1943.)

PART 1262—HAND SERVICE TOOLS

[General Preference Order E-6 as Amended April 28, 1943]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of hand service tools and of alloy steel used in their manufacture, for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1262.1 *General Preference Order E-6*—(a) *Definitions.* For the purposes of this order:

(1) "Producer" means any individual, partnership, association, business trust, corporation, or any organized group of persons whether incorporated or not, engaged in the production of hand service tools.

(2) "Hand service tool" means any tool listed on Exhibit A hereto attached which is used by hand, and is made of iron or steel or has a principal component part made of iron or steel.

(b) *Restrictions on use of steel for the manufacture of hand service tools.* No producer shall manufacture any hand service tools out of any alloy steels except those which are in the series specified in Exhibit B to this order, or except pursuant to specific permission of the War Production Board: *Provided, however,* that any alloy steel in a series which is not listed in Exhibit B but which has been received by the producer for use in the manufacture of hand service tools before the first day of November 1942 may be so used by him.

(c) *Restrictions on sales of hand service tools.* No producer shall sell or deliver any hand service tools except pursuant to a purchase order bearing a preference rating of A-9 or higher, or except pursuant to specific permission of the War Production Board.

(d) *Reports.* Each person to whom this order applies shall execute and file with the War Production Board such reports and questionnaires as said Board shall from time to time require.

(e) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(f) *Appeal.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a degree of unemployment which would be unreasonably disproportionate compared with the amount of material conserved, or that compliance with this order would disrupt or impair a program of conversion from nondefense to defense work, may appeal to the War Production Board by addressing a letter to the War Production Board, Washington, D. C., Ref.: E-6, setting forth the pertinent facts and the reasons he considers he is entitled to relief. The War Production Board may thereupon take such action as it deems appropriate.

(g) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Washington, D. C. Ref.: E-6.

(h) *Applicability of Priorities Regulation No. 1.* This order and all transactions affected thereby are subject to the provisions of Priorities Regulation No. 1 (Part 944) as amended from time to time, except to the extent that any provision hereof may be inconsistent therewith, in which case the provisions of this order shall govern.

(i) *Changes in schedules.* Notwithstanding any other provision of this order, the War Production Board may direct or change any schedule of production or delivery of hand service tools, allocate any order for hand service tools to any other producer, divert or otherwise direct the delivery of any hand service tools to any other person.

If so, (1) describe such equipment, (2) state the average number of patients per week on which such equipment is now used, and (3) state whether the equipment applied for would be used to replace existing equipment or is needed for expansion of existing facilities.

(*b*) State how you now accomplish the work for which the equipment applied for would be used.

(2) The authorization of the War Production Board on Form PD-556 shall apply not only to the purchase order by the original purchaser for the x-ray equipment specified on such form, but also to any orders for x-ray equipment placed by such purchaser's suppliers, as permitted below, in fulfillment of the authorized order. The original purchaser shall notify his supplier of the authorization by furnishing him with a certifica-

tion in substantially the following form (on the purchase order or on an attached document):

Any such certification shall be signed by an authorized official, either manually or as provided in Priorities Regulation No. 7, and shall constitute a representation to the supplier and to the War Production Board of the facts certified therein. The supplier may rely upon such representation unless he knows or has reason to believe such representation to be false.

(e) *Production and shipping schedules and restrictions thereon.* On or before May 10, 1943, and on or before the 10th day of each succeeding calendar month, each manufacturer shall file with the War Production Board in triplicate on Form PD-774, his proposed production and shipping schedules of x-ray equipment for such period as production and shipping may be planned. Upon receipt of such form, the War Production Board will approve or disapprove the proposed production and shipping schedules or make such changes therein as it shall deem necessary, and will thereupon return to the manufacturer a copy of such form as approved or changed. PART 1499—COMMODITIES AND SERVICES

[SR 14 to GMPR, Amendment 163]

"GENERAL MANAGER TYPE" GRAIN DOORS SOLD TO RAILROADS

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.*

Section 1499.73 (a) (83) is amended to read as follows:

(83) *"General Manager type" grain doors sold to railroads*—(i) *Products covered.* This amendment covers "General Manager type" grain doors, size 7'0" x 20" x $1\frac{5}{8}$" or 7'0" x 10' x $1\frac{5}{8}$", which meet any of the following listed, or any similar, specifications:

Chicago, Burlington and Quincy R R specification = 57359

Atchison, Topeka and Santa Fe Railway specification = 17-D-2224

Great Northern Railway specification = 1631

(ii) *Maximum prices.* The maximum price for a "General Manager type" grain door delivered on the line of the pur-

chasing railroad shall be figured as follows:

(*a*) Where the seller is a grain door manufacturer who in 1942 sold the same kind of door to the railroad which is now making the purchase, the maximum price in sales to the purchasing railroad is the price figured as follows: The seller should take the maximum price which governed his sales of the door prior to the effective date of § 1499.73 (a) (83) of the General Maximum Price Regulation. He should then add the amount by which the cost of lumber charged in at market prices (but not over any ceiling price), and the cost of direct labor used in making the door increased between March 1, 1942 and March 1, 1943. The total is the seller's maximum price for that size grain door. However, in no event can the maximum price figured under this subdivision (ii) (*a*) for doors delivered on the line of the purchasing railroad be higher than the following prices:

	Hemlock or other northern softwoods or hardwoods	Ponderosa pine, fir or other western softwoods	Southern pine, cypress, basswood or other softwoods, or cottonwood, softwoods or hardwood
7'0" x 2'0" x 1⅜"	$1.15	$1.24	$1.27
7'0" x 1'0" x 1⅜"	.99	.74	.77

(*b*) Where the seller is a grain door manufacturer who in 1942 sold the same kind of door, but not to the railroad which is now making the purchase, the maximum price to the purchasing railroad is the price figured as follows: The seller should take the price figured under subdivision (ii) (*a*) above and increase (or decrease) it by the amount by which the cost, if any, of making delivery to the purchasing railroad, at the point of delivery required by the buyer, is greater (or less) than the cost of making delivery to the railroad to which the seller sold the same kind of grain doors during 1942.

(*c*) Where the seller is a grain door manufacturer who in 1942 did not sell to any railroad the same kind of door which he now is selling, the maximum price is the price which governs sales to the same purchaser by the closest competitive manufacturer who can figure a ceiling price for that kind of door under either subdivisions (ii) (*a*) or (ii) (*b*) above.

(*d*) Where the seller is not a manufacturer, the ceiling price for the seller is the same as the ceiling price for the plant which manufactures the grain doors sold by the seller.

(iii) *Reports.* Any seller who figures a price for grain doors under this amendment must report the price for each size door to the Lumber Branch, Office of Price Administration, Washington, D. C., before May 15, 1943. The report must show how the price was figured.

(*a*) Where the seller is a grain door manufacturer who in 1942 sold the same kind of door to the railroad which is now making the purchase, the report should show:

(*1*) The seller's maximum price before the effective date of § 1499.73 (a) (83) of the General Maximum Price Regulation.

(*2*) The amount added for an increase in the cost of lumber from March 1, 1942 to March 1, 1943, and an explanation of the type of lumber used and how the increase in cost was figured; and

(*3*) The amount added for an increase in the cost of direct labor from March 1, 1942 to March 1, 1943, and an explanation of how the increase in cost was figured.

(*b*) Where the seller is a grain door manufacturer who in 1942 sold the same kind of door, but not to the railroad which is now making the purchase, the report should show the things required in (*a*) above, and should indicate the adjustment, if any, made for the difference between the cost of making delivery to the purchasing railroad and the cost of making delivery to the railroad to which the seller sold the same kind of grain doors during 1942.

(*c*) Where the seller is a grain door manufacturer who in 1942 did not sell to any railroad the same kind of door which he is now selling, the report should show the name, address, and maximum price of the manufacturer whose ceiling price the seller is using.

(*d*) Where the seller is not a manufacturer, the report should show the name, address, and maximum price of the plant which manufactures the grain doors sold by the seller.

(iv) *Adjustment of incorrect maximum prices.* Where the report submitted shows that the seller figured the maximum price in an incorrect manner, the Office of Price Administration will, by letter, order the price reduced to the correct ceiling price. Refunds must be made to adjust the prices charged by the seller to the correct maximum price. If the Office of Price Administration does not order the price reduced before June 1, 1943, the reported price shall be considered approved.

This amendment shall become effective May 3, 1943.

The property herein vested, if any, and any or all of the proceeds thereof, shall be held in an appropriate special account or accounts, pending further determination of the Alien Property Custodian. Any person, except a national of a designated enemy country, asserting any claim arising as a result of this order may file with the Alien Property Custodian a notice of his claim, together with a request for a hearing thereon, on Form APC–1, within one year from the date hereof, or within such further time as may be allowed by the Alien Property Custodian. [Order 20 Under Rev. MPR 161]

LINDBERG AND HOBI COMPANY

ORDER DISMISSING APPLICATION

Order No. 20 under Revised Maximum Price Regulation No. 161[1]—West Coast Logs.

On March 4, 1943, Lindberg and Hobi Company, Tacoma, Washington, filed an application for adjustment of the maximum prices established by Revised Maximum Price Regulation No. 161 on No. 1 and No. 2 Douglas fir peeler logs sold in the Puget Sound District. This application was filed jointly under Procedural Regulation No. 6[2] and Revised Maximum Price Regulation No. 161. The application was improperly filed under those regulations for the reasons set forth below.

(a) Application for adjustment was not properly filed under either Revised Maximum Price Regulation No. 161 or Procedural Regulation No. 6 since, in the first instance, Revised Maximum Price Regulation No. 161 does not permit the filing of individual applications for adjustment, and, in the second, Procedural Regulation No. 6 permits the filing of such application only where a person has entered into or proposes to enter into a government contract or a sub-contract, and it has not been shown that applicant has entered into or proposed to enter into such contracts.

Accordingly, pursuant to the Emergency Price Control Act of 1942, and Procedural Regulations No. 1 and 6, *It is ordered*, That the said application be, and it hereby is, dismissed.

(e) *Restrictions on the use of refined oil.* No refiner, non-refining margarine manufacturer, or non-refining shortening manufacturer shall use refined oil except in such quantities and for such purposes as the Director shall specifically authorize or direct. The foregoing restriction shall be construed as being supplemented to the restrictions of any other applicable food distribution order, and an authorization or directive issued pursuant to this paragraph (e) shall not be construed as authorizing a violation of any other food distribution order.

(f) *Effective period of authorizations or directives.* The Director may prescribe in an authorization or directive, issued pursuant to this order, a period of time in which the authorization and directive shall be in force and effect, and no person shall deliver, accept delivery of, or use crude or refined oil pursuant to or in reliance on an authorization or directive for such delivery, acceptance of delivery, or use, as the case may be, after the expiration of the effective period thereof.

(g) *Inventories.* Crude or refined oil authorized or directed by the Director to be used for a specific purpose during a specified period shall revert to inventories where and to the extent that such oil is not used during the specified period for the specific purpose designated in the authorization or directive. Crude or refined oil which the Director has authorized or directed to be delivered, accepted for delivery, or used for the purpose of building up inventories, or which has reverted to inventories under the terms of this order, shall not be used for any purpose other than refining to the extent necessary to prevent deterioration, except as the Director may further authorize or direct.

(h) *Further allocations.* No person, after receiving notice from the Director to refrain from delivering or using any crude or refined oil acquired by him pursuant to an authorization or directive issued hereunder, shall deliver or use such oil, except upon further specific authorization of the Director.

(i) *Intra-company deliveries.* The provisions and restrictions of this order with respect to delivery of crude oil shall apply not only to deliveries to other persons, including affiliates and subsidiaries, but also to deliveries from one branch, division, or section of a single enterprise to another branch, division, or section of the same or any other enterprise under common ownership or control.

(j) *Contracts.* The restrictions of this order shall be observed without regard to contracts heretofore or hereinafter entered into, or any rights accrued or payments made thereunder.

(k) *Delivery.* For the purposes of this order:

(1) A person shall be deemed to have delivered crude or refined oil upon the occurrence of any one of the following:

(i) The delivery by such person of such oil to a common carrier and the issuance of a bill of lading therefor; or

(ii) The loading of such oil in a truck or tank wagon furnished by the person to whom delivery is to be made; or

(iii) The unloading of such oil in a plant or storage tank which is owned, leased, or controlled by the person to whom delivery is to be made.

(2) A person shall be deemed to have accepted delivery of crude or refined oil upon the occurrence of any one of the following:

(i) The acquisition by such person of a bill of lading issued by a common carrier for such oil; or

(ii) The loading of such oil in a truck or tank wagon furnished by such person; or

(iii) The receiving of such oil in a plant or storage tank which is owned, leased, or controlled by such person.

(l) *Applications, records, and reports.* Applications for authorizations required by this order shall be made on such forms, in such manner, for such period, and at such times as the Director shall prescribe, and every person subject to this order shall maintain such records for at least two years (or for such other periods of time as the Director may designate), and shall execute and file such reports upon such forms and submit such information as the Director may from time to time request or direct, and within such times as he may prescribe, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(m) *Audits and inspections.* Every person subject to this order shall, upon request, permit inspections, at all reasonable times, of his stocks of fats and oils and premises used in his business, and all of his books, records, and accounts shall, upon request, be submitted to audit and inspection by the Director.

(n) *Violations.* Any person who wilfully violates any provision of this order or who by any act or omission falsifies records to be kept or information to be furnished pursuant to this order or wilfully conceals a material fact concerning a matter within the jurisdiction of any Department or agency of the United States may be prohibited from receiving or making further deliveries of any material subject to allocation; and such further action may be taken against him as the Director deems appropriate, including recommendations for prosecution under section 35a of the Criminal Code (18 U.S.C. 1940 ed. 80), under paragraph 5 of section 301 of Title III of the Second War Powers Act, and under any and all other applicable laws.

(o) *Petition for relief from hardship.* Any person affected by this order who considers that compliance herewith would work an exceptional and unreasonable hardship on him may petition in writing (in triplicate) for relief to the Director, setting forth all pertinent facts and the nature of the relief sought. The Director may thereupon take such action as he deems appropriate, and such action shall be final.

(p) *Communications to Department of Agriculture.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to: Director of Food Distribution, United States Department of Agriculture, Washington, D. C. Ref.: FD–29.

PART 1010—SUSPENSION ORDERS

[Revocation of Suspension Order S-128]

CARL M. LOEB RHOADES & CO.

Suspension Order S-128 issued October 30, 1942, prohibited Carl M. Loeb, Rhoades and Company from accepting delivery of, receiving or taking any action to clear through the Bureau of Customs, 100 tons of casein imported by it from Buenos Aires in violation of General Imports Order M-63. Libels were filed on behalf of the United States in the United States District Court for the District of New Jersey and in the United States District Court for the Eastern District of New York on March 4 and 5, 1943, against two separate lots of casein comprising all the casein designated in Suspension Order S-128 which alleged that these lots of merchandise had become subject to forfeiture under the Revenue Laws of the United States (U. S. C. Title 19, section 1593) as mer-

chandise which had been imported into the United States knowingly contrary to law. Carl M. Loeb, Rhoades and Company has tendered a compromise settlement of the claims of the United States under these libels. The Assistant Attorney General, duly empowered to act on behalf of the Department of Justice in this matter, has determined that this tender should be accepted and has requested that Suspension Order S–128 be revoked so that Carl M. Loeb, Rhoades and Company may take such action as is necessary to clear the 100 tons of casein mentioned in Suspension Order S–128 and to accept delivery thereof pursuant to the terms of its tender of compromise.

In view of the foregoing, *It is hereby ordered*, That Suspension Order S–128 (§ 1010.128) issued October 30, 1942, be revoked.

Issued this 28th day of April 1943.

In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(k) *Appeals.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, may appeal to the War Production Board setting forth the pertinent facts and the reasons such person considers that he is entitled to relief. The War Production Board may thereupon take such action as it deems appropriate.

(l) *Communications.* All reports to be filed hereunder, or communications concerning this order, should be addressed to: War Production Board, Service Equipment Division, Service Machinery Section, Washington, D. C. Ref: L–190.

PART 3092—TALC

[Conservation Order M–239 as Amended April 29, 1943]

"Part 3092—Steatite Talc" is hereby amended to read "Part 3092—Talc."

Section 3092.1 *Conservation Order M–239* is hereby amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of talc for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3092.1 *Conservation Order M–239*—(a) *Definitions.* For the purposes of this order:

(1) "Talc" means naturally occurring magnesium silicate, both crude and beneficiated.

(2) "Steatite talc" means naturally occurring magnesium silicate both crude and beneficiated, suitable for use in the manufacture of electrical insulators and containing not to exceed one and one-half per cent (1½%) lime (CaO), not to exceed one and one-half per cent (1½%) ferric oxide (Fe_2O_3), and not to exceed four per cent (4%) alumina (Al_2O_3).

(3) "Producer" means a person who mines talc.

(4) "Processor" means a person who mills, treats, or classifies talc or otherwise prepares or beneficiates talc for use by consumers.

(5) "Supplier" means a person who imports talc into the United States or who offers talc for sale to consumers.

(6) "Consumer" means a person who uses talc by incorporating it physically in a product he manufactures or who consumes talc in any other commercial or laboratory process.

(7) "Inventory" of a person includes the inventory of affiliates and subsidiaries of such person, and the inventory of others where such inventory is under the control of, or under common control with, or available for the use of such person.

(8) "Minimum practicable working inventory" means:

(i) In the case of steatite talc for use in products and processes on List A, a twelve months' supply; for use in products and processes on List B, a two months' supply; and for use in all other products and processes, a three months' supply.

(ii) In the case of talc other than steatite talc, regardless of use, a six months' supply.

(iii) In the case of steatite talc to be held by dealers or distributors, a two months' supply, based upon average monthly sales during the first nine months of 1942.

(b) *Grinding of talc.* No processor shall grind steatite talc to a grain size so small that it is rendered unusable for steatite insulators, unless he has received a firm order for the amount of steatite talc so to be ground, specifying such small grain size, which is to be delivered within 30 days of the date of such grinding.

(c) *Restrictions on sales or deliveries of talc.* No person after April 29, 1943, shall sell or deliver (including a delivery under toll agreement) talc to any person if he knows or has reason to believe such material is to be received or used in violation of the terms of this order.

(d) *Limitations of inventories*—(1) *Accumulation.* No supplier, other than a producer or a processor, and no consumer, shall accumulate an inventory of talc in the form of raw materials, semi-processed materials, finished parts, or sub-assemblies in quantities in excess of a minimum practicable working inventory.

(2) *Further receipts.* No supplier, other than a producer or a processor, and no consumer, who has an inventory in excess of a minimum practicable working inventory, shall receive any additional talc until his inventory thereof has been reduced below a minimum practicable working inventory.

(3) *Exception.* The foregoing limitations on inventories shall not apply to any supplier (including a dealer or distributor) whose current rate of sale of talc does not exceed five (5) tons per month, or to any consumer whose current rate of consumption of talc does not exceed one (1) ton per month: *Provided, however,* No such supplier or consumer shall accumulate an inventory of talc in the form of raw material in excess of sixty (60) tons.

(e) *Reports.* Each processor shall file in duplicate Form PD–862 in time to reach the War Production Board on or before the 10th day of each month; and each consumer, except a consumer whose current rate of consumption of talc does not exceed one (1) ton per month, shall file in duplicate Form PD–863 in time to reach the War Production Board on or before the 10th day of each calendar quarter.

(f) *Miscellaneous provisions*—(1) *Appeal.* Appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(2) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time. All releases of steatite mines which have been granted under Order M–239 prior to April 29, 1943, are hereby revoked. All steatite mines which have been so released prior to April 29, 1943, are subject to all provisions of this order.

(3) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Miscellaneous Minerals Division, Washington, D. C.; Ref: M–239.

(4) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any depart-

ment or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(6) [Revoked April 29, 1943]

(d) *Restriction of sales by producers.* No producer shall sell, transfer or deliver to any person any automotive maintenance equipment, or any replacement parts for automotive maintenance equipment except pursuant to orders bearing a preference rating of AA-5 or higher.

[Order A-1 Under MPR 188, Amendment 3]

MANUFACTURERS OF SPECIAL REFRACTORY SHAPES

MODIFICATION OF MAXIMUM PRICES

Amendment No. 3 to Order No. A-1 under § 1499.159 (b) of Maximum Price Regulation No. 188—Manufacturers' Maximum Prices for Specified Building Materials and Consumers' Goods Other Than Apparel.

An opinion accompanying Amendment No. 3 to Order No. A-1 has been issued simultaneously herewith and filed with the Division of the Federal Register.

Order No. A-1 is amended by adding a new subparagraph (a) (4) to read as follows:

(a) *Modification of maximum prices in Maximum Price Regulation No. 188.* The provisions of Maximum Price Regulation No. 188 as applied to certain commodities subject thereto are modified in accordance with §1499.159 (b) of Maximum Price Regulation No. 188 as hereinafter provided.

* * * * *

(4) *Modification of maximum prices for special refractory shapes.* (i) On and after April 29, 1943 regardless of any contract, agreement, lease or other obligation, no manufacturer of special refractory shapes shall sell and deliver any special refractory shape, and no person shall buy and receive any special refractory shapes in the course of trade or business, at prices higher than will be determined by the use of the pricing formula or formulae used by said manufacturer in March 1942 to determine the prices at that time of such special refractory shapes. The values given to the factors used in said formulae shall be no higher than the highest values given to the same factors in the determination of March 1942 prices under said formulae and the method used in computing said factors shall be the method used in March 1942.

(ii) For the purposes of this amendment the term "special refractory shapes" means refractory brick and specialties produced from highly refractory materials such as silicon carbide, fused aluminum oxide, electric furnace mullite and kyanite. They include heavy refractories consisting of bricks, plates, fabricated muffles, heavy tubes, batts, saggers, burner blocks and miscellaneous shapes for furnaces. Light refractories or laboratory ware consisting of tubes, cores, small muffles, pyrometer tubes, thermocouple tubes, small furnace parts and specials, thimbles, cones, filter and ignition crucibles, capsules, dishes and other purely laboratory articles; also porous mediums, plates, tubes and shapes, are included in the definition of special refractory shapes.

Special refractory shapes are so classified whenever they are made to the specifications of each individual order and are of sizes which are not considered standard by the "Special Refractories Institute" and are unable to be included in the manufacturer's published price lists.

(iii) On or before June 1, 1943, every manufacturer of special refractory shapes shall file with the Office of Price Administration, Building Materials Branch, Washington, D. C., unless previously submitted:

(*a*) A detailed explanation of the formula or formulae by which it priced its special shapes during March 1942.

(*b*) Calculations setting forth in detail the use of such formulae in determining prices charged for different types of special refractory shapes actually delivered by it during March 1942, or, if no such deliveries were made during that month, the application of such formulae to the prices that would have been charged had the delivery of such products made subsequently to March 1942 actually been delivered during March 1942 as a result of sales made during that month.

(*c*) The gross sales value realized from, and the percentage of total sales of special refractory shapes during the fourth calendar quarter of 1942.

This amendment shall become effective April 29, 1943.

[Order 4 Under MPR 208]

ISAACS AND COMPANY

ORDER DENYING APPLICATION FOR ADJUSTMENT AND REQUIRING REDOCKETING OF PROTEST

Order No. 4 under Maximum Price Regulation No. 208—Staple Work Clothing; Docket No. 3208-34.

On October 7, 1942, I. C. Isaacs and Company, Bank and Grundy Streets, Baltimore, Maryland, herein called applicant, filed an application for adjustment of its maximum price for Lot 1060 slacks, under § 1389.213 of Maximum Price Regulation No. 208.

After due consideration of the application the Administrator, on January 14, 1943, informed the applicant by letter that the application must be denied for the reasons set forth therein and that a formal order denying the application would not be entered unless the applicant made a written request for such an order within 30 days from the date of the letter. In addition, the applicant was advised by that letter that it was necessary that a formal order be entered if it intended to file a protest under Revised Procedural Regulation No. 1. Applicant did not request the entry of such an order. Instead on February 14, 1943, the applicant filed a protest directed to the letter of the Administrator dated January 14, 1943.

Section 203 (a) of the Emergency Price Control Act of 1942, as amended, provides only for the filing of protests to regulations or orders issued under section 2 of the Act. In order to preserve the applicant's right to obtain review of the denial of its application for adjustment the Administrator deems it appropriate to treat the protest not only as a protest but also as a request for such a formal order.

Therefore, under the authority vested in the Administrator, and in accordance with the Act and Revised Procedural Regulation No. 1: *It is ordered*, That the application for adjustment, Docket No. 3208-34, be denied and that the applicant's protest of February 14, 1943, be docketed as a protest to this order of denial.

Issued and effective this 28th day of April 1943.

Whether the requirements of paragraphs (g) and (h) (1) of Rule U-62, as applied to the proposed solicitation, are in any respects not necessary or appropriate in the public interest or for the protection of investors, or consumers, and whether the restrictions proposed in such petition, or any amendment thereto, are an adequate substitute or, under the circumstances, the only restrictions which should be imposed upon dealings in securities of Commonwealth by said committee and the companies with which its members are connected, and whether the Commission should so order pursuant to sections 11 (g), 12 (e) and Rule U-100.

2. Whether said petition, as filed or as it may be amended, should be permitted to become effective as consistent with the standards of sections 11 (g) and 12 (e) of the Act.

3. Great Falls proposes to acquire for cancellation its existing common stock, $100 par value, now held by the public, by offering in payment thereof $1.00 per share.

4. North Continent, which as of March 23, 1943, owned the 6% demand notes in the amount of $1,125,000, 1985 of the outstanding 2455 shares of preferred stock, and 2902 of the outstanding 3500 shares of common stock of Great Falls, proposes to surrender all of said securities to Great Falls for cancellation and will receive in return the entire $600,000 principal amount of new 8% demand notes and all of the 100,000 shares, $1.00 par value, of new common stock to be issued by Great Falls. All of the aforesaid securities to be received by North Continent under the Plan will be pledged by it with the North Continent Bond Indenture Trustee, in lieu of the securities of Great Falls now pledged with said Trustee.

5. Great Falls proposes to cancel 435 shares of its preferred stock and 404 shares of common stock presently held in its treasury.

In connection with the plan of reorganization or recapitalization Great Falls proposes to eliminate certain intangibles presently reflected on its balance sheet.

Great Falls does not propose to solicit the consent of any of its security holders to said plan in view of the large percentage of stock of both classes held by North Continent.

There are 35 shares of preferred stock and 194 shares of common stock of Great Falls owned by public investors.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to such amended Plan, either as filed or as modified;

It is ordered, That hearings on such amended Plan, either as filed or as modified, under the applicable provisions of the Act and the Rules of the Commission thereunder, be held on the 14th day of May, 1943 at 10 a. m. at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such date the hearing-room clerk in room 318 will advise as to the room in which such hearing will be held.

It is further ordered, That Willis E. Monty or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all the powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice; and

It is further ordered, That the Secretary of the Commission shall serve notice of the hearing aforesaid by mailing a copy of this order by registered mail to the Montana Public Service Commission, Great Falls Gas Company and North Continent Utilities Corporation not less than ten days prior to the date hereinbefore fixed as the date of the hearing; and that notice of said hearing is hereby given to the security holders of Great Falls Gas Company, consumers of said company, all States, municipalities and political subdivisions of States within which are located any of the utility assets of Great Falls Gas Company, all State commissions, State securities commissions and all agencies, authorities or instrumentalities of one or more States, municipalities or other political subdivisions having jurisdiction over Great Falls Gas Company; that such notice shall be given further by a general release of the Commission, distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935; and that further notice be given to all persons by publication of this order in the FEDERAL REGISTER not later than ten days prior to the date hereinbefore fixed as the date of hearing.

It is further ordered, That any person desiring to be heard in connection with these proceedings shall file with the Secretary of the Commission on or before the 10th day of May, 1943, a written statement relative thereto; and any person proposing to intervene shall file with the Secretary of the Commission on or before such date his application therefor, as provided by Rule XVII of the Commission's Rules of Practice;

It is further ordered, That without limiting the scope of the issues presented by the pending applications or declarations (or both), particular attention will be directed at the hearing to the following matters and questions:

1. Whether the proposed plan is necessary to effectuate the provisions of section 11 (b) of the Act and is fair and equitable to the persons affected thereby.

2. Whether the securities proposed to be issued, including the proposed interest rate of 8% on the proposed $600,000 demand note, comply with the standards of section 7 of the Act.

3. Whether, and the extent to which, the property account of Great Falls reflects intangibles, write-ups, or other inflationary items, or includes property which is "not used or useful" in the performance of utility services; the appropriateness of retaining such items in the property account.

4. Whether, in view of all the facts and circumstances concerning the acquisition and ownership of the securities of Great Falls now held by North Continent and the manner in which Great Falls has been managed by North Continent, it is necessary or appropriate that in determining the allocation of the securities of Great Falls as between North Continent and other security holders, the securities held by North Continent in Great Falls should be subordinated in

whole or in part to the claims of other security holders, or otherwise accorded participation in a manner different than their purported relative priorities.

5. To what extent, if any, the proposed plan should be modified or amended to render it feasible and fair and equitable to the persons affected and what terms and conditions should be imposed in the public interest and for the protection of investors and consumers.

It is further ordered, That jurisdiction be and hereby is reserved to separate, either for hearing in whole or in part, or for disposition in whole or in part, any of the issues or questions which may arise in these proceedings, and to take such other action as may appear conducive to an orderly, prompt and economic disposition of the matters involved.

It is further ordered, That Great Falls Gas Company shall mail forthwith a true copy of this Notice of Filing and Order for Hearing to each public holder of its preferred and common stock at the last known address of such public holder.

By the Commission.

PUBLIC SERVICE COMPANY OF INDIANA, INC.

ORDER GRANTING APPLICATION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 28th day of April 1943.

Public Service Company of Indiana, Inc., a subsidiary of a registered holding company, having filed an application pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 regarding the issuance and sale at competitive bidding, pursuant to the requirements of Rule U-50, of $38,000,000 principal amount of First Mortgage Bonds, Series E, 3¼%, maturing May 1, 1973, the proceeds of the proposed sale to be used to refund a like principal amount of First Mortgage Bonds, Series A, 4%, maturing September 1, 1969; and the application also requesting that the Commission remove a condition previously imposed by it regarding the debt retirement program of applicant;

A public hearing having been held after appropriate notice, and the Commission having considered the record and having made and filed its Findings and opinion herein; and

It appearing to the Commission that there are presently outstanding several conditions applicable to Public Service Company of Indiana, Inc. which have from time to time been imposed by the Commission after proceedings heretofore had; and it further appearing that it is in the public interest and the interest of investors and consumers that all presently effective conditions applicable to Public Service Company of Indiana, Inc. be set forth in this order;

It is ordered, That subject to Commission approval by further order, after the terms of the bond financing have been determined by competitive bidding, that said application, as amended, be and the same hereby is granted, subject, however, to the following four conditions which are in lieu of all existing conditions heretofore imposed upon Public Service Company of Indiana, Inc. and/or its predecessor constituent companies in proceedings before the Commission:

(1) After January 1, 1943, and so long as any long-term debt of Public Service Company of Indiana, Inc. shall be outstanding, Public Service Company of Indiana, Inc. shall not declare or pay any dividends (other than dividends payable in shares of its common stock) on any shares of its common stock, nor shall Public Service Company of Indiana, Inc. make any other distribution on its common stock or purchase or otherwise retire any shares of its common stock out of net income, unless the earned surplus of Public Service Company of Indiana, Inc., after making such declaration, payment, distribution, purchase or retirement, shall not be less than an accumulative amount equal to $750,000 per calendar year beginning with the year 1943 and through the year in which such declaration, payment, distribution, purchase or retirement is made; *Provided, however*, That the maximum amount of accumulated earned surplus required, pursuant to this condition, to remain after declaration or payment of such dividend or after such distribution, purchase or retirement shall be $7,500,000; *and Provided further*, That such earned surplus required to remain after declaration or payment of such dividends or after such distribution, purchase or retirement may be reduced for the purpose of the above computation by the amount of (a) any surplus adjustments at any time resulting from writing down or writing off the excess of carrying value of property, acquired by Public Service Company of Indiana, Inc. at the time of its creation from the companies through whose consolidation Public Service Company of Indiana, Inc. was formed over the original cost of such property when first devoted to public use; (b) all amounts appropriated and credited by Public Service Company of Indiana, Inc. after December 31, 1942, to its "Reserve for Possible Adjustment of Utility Plant and/or Depreciation Reserve"; and (c) any other surplus adjustments otherwise properly applicable to earned surplus. The restrictions contained in this condition are intended to bring about improvement in the debt ratios of Public Service Company of Indiana, Inc., and such restrictions may be reduced or terminated, in whole or in part, conditionally or unconditionally, by this Commission at any time upon application by Public Service Company of Indiana, Inc. in connection with the issuance and sale of additional common stock of Public Service Company of Indiana, Inc., or otherwise; subject, always, to the right of the Commission, in any proceeding under any provision of the Public Utility Holding Company Act of 1935, to make such orders, restrictions or conditions as it may deem necessary or proper in the case.

(2) During the period from January 1, 1943 to December 31, 1946, Public Service Company of Indiana, Inc. shall credit to its "Reserve for Possible Adjustment of Utility Plant and/or Depreciation Reserve" (referred to in condition numbered (1) of this order) an amount aggregating at least $1,000,000 through charges to that portion of the earned surplus restricted by said condition numbered (1): *Provided, further,* That said credit shall aggregate not less than $250,000 by December 31, 1943, not less than $500,000 by December 31, 1944, not less than $750,000 by December 31, 1945 and not less than $1,000,000 by December 31, 1946.

(3) So long as any mortgage bonds of Public Service Company of Indiana, Inc. shall be outstanding, Public Service Company of Indiana, Inc. shall not, except as hereinafter specified, use as a basis

(i) for the issue of mortgage bonds, or

(ii) for the withdrawal of any cash which has been deposited by it with the Trustee under any mortgage as a basis for the issue of bonds,

gross expenditures for additions, extensions, improvements, renewals or replacements made subsequent to September 1, 1939, to the plant and property of Public Service Company of Indiana, Inc. and/or its predecessor constituent companies, except to the extent that the gross expenditures for such additions, extensions, improvements, renewals or replacements, plus cash theretofore expended subsequent to September 1, 1939, by Public Service Company of Indiana, Inc. and/or its predecessor constituent companies in the retirement of first mortgage bonds (exclusive of retirements of first mortgage bonds through funds derived from the sale of mortgaged property) exceed the provisions for depreciation as recorded on the books of Public Service Company of Indiana, Inc. and/or its predecessor constituent companies subsequent to September 1, 1939, by charges to operating expenses (i. e. excluding any appropriations for depreciation from surplus or through reclassification of other accounts): *Provided, however,* That the foregoing condition shall not be applicable in any case of the refunding of mortgage bonds issued or assumed by Public Service Company of Indiana, Inc. or in any case of the purchase by Public Service Company of Indiana, Inc. of utility properties as a going concern, subject, always, to the right of the Commission, in any proceeding before it in respect of any such refunding or purchase of properties, to make such orders, restrictions or conditions as it may deem necessary or proper in such case. The restrictions contained in this paragraph may be reduced or terminated, in whole or in part, conditionally or unconditionally, by the Commission by its motion or upon application by Public Service Company of Indiana, Inc.

(4) Public Service Company of Indiana, Inc., so long as any of its long-term debt is outstanding, shall not declare or pay any dividends (other than dividends payable in shares of its common stock) on any shares of its common stock, nor shall Public Service Company of Indiana, Inc. make any other distribution on its common stock or purchase or otherwise retire any shares of its common stock out of net income, unless Public Service Company of Indiana, Inc. or such successor has, for the period from January 1, 1943, to the date of the proposed payment of such dividends or the making of such declaration, payment, distribution, purchase or retirement, charged against income each year as provision for depreciation an amount of not less than $2,700,000 plus or minus, as the case may be, for each calendar year subsequent to 1943, 3% of the gross book value of additions to depreciable property less retirements of depreciable property made during the period from January 1, 1943, to December 31 of the immediately preceding calendar year.

It is further ordered, That condition numbered (2) of the order dated May 7, 1942, issued by the Commission in In the Matter of Public Service Company of Indiana, Inc. File No. 70-433 be, and the same hereby is, rescinded.

By the Commission.
